Since war was declared the coast guard stations have been under the control of the navy department. The conference at Portland was relative to war measures.

It Takes a Whole Room.

Dr. Richmond to give an entire room in his building to the magnificent X-Ray equipment he installed last week. The 220 volt machine made by the Wappler company of New York is the last word in that line, and this together with the big counter-weighted operating table that comes with it enables him to look right through you and see whether your anatomy is normal and how it is working. The operating table is hinged so that the patient under examination can lie flat on his back, stand upright or be tilted at any angle, and it is so outfitted that the doctor can take a photograph of anything abnormal that the X-Ray reveals in the body.

The people of this section are to be congratulated on the installation of such an outfit as this—as good as can be found in Portland, San Francisco, New York or any other city in the country. The doctor is too modest to be willing the Sentinel should state the amount this last addition to his office facilities cost him, but it was away up in four figures and would pay for a pretty fair residence.

Chicken Dinner In Demand.

The Methodist ladies certainly had a big day last Saturday. That chicken dinner proved so great an attraction that they were practically "eaten out of house and home" at noon and had to start at the foundation again to get up the supper they had advertised. But when they were through and had counted the cost and settled all their bills they found themselves about \$125 to the good. Unless they had come to the rescue as they did, though, it is hard to see where the crowds who thronged our streets that day would have found provender.

Big Salmon Roe.

Last Saturday Gene Robison found the largest roe in a salmon he was cleaning that he ever saw. He took it to Miller Bros. market and they immediately took it to their booth at the Corn Show, offering the prize of a chicken to the one guessing nearest to the number of eggs in the roe. The guesses, of which a large number were made, ranged from 500 to 5000, the smaller number being the only one below the actual count, which was 1728. H. A. Young made the nearest guess—1777—and Tuesday enjoyed a fine chicken dinner at Mr. Miller's expense. Much obliged John.

The light that says
"There it is!"

LOOK out for that tack!!

Don't let the dark trip you. Don't stumble over a chunk of night. Don't trip on a chair wrapped in blackness. Don't fall victim to the garden rake; or the baby's tin soldiers that lie in wait for your bare feet.

Don't flirt with fickle night. Go where you want to and get what you go after, and do it decently.

Take an EVEREADY into the night—and make things easy. You'll need it before bed-time.
