The President Incapacitated

That President Wilson's physical condition is still such that he cannot properly discharge the duties of his high office is the conclusion to be drawn from the statements made in the following news letter from Washington:

Notwithstanding contrary reports, President Wilson is still a very sick man. Infrequent automobile trips, which give the appearance of recovery, it has become known, are to be accepted in only a small degree as indication of returning health and strength.

The White House physician, Admiral Carey Grayson is devoting more time to his distinguished patient now than for several weeks and there is no reason to question the information that there are at least three trained nurses in constant attendance.

The president's recovery, it was said today by one who should have authentic knowledge of the facts, amounts to but little more than intermittent flashes of returned mental vitality. Physically, it appears, Mr. Wilson has made no progress and he has aged 20 years in the last ten months. This latter statement is verified by those who have caught recent glimpses at the executive as his automobile whizzed away from the city throngs to quieter thoroughfares in the outskirts of the national capital where he would be less observed. He is but a specter of his former self, emaciated and pale, and his countenance impresses one as the reflection of sorrow and depression through which the light has not broken in many weary weeks.

There is no evidence that he has ever walked and there is every reason to believe the reports that his left leg and arm remain helpless. While he has taken several trips in the White House automobile no one outside has ever been able to see the method by which he was transferred from his wheelchair to the car and back again.

Those Packers' Profits

Profits made by the big meat packing companies in the first three years of the war, 1915 to 1917, "doubled, trebled and quadrupled," according to a special report of the federal trade commission at Washington this week.

From 1912 to 1914, the report said, the "big five"—Morris & Co., Wilson & Co., Cudahy Packing company, Armour & Co., and Swift & Co.—made average annual profits of \$58,500,000, while the next three years their net return averaged \$192,000,000.

The commission called attention to the packers' announcement that profits amounted to only "two or three cents per dollar of sales," and said that in an industry like those under consideration, which turn over a product very rapidly, this is the "equivalent of a high rate of return on net worth 15 per cent or more."

"Rate of investment, not rate on sales, furnishes the correct method whereby the reasonableness of profits may be determined," the report added. Financial statistics used by the packers in their recent advertising campaign "are not based on accepted methods of determining costs and accordingly dependence can not be placed upon them," the report said.

At the beginning of 1919, the report estimated the combined assets of the big five, \$1,300,000,200, their combined net worth at \$535,000,000 and aggregate sales for the previous year at \$3,200,000,000.

Wears His Old Clothes

In a speech in the United States Senate Wednesday, among other things in advocacy of thrift and increased production Senator Thomas of Colorado said:

"I have on a suit of clothes four years old, somewhat patched but still serviceable," he said as he stroked the sleeves of his coat. "The shoes I have on were bought in 1916. I do not propose to buy any more clothes until prices go down to a reasonable level if I subject myself to danger of arrest for not wearing enough clothes on the streets of Washington. I am still willing to live on corned beef hash and if corned beef hash goes too high, I will go without meat to bring down costs."

Senator Thomas hasn't very much on the editor of the Sentinel. The suit we are wearing isn't quite three years old but our shoes were bought in 1913, and have been worn every summer since, and are good for at least one summer more. Our hat was bought early in 1914 before we had even seen Coos county and we do not, like Senator Thomas, anticipate arrest on account of the scantiness of our clothing and don't intend to buy anything more until prices drop—and we are beginning to hear echoes of their fall now.

A mammoth production and the most spectacular show of the year. "In Old Kentucky" at the Liberty Theatre, May 25 and 26.

Yes Sir-ee!

We made this cigarette to meet your taste!

Camel

CIGARETTES

CAMELS have wonderful full-bodied mellow-mildness and a flavor as refreshing as it is new.

Camels quality and Camels expert blend of choice Turkish and choice Domestic tobaccos win you on merits. Camels blend never tires your taste. And, Camels leave no unpleasant cigarette aftertaste nor unpleasant cigarette odor!

What Camels quality and expert blend can mean to your satisfaction you should find out at once! It will prove our say-so when you compare Camels with any cigarette in the world at any price!

Camels are sold everywhere in substantially equal quantities of 20 cigarettes for 25 cents, or ten packages (200 cigarettes) in a glass-topped-covered carton. We strongly recommend this carton for the home or office use, or when you travel.

DAIRY

FAVOR ONE-STORY BUILDINGS

Recent Survey of Milk Plants Indicates That Low Structures Are Most Satisfactory.

(Prepared by the United States Department of Agriculture.)

A recent survey of more than 100 milk plants, made by the dairy division, bureau of animal industry, shows that for establishments handling more than 1,000 and less than 5,000 gallons of milk daily, the typical structure is two stories high; where less than 1,000 gallons of milk are handled daily, the plants are usually housed in one-story buildings. Although there are a few

plants of three or more stories, this record would seem to indicate that fewer stories prove more satisfactory in most cases. One of the most noteworthy disadvantages of a milk plant having several stories is the increasing quantity of labor needed, in proportion to the size of the business.

BALANCED RATION FOR COWS

Combination of Ground Oats, Gluten, Bran and Cottonseed Meal is Quite Economical.

A balanced ration for dairy cows, used largely by New York farmers who feed silage, hay and some corn fodder for roughage, consists of 200 pounds ground oats, 200 pounds gluten, 100 pounds bran and 100 pounds cottonseed meal. Considering nutritive value it is about the cheapest ration a farmer can buy.

