A. N. Gould has been over at the Bay most of the time the past two weeks surveying what is known as the Southern Oregon marsh between Coos River and Catching Slough. It was recently purchased by W. J. Conrad, A. E. Adelsperger and others. It will require a week or ten days yet to finish the surveying.

Death of S. J. Culver

Solomon James Culver was born in Baxter county, Mo., on February 8th, 1843, and died at Myrtle Point on Wednesday, December 24th, 1919, aged 76 years, 10 months and 15 days.

He, with his mother, crossed the plains with an ox team in 1850 and settled at Oregon City. Mr. Culver was married on October 12th, 1865, to Miss Sara Virginia Williams, who still survives him. Twelve children were born to them, seven sons and five daughters, eight of whom are living. He is also survived by nine grandchildren.

Short services were held at the home at 7:30 on Christmas Eve, in order to permit the family and friends to leave on the morning train for Roseburg, from whence they were driven to Camas Valley, where the remains were laid to rest besides those of his mother and brother near the scene of his residence for many years.—American.

The total is 175 acres actually signed up. Several others have signified their intention to plant berries but have not yet ordered plants. It is not yet too late to order plants and get ten years' protection by a contract that guarantees a good minimum price, with more if market price is higher. All who contemplate setting out plants the coming spring are earnestly requested to get their orders in at once to avoid disappointment.

Coquille Looked Good

M. B. Jackson, of Wenatchee, Wash., has been visiting his brother, J. A. Jackson, here during the past two weeks. He sold \$5,000 of apples this year from an orchard of five acres. He has also sold his fruit ranch and is looking for a location. He says apples could be marketed here just as well as at Wenatchee if the growers here were organized. Mr. Jackson was so well pleased with the Coquille Valley that he says if he hadn't had a ticket to Los Angeles he would have stayed right here for the winter.

Judge Watson Has a Fall

Judge Watson came over from the Bay Wednesday for New Year's. As a rancher he is meeting with the ups and downs of the business but it was principally down when the other day he stepped on the muddy path down to the Slough and fell with a 10 gallon milk can. He clung to the can so as not to lose the milk, and got out with nothing worse than a badly crushed finger.

Alice Collier's Party

Alice Collier entertained a dozen of her girl friends at her home last Tuesday evening with a dinner and party, which all enjoyed. Those present were Katherine Wernich, Mary Esther Johnson, Helen Lyons, Ruth Schroeder, Jean Pierce, Jean Young, Phyllis McCurdy, Avis Hartson, Marvin Hawkins, Gloria Getz, Margaret Hersey and Alice Collier.

Movies of Wreck

Alexander Singelow, northwest representative of the Fox News features, moving pictures, was in Bandon last week, says the World, on his way to the scene to take movies of the Chanslor wreck. He also included the rocky reef to show the dangers that beset navigators on the Pacific.

THE 1920 CENSUS.

(Continued from first page.)

The Census has nothing to do with taxation, with military or jury service, with the compulsion of school attendance, with the regulation of immigration or with the enforcement of any national, state or local law or ordinance. There need be no fear that any disclosure will be made regarding any individual person or his affairs. For the due protection of the rights and interests of the persons furnishing information every employee of the Census Bureau is prohibited, under heavy penalty, from disclosing any information which may thus come to his knowledge.

They Were Fit to Eat

Eight head of dairy cattle belonging to the Jim Adams herd were condemned by County Herd and Meat Inspector W. V. Glaisyer and were slaughtered by the local butchers under his supervision a few days ago, says the Bandon World. The animals were found upon test to be infected with tuberculosis. Speaking of the matter, Dr. Glaisyer said:

"I have just completed the post-mortem inspection of eight cows belonging to Jim Adams which reacted to the tuberculin test and were slaughtered by the local butchers of Bandon. Two of these cows were condemned as being unfit for food and were destroyed; the other six carcasses were passed as being sound, healthful, wholesome and fit for human food."

He also went on to explain that an animal was still fit for food if the disease had not progressed far enough to affect the blood and become scattered through the body, while the slightest reaction to the tuberculin test indicated that it was unsafe to keep them in a dairy herd.

