CHRISTMAS SAL OF W. S. S. WILL TOTAL MILLIONS

Government Appeals to Holiday Shoppers to Give Securities as Presents

Governor John U. Calkins of the Federal Reserve Bank, which is the financial agent of the United States Government in the Twelfth Federal Reserve District, has written a letter to every bank and trust company in the district calling upon them to use every means within their power to induce the people to buy War Savings Stamps and Treasury Savings Certificates for Christmas presents this year. It is the hope of the Governor that the people of the Twelfth District, instead of spending their money for luxuries to be used as Christmas presents, will help the Government finance its war debt of twenty-six billions of dollars by sending War Savings Stamps and Treasury Savings Certificates as gifts to their friends and loved ones. Demand for War Savings Stamps and Treasury Savings Certificates, the latter in denominations of \$300 and \$1000, set in last month. The Federal Reserve Bank shipped \$60,200 worth of Treasury Savings Certificates to eighteen banks on November 20, this being the largest day's shipment since the close of the war. The Government anticipates in the light of the demand of these eighteen banks for these securities to meet the holiday trade, that the seventeen hundred banks in the district will purchase more than a quarter of a million dollars worth of the Government's paper. Increased call for War Savings Stamps and Treasury Savings Certificates, and even Thrift Stamps has come in from all postoffices in the west in order that postmasters may have on hand sufficient supplies to meet the public demand.

The Government's holiday slogan "Give a War Savings Stamp or a Treasury Savings Certificate for Christmas" is elaborated in Governor Calkins' letter, which follows: "The Christmas holidays are almost upon us. Everything points to a tremendous outlay of money in the purchase of holiday gifts, the greater portion of which I think I am safe in saying will be luxuries. The present situation demands not that more money be spent in the purchase of luxuries, but that we curtail as much as possible, with the consequent beneficial contraction of credit. "Therefore, I appeal to you as a fellow banker to do everything within your power to stimulate the purchase and giving of War Savings Stamps and Treasury Savings Certificates as Christmas presents in place of the usual needless and expensive gifts. It seems to me that the responsibility of leading men's minds along the wiser of thrift and simple living rests to a great extent upon the bankers of the country and in asking you to push the sale of Treasury securities during the Christmas holidays, I am asking you only to take advantage of an opportunity to meet this responsibility." In addition, Christmas gifts con-

ONE MAN OPERATES BOTH TRACTOR AND IMPLEMENT

One Man Discs 27 Acres a Day with the New MOLINE UNIVERSAL TRACTOR

It Solves The Farm Help Problem

Discing is rapidly and economically done with the new Moline-Universal Tractor, Model D, one man with an 8-foot tandem disc harrow covering 27 acres in ten hours. With a 10-foot disc harrow he covers 25 acres, and with a 20-foot peg-tooth harrow 75 acres. The light weight of the Moline-Universal Tractor, 3,380 pounds, makes it especially adapted for discing and similar work, as it does not pack the soil and uses but little fuel, running on less than half throttle most of the time. It is light, but more than enough power to pull two 24-inch plows at high speed, all its weight being traction weight. The Moline-Universal Tractor attaches directly to the implement and forms a single, compact unit with it that is controlled by the operator from the seat of the implement, where he must sit to do good work. One man with the Moline-Universal does as good work as two men with the average tractor. The Moline-Universal is adapted for all classes of farm work. Its high clearance, 20 1/2 inches, makes it ideal for cultivating, and it is equally well fitted for planting and harvesting. In addition, it has ample power for belt work, pulling a 24-inch grain separator or 16-inch ensilage cutter with ease. There is work on the farm every day in the year for the Moline-Universal Tractor. It will do every field operation that can be done with horses and do it better, faster, and cheaper. This is why the Moline-Universal really replaces horses, and, at the same time, by enabling one man to do much more work than ever before possible, solves the farm help problem. The detailed construction of the new Moline-Universal, Model D, is the best it is possible to manufacture. Perfected 4-cylinder overhead-valve engine, electric starting and lighting system, complete enclosure of all working parts, and fifteen Hyatt roller bearings, are a few of the main features. We invite you to examine this machine at your earliest opportunity.

trying an appeal to give War Savings Stamps and Treasury Savings Certificates for Christmas presents will be distributed throughout the Twelfth Federal Reserve District, and all banks have been asked to include a similar appeal in their advertising.