Elaboration of Visiting Card.

French ladies began to embellish their visiting cards with drawings in the form of hearts or Cupids. And then with Louis XV, that ardent patron of the arts, came the craze for fine engravings, and the ladies of the court soon adopted them for their cards to depict scenes on their estates, or that were of some particular interest to them. And under the engravings came the autographed signature! After France, personal cards were adopted in England and all other European countries, varying in detail according to the inclinations of the particular time and place.

Some Old Bull.

At a club this entry was found in the complaint book. "The hot water in the lavatory today was quite cold and there was none of it."—Boston Transcript.

MILK RECORD IS EXCELLENT

Shipment Made From Los Angeles to Chicago Found Sweet Eighteen Days Afterward.

(Prepared by the United States Department of Agriculture.)

When a bottle of cream shipped from Los Angeles to the national dairy show at Chicago, was opened and tested 18 days after it had left the cow, it was pronounced in perfect condition by those who examined it. Other samples of milk and cream entered in the national milk and cream contest and examined 15 to 18 days after production were also found to be sweet.

Because of the number of bacteria present, ordinary milk will not remain wholesome for such a long time, even if kept cold. The milk and cream which made such long keeping records were produced under very sanitary conditions, and every precaution was taken to keep them clean and to keep the bacteria count low. Furthermore, the milk was cooled to a low temperature immediately after it was drawn, and held there. The success attained in producing milk of such long-keeping qualities and low bacterial count is due in a large measure to the educational value of the local milk and cream contests which have been especially popular in cities of the Pacific coast states.

The bottles of milk, which were placed in boxes, and surrounded with crushed ice, were kept at a temperature from 32 degrees to 34 degrees F. at all times. The boxes were shipped in baggage cars to Chicago, and most of them were not re-iced along the route. An inspection of the samples on arrival at Chicago showed that of the various methods of packing, the insulated box filled with crushed ice was the most effective. The bottles of milk in these boxes were entirely surrounded by the ice, which was packed in as tightly as possible. One or two samples packed in ice and sawdust arrived in a spoiled condition, due to the fact that a low enough temperature had not been maintained. The ice in the insulated boxes lasted well, and one box from Portland, Oregon, which was re-iced at Minneapolis on Tuesday did not arrive in Chicago until the following Saturday, but was still in good condition.

When milk is produced and handled under the right conditions it can be shipped to almost any point in the United States, or to foreign countries, and arrive in good condition. At present considerable quantities are being shipped to Panama, and are used on ocean liners plying between this country and Europe.

Butter Wrappers and Treadmill Notices for sale at this office.

Detective Day's Finding

"Guilty but not proven," seems to be something about the way the Portland detective who came here to attend the Howell trial sizes it up. The Oregonian says:

Joe Day, a Portland detective sergeant, who attended the trial at the instance of a wealthy Portland man who became interested in the boy, asserted yesterday that the jury could have done nothing else under the evidence submitted.

"I would not undertake to say absolutely that Howell did not kill the girl, but from the evidence presented at the trial I believe the boy should be acquitted," he said. "I never in my life saw such a remarkable witness as young Howell."

Calling Cards, 100 for \$1.25.

Catarrh Cannot Be Cured
with LOCAL APPLICATIONS, as they cannot reach the seat of the disease. Catarrh is a local disease, greatly influenced by constitutional conditions, and in order to cure it you must take an internal remedy. Hall's Catarrh Medicine is taken internally and acts thru the blood on the mucous surfaces of the system. Hall's Catarrh Medicine was prescribed by one of the best physicians in this country for years. It is composed of some of the best tonic known, combined with some of the best blood purifiers. The perfect combination of the ingredients in Hall's Catarrh Medicine is what produces such wonderful results in catarrhal conditions. Send for testimonials free.

Lays Sunflower Egg

Here's a Sunflower story told by Elbert Bede in the Cottage Grove Sentinel which may be true, but certainly strains our credulity:

J. W. Eddy has discovered to his entire satisfaction that the rations fed to hens have a great deal to do with the kind of eggs which the hens produce. A few days ago he gave his hens a ration part of which was sunflower seed. Since then one of the hens has produced an egg with a perfect sunflower blown in the shell. He has decided to name his place the Sunflower ranch.

Heat Felt Notes

Elmer King has a new Federal truck, it is a big one and there is \$2400 invested in it.

Jimmy Laird went to town Wednesday.

Oscar Bunch has put out 2 sacks of raspberries.

The Brewster Valley telephone line does considerable outside business these days.

Musked night riders chase an outlaw over the rugged mountains until he is hurled over a cliff by his horse. "In Old Kentucky" at Liberty Theatre May 25 and 26.

FULLER PAINT

Delay means decay
paint right away with

THE life, the value, the beauty of your home, depend on the care you give it. Weather-beaten and warped siding, cracks and open joints are forerunners of decay. Many property owners neglect to look for such signs, judging their houses and buildings by general appearances only. It is good business to make regular inspection of your property, and to use paint of good quality, which is the surest preventive of decay. Through the varying conditions of weather in all their extremes, FULLER Paint has proved both its preserving and beautifying qualities—a Pacific Coast Product for Pacific Coast requirements. 71 years of paint manufacturing experience are back of every brushful of FULLER Paint.

- ### Some of the FULLER Products
