## Home Repairs Set For County 1950 Total \$974,000

Coos county home owners will spend an estimated \$974,000 on repair and modernization of non-farm dwellings during 1950, according to estimates just released by the Title Council of America.

"Lower wholesale prices for building products and growing stress on the use of quality materials should greatly benefit Oregon home planning repairs this year," declared A. T. Wintersgill, chairman of the council's residential construction committee.

Approximately one of every three homes in this region will be redecorated, either inside or out, during the year, the report showed. One in ten will have plumbing repaired, bathrooms tiled or showers installed.

Roofs will be replaced or repaired on one of every eight dwellings, according to the report. Carpentry work will be done on six of every 100, and one of every 20 is due for miscellaneous interior repairs.

Home repairs will be easier on the 1950 family budget because of a deadline or more than five per cent in wholesale costs of building materials, in comparison with prices at the beginning of 1949, the report said. Home owners also will be able to insist on such quality materials as clay tile for repair work, as a result of the present buyers' market, it pointed out.

Expenditures throughout the United States for home repair and modernization this year will total \$2,350,000,000 to \$2,900,000,000, the report estimated.