The conference extraordinary of heads of international labor unions called for December 13 by Samuel Gompers in Washington will consider the advisability of incorporating in their program a provision for permanent Government War Savings as a sure way toward economic independence for the worker.

ELIMINATE RUBBER

BERGMANN SHOE OIL

Nobody likes rubbers
—they overheat the feet.
—they look like the Dickens.
—they are a nuisance.
—they cost like the Dickens.

Nobody likes wet feet
—they produce colds.
—they freeze shoes.
—they will prevent shelling.
—it costs very little.

Everybody likes Bergmann Shoe Oil
—it keeps feet dry.
—it preserves shoes.
—it will prevent shelling.
—it costs very little.

Great Growth at O. A. C.

Corvallis, Dec. 15.—Coquille is represented by two of the 2906 students now registered at the college. This is a new mark in total enrollment—an increase of 86 percent over the figures for the corresponding period in 1916-17, the last normal school year. Despite the fact, class, laboratory, and office room has been at such a premium that every available space in basement and garret has been utilized, a high standard of efficiency has been maintained.

Arthur Hooton, a member of the Oregon club, is a sophomore in electrical engineering. Edna Robinson is a junior in home economics.

Other students registered from the vicinity of Coquille are John Erickson, of Fairview; Roscoe Johnson, of Norway; John Donaldson and Bertha Wolverson, of Riverton; and Jake B. Moomaw, of Arago.

While war conditions brought about an increased interest in agriculture and caused an unprecedented influx of students in the school of agriculture—total registration 725—engineering in its various branches leads in popularity at the college. Students studying civil, electrical, mechanical, mining and highway engineering number 810. Forestry and logging engineering are represented by 77 and industrial arts by 25 students. Farm mechanics in the school of agriculture which has had an abnormal growth, owes its popularity to heavy purchases of tractors and other power machinery in the last two years by farmers of the northwest.

An increase of approximately 100 percent in engineering enrollment over registration in the fall of 1916 is largely due to the fact that the importance of engineering in winning the world war is fully realized, points out Dean G. A. Covell of the school of engineering. The greatest need in Oregon is for highway engineers. Because of the elaborate road building progress the demand is not supplied. Graduates in other fields of engineering also have no difficulty in obtaining responsible positions.

Gain in number of students is shown in practically every division and department. The school of commerce has 543, home economics, 497, pharmacy 154, school of mines 83. In the school of music 335 are registered in the full four year course, while 160 who are registered in other branches take incidental instruction in music. The high quality of work being

done this year is noticeable. Most of the 2906 students are high school graduates or have been transferred from other colleges or universities. Increase in faculty has been necessitated by heavy enrollment in some departments, and no pains have been spared in obtaining the best talent available. Men lead women 2070 to 836. The freshman class numbers 1091.

The number of applications for state aid for ex-service men sent to Salem for approval is 906. The federal board for vocational education has sent 122 rehabilitation men to O. A. C. which is reported to be the largest number assigned to any institution west of the Rocky mountains. A number of ex-service men here have received scholarships from churches or other organizations among which are three whose expenses are being provided by the supreme council of the Knights of Columbus.

That the college has a reputation over the country for efficiency is indicated by the fact that 129 students now in attendance were transferred from 21 states and territories. The University of Oregon leads the list of transfers with 23. State universities all the way from the Atlantic to the Pacific are represented.

The Episcopal Church Drive

A Portland letter gives us the following information as to the financial campaign now being waged by the Episcopal church in Coos and Curry counties under the leadership of Judge John S. Coke: Reports from Bandon, Coquille, Empire City, Gardiner and Marshfield, show total subscription of \$3,484, or approximately 26 percent of the total for the two counties. Reports have been made from all churches except St. Mary's Church, Gardiner, other churches reporting being St. John's Church, Bandon, \$808; St. James' Church, Coquille \$391; St. Luke's Church, Empire City \$250; Emanuel Church, Marshfield, \$1534.

Trespass Notice

No Hunting, Fishing or other Trespassing on any of the lands of the Russ Investment Company on either side of the Coquille river. Trespassers will be prosecuted to the fullest extent of the law. Fat Elk Gun Club. Sunset and the Sentinel \$3 for a year. The regular price of \$4.
