

Have Books From Coquille Library---Then It Would Help To Return Them

Do you have some books from the Coquille Library before it burned? If so, it would help to have them returned right now to the library in its temporary quarters in the old high school. That's the word of the Coquille library board who are busy cataloging books with volunteer help. The books are now being set up for the new library home in the Coquille community building. A complete list must be made up so orders for new books can

be mailed in at once. In the catalog now going on some duplicates are being found and these have been taken to the Coast Guard station by Mrs. J. A. Berg. However, many books are still coming in--books that were checked out before the fire in June a year ago. And it would help if all books now out from that period were turned in. For there may be some that would be ordered otherwise, and with the limited

budget of the library, a book is a book. So, if you have any books, that are long overdue, just turn them in. Roof thatching is still a lively trade in England and Wales, where today there are nearly 900 master thatchers, says the National Geographic Society. Properly laid, a thatched roof will last 15 to 25 years.

Library To Take Books Back In

For the next two weeks or so, the Coquille public library will be open in the old high school--now the junior high school--to take in books only. No new books will be loaned out until the library is in its new home in the new Coquille community building.

Coquille Firemen Take Part In Show

The Coquille Fire Department was strongly represented at the Rhododendron parade in Florence last weekend. The invitation to participate in the parade was extended by the Florence Fire department. Saturday night, the old Model T Fire truck was driven to

Florence by Darrell Williams, Bill Berg, Howard Moy, Joe Medders and Ross Mentonyl. Sunday, Fire Chief Craig Perrott, George Ekholm and Lolan Drain joined the group. The parade, which was to start promptly at 11 was slightly delayed. The reason was simple enough, when explained by one of the local firemen. "We couldn't get the model T started."

Abel Buell, the Connecticut cartographer, engraved the first map of America after the Revolution. He also dabbled in counterfeiting and served time in jail for altering 5-shilling notes.
