Fortunately this age is one of the revealing biographies. Happy are those who can use the experiences of others as their own, and be instructed by the other man's hopes, trials, decisions, and triumphs!

Each business and professional man must depend for appreciation upon accomplishments rather than any published creed of intentions.

TREE FARMERS MUST FIGHT

LIKE FARMERS the world over, we must be everlastingly on the alert to detect and check crop enemies.

Our crop is timber. On our Tree Farms we have millions of trees in every stage of growth.

Fire is the most deadly enemy of trees. So, we make it our first order of business to set up and maintain a system of fire detection. Trained crews with modern equipment quickly suppress fires as they are located.

Disastrous fires can upset our long range program of timber cropping. Barring large fires, we believe the timber supply on our Tree Farms can be maintained to keep our mills running forever. If future generations are to have this supply of timber, everybody must help in preventing forest fires. We hope you'll think of this when you're in the forests. Be careful with fire! Help protect the future of an industry that furnishes directly or indirectly—jobs for more than 2,000,000 men and women.

TO HELP INSURE A PERMANENT INDUSTRY, WE—

Operate Tree Farms—to provide a never ending timber supply for our mills. The forest crop is harvested, reseeded, harvested, reseeded—in about 80-year cycles.

Diversify Our Manufacturing—in order to use all of the tree. The aim is to build manufacturing centers in each of our operating areas so that on one millsite we can make useful products from low value as well as high value material.

Develop New Products—to increase the "take" from each acre of forest land harvested. A staff of engineers and scientists spend all of their time in this work. More products mean more steady jobs.

Develop Permanent Markets—to be reasonably certain that Weyerhaeuser products are in steady demand year in and year out, in good times and bad. We work toward consistent high quality, and apply modern selling methods to create customer demand.