This explanation was made by the Doctor because Bandon people objected to having the carcasses of any of the condemned and slaughtered animals placed on sale in the local butcher shops.

Give Successful Dance

The dance given by the U. of O. students at Machon's Hall last Friday night was a great success, both financially and socially. Most of the services rendered were gratuitous, including hall rent, the net receipts being \$37. The student body at the University is building a Woman's building at a cost of \$200,000 and the present drive is for the \$30,000 yet unraised, which they expect to have in hand soon. The building is nearing completion and the legislature has not been asked for a cent of it.

BARTER.
Life has loveliness to sell— All beautiful and splendid things. Blue waves whitened on a cliff, Climbing fire that sways and sings, And children's faces looking up, Holding wonder like a cup.
Life has loveliness to sell— Music like a choir of gold, Scent of pine trees in the rain, Eyes that love you, arms that hold, And for your spirit's still delight, Holy thoughts that star the night.
Spend all you have for loveliness, Buy it and never count the cost. For one white shining hour of peace, Count many a year of strife well lost, And for a breath of ecstasy Give all you have been or could be. —Sara Teasdale.

PLANT HAS TWO GOOD USES
Tropical Ampelae Furnishes Nourishing Food and Ornamental and Useful Vine.

One of the most curious of vegetable products is the Philippine "ampelae" which it is stated flourished for many years, if not centuries, in tropical lands before its edible character was suspected. The ampelae, like the cassava, is an extremely bitter and actually poisonous vegetable, but when boiled for a few moments in lye water this property disappears and a further cooking, either boiling, baking or frying, renders it a toothsome dish somewhat resembling a meaty winter squash, which is much relished by native and foreign inhabitants alike. The natives of the tropics obtain the necessary "sweetening" of the ampelae by boiling it with a small handful of hardwood ashes, which destroys the original acid flavor. The squallike fruit of this useful plant yields enormously on a vine which climbs over fences, trellises or brush, a single seed producing a vine which will entirely cover the side of a native house. The vine is ornamental as well as useful, furnishing a shiny green foliage and a quantity of showy, yellow blossoms.

FISH ARMED WITH BAYONET
Dweller in Tropical Waters is Ample Able to Defend itself Against Any Enemy.

The tropical surgeon fish is one of the most interesting of all the inhabitants of the aquarium. He is a medium-sized, flat-sided fish, and deep from above downward. There is nothing particularly suggestive to his appearance either of exaggerated aggressiveness or lamblike docility.

The casual observer would set him down as just a plain, ordinary, everyday sort of fish. From his name you would think he might be a ward attendant (for they do have hospital wards in the aquarium), but such is not the case. On either side of the body, just in front of the tail, there is a line. This line marks the location of a concealed weapon, sharp as a surgeon's lance. It is really a lance. It is as hard and smooth as ivory and is three-quarters of an inch long. The weapon seems to be composed of the same material as mother of pearl. The surgeon fish extends these spikes at will, and with a snap of his tail and a forward movement, he can disable an enemy in short order.—New York Tribune.

GOOD REASON.
Reggy says he is unable to collect his thoughts. Perhaps there are none coming to him.

Swiss Funeral Customs.
Swiss funeral customs are peculiar. At the death of a person the family inserts an announcement in the papers asking for sympathy. In front of the house is placed a black table on which stands a black jar. Into this the friends of the family drop little black-margined visiting cards. Only men go to the churchyard.

Tight Rope Bridge.

A bridge over the Stringgur river, India, is made of only three ropes. One is the footpath, while the other two are rails.

How Glasses Preserve One's Youthful Appearance

It is often urged that glasses will make the wearer look old, but, as a matter of fact, wearing glasses is one of the best preservers of a youthful appearance.

This is because prolonged eyestrain causes wrinkles and "crow's feet" to appear prematurely and gives the countenance a strained, tired, drawn, cross look which is far more to be avoided from a point of view of appearance, than from any real or fancied disfigurement caused by glasses.

We use particular care in netting glasses and in the selection of mountings most becoming to each person's individual style of beauty. Defects of vision corrected without the use of Drugs.
