Census Forms Now Going Out To Coos Farmers

Questionnaires for the 1954 Census of Agriculture are now in the mail and will be in the hands of local farmers within a few days, it was announced today by Field Supervisor Don C. Mote.

The farm census questionnaires are being mailed from a central point with the distribution timed so that the report forms will arrive about a week ahead of the date when enumerators will begin the field canvass. The advance mailing is for the purpose of giving farm operators time to consult their records before filling in the answers required by the questionnaires and getting them ready for the census enumerators. This procedure is designed to insure greater accuracy of reporting and to save time both for the farmer and the enumerator when the latter calls at the farm.

The 1954 Census of Agriculture questionnaire is designed to provide information on the number and size of farms, acreage and harvest of crops, livestock production and inventories, selected farm facilities and equipment, selected farm expenditures, farm values, and mortgage debt. On the average, each farmer is asked about 100 questions, many of which can be answered by simply checking "yes" or "no."
