Fairview Ike.

First Jap Woman Journalist.

The first Japanese woman to edit a woman's page in her country, Miyo Kobashi, is studying journalism at Columbia university in preparation for teaching journalism in the Tokyo Union college next year. A decade ago women journalists were unheard of and unthought of in Japan. Now many women are growing interested in the profession, but very few of them have had special training for the work. That is why Miss Kobashi is preparing to teach the subject. "Women in Japan are liking the newspaper profession," says Miss Kobashi, "and already in Tokyo we have a club of twenty women journalists." Miss Kobashi is the Japanese representative of an interesting group of women students of 33 nationalities who form the International Payer of the Y. W. C. A. at Columbia university.

Simple Logic.

The earl of Portarlington, who was one of the first to volunteer for service during the railway strike in England, relates the following story: A boy scout on duty at one of the London termini, feeling the pangs of hunger about eleven o'clock one morning, began a vigorous attack on a substantial lunch he had brought with him. A gentleman passing by was moved to remark: "My boy, if you eat much now you won't have any appetite for your dinner." To which the smart little fellow replied: "Well, I guess if I haven't any appetite I shan't want any dinner." The gentleman had no more to say.

Season of Peril.

At this season of the year it is folly to enter your bedroom without turning on the light. Also do not attempt to sit on the edge of the bed unless you are sure the bed is there, for this is house-cleaning time and the women folks may have decided to put the bed on the other side of the room this year, so it is well to be careful, for you never can tell.—Knox Messenger.

Bugs That Birds Eat.

According to a paper on behalf of bird protection published by the State Horticultural society of Kansas the bird population of that state is 258,000,000, which every year eat enough insects to fill 450 trains of 50 box cars each—24,000 cars of a minimum weight of 24,000 pounds to the car. These insect trains would be long enough to reach from Oklahoma to Nebraska. Reduced to pounds, Blair figures that the birds of Kansas every year eat 576,000,000 pounds of insects. It is hard to conceive the dollars and cents value of the insect-eating birds to the Kansas farmer.

What's in a Name?

Sometimes nothing, often everything. It all depends on the name and what it stands for. We want our name to mean more and more to our customers, that's the reason we recommend such products as Goodyear and Goodrich Tires. Everybody knows these tires are good. More people in Coos County ride on Goodyears than any other kind. Our reputation is based on the quality of the goods we sell plus the kind of service we give you. We give you the best of both.

Goodyear Heavy Tourist Tubes—Best—Yet they cost no more.
