New Public Health Nurse

The new public health nurse recently appointed to take the place of Miss Amy B. Cardiff, who resigned to go east, is Miss Cecil Schreyer from Detroit, Michigan. She has had several years experience in public health nursing in Ohio. She returned home from overseas duty last February, where she had been doing public health work in France. Miss Schreyer comes very highly recommended and Coos county is fortunate in obtaining her services.

Miss Jane Allen, state organizer of public health nursing, who initiated and carried on the work in this county last summer and fall will come to Coos county with Miss Schreyer this week, in order to thoroughly acquaint her with the work. The state association finds it very difficult to obtain experienced public health nurses for the work in the various counties. This work is growing by leaps and bounds all over the United States and Coos county is fortunate in securing a nurse of so much experience as Miss Schreyer.

Speaking of "Trained Nurses and Reconstruction," in its current issue the Outlook says:

Public health nursing, which promises to become one of the great social forces of reconstruction in the future, was first organized in the large cities, notably New York, Chicago, Providence, and Boston, perhaps forty years ago. Smaller towns, and especially rural communities, however, have not shared in this development, and the Red Cross Department of Nursing is now particularly desirous of placing public health nurses in these localities.

The public health nurse, with her general and post-graduate training, is now recognized as the most efficient instrument for promoting a high order of community health. Her duties are of the most direct and practical form of social service. Striking at the root of epidemics by teaching prevention of the spread of contagion, she organizes classes of women who study the first principles of household sanitation, home nursing, and home dietetics.

The Red Cross hopes to offer instruction in home hygiene and care of the sick to every woman and girl in the United States. In urban communities, Red Cross Teaching Centers have already been established, where the course is offered to factory, operatives, girl scouts, nursemaids, "little mothers," and other specialized groups as well as to women who wish certificates for completion of the standardized course.

In working out this programme, perhaps the greatest obstacle which confronts the Red Cross is the lack of available public health nursing personnel. At the beginning of the war there were approximately six thousand public health nurses in the United States. Some of these, however, have since entered military service. The Red Cross has therefore appropriated one hundred thousand dollars in Public Health Scholarship Funds, with an additional five thousand dollars Loan Fund, to prepare nurses for public health work, and hopes to interest many of the twenty thousand nurses now being released in large numbers from the Army and Navy Nurse Corps to take post-graduate training for public health nursing.

An initial effort to launch this educational programme, the Department of Nursing is assigning Red Cross nurses on the various Chautauqua Circuits covering the length and breadth of the country during the summer of 1919—veterans of the great base hospitals behind the lines of Chateau Thierry and the Argonne, who shall become "wanderer-troubadours of health."

W. R. C. Returns Thanks

They especially wish to remember Neu C. Kelley for his untiring efforts in securing autos; the Coquille Band, the young veterans of the World War, the children who participated and the teachers, who drilled them.

School Marching Song

Coquille's school house lies a molding in the sun
While we go marching on.

Chorus:
School house, we want a school house,
A school house for Coquille.

Twenty years ago we built our old school house
But still we're marching on.

Myrtle Point, Powers, Bandon, Marshfield and North Bend
Each have a new school house.

Now don't you think we're just as good as all the rest,
As we go marching on.

Fine Films the Rule Now

The Liberty Theatre management is bringing a better class of shows to Coquille than has ever before been exhibited here and their patronage, especially on the evenings when special features are shown, is evidenced that their productions are appreciated. Such attractions as "Joan the Woman," Martin Johnson's "South Sea Cannibals," the Dustin Farnum, Mae Marsh and Smiling Bill Parsons pictures, as well as all the other stars of the movie world, have become so much a matter of course that the patron is never disappointed no matter what evening he attends.

Opening Dance at the Machon

Zinner will furnish the music for the dance.

Reduces Tax Roll \$1,435,000

Assessor Beyers says that the purchase of the Southern Oregon lands by the federal government takes \$1,435,000 in real estate values off of the assessment rolls of Coos county. Still that \$500,000 bird in the hand, beats lots of taxes to be levied in the future, and due to Governor West's efforts the current taxes for 1919 are to be paid out of the U. S. treasury.
