

**Wheel Balancing Adds Vacation Tire Mileage**

Careful attention to wheel balancing, alignment and tire rotation may result in a 25 per cent increase in motorists' tire mileage—especially on long vacation trips, according to Don W. Sanford, vice president of the Goodyear Tire and Rubber Company of California. "Because of refinements in automobile steering mechanisms in recent years, plus improved highways for high speed driving, wheel balancing has assumed a major role in proper tire maintenance," he explained. Above, Sanford (left) looks on as tire manager William Weider demonstrates wheel balancing technique.
