

The American Legion, Chapter Post No. 35

# Alice Louise Shrode

Child Entertainer, Impresario and Vocalist.

Tuesday, January 4th  
at Liberty Theater

Read what critics say of this wonderful Child Entertainer:  
Her selections, and in fact everything that she attempts, really startle the audience, for her versatility is as marvelous as what she does. She is really a great reader—in the sense of her ability to entertain. She whistles with power and entertaining ability that are seldom heard equaled. Her sense of humor is of the keen, infectious kind that makes all she does seem worth while.  
Then she dances right into the hearts of all when she steps off some of her folk lore interpretations. She sings, reads, whistles and dances her way to the front and there she holds her own.  
But the best part of it all is that she wins by her girlish gifts and not by an exercise of her art. It is a real pleasure to watch her entertain. There is no work about it. There is no art to it; as far as she is concerned it is all just entertaining the audience. She has the highest of all art—no art at all. She is just natural. Just Alice Shrode.

## Welcomed by the Whole Family

We feel sure that this clubbing offer will prove highly popular with every side of our readers who is interested in the raising and fruit growing activities of his or her state.  
The Oregon Farmer is not a paper of other things or climates. It is devoted to the commonwealth where you are making a living, not of some distant region, where everything from seed to markets is different.  
In addition to covering every angle of agriculture in our state, the Oregon Farmer gives a wealth of reading matter for the family circle. Every issue is rounded out with entertaining stories, feature articles, household helps and hints, and a corner filled with good things for the children.  
The welfare of each and every one of us is closely linked with the prosperity of the farms and ranches roundabout, so we are all interested in the work which the Oregon Farmer is persistently pushing forward for better roads, better farm laws, cleaner seed, and improved conditions all around for fruit grower, dairyman, stock raiser, market gardener, and general farmer.  
Take advantage of our clubbing offer and get this big value in reading matter.

Coquille Valley Sentinel Both 1 full year \$2.15.  
The Oregon Farmer

When a man constantly has his faults explained to him at home he more readily listens to the old "Friend" who tells him how wonderful he is. But  
**WHY CHANGE YOUR WIFE?**

**Handle Gasoline With Care.**  
Those who handle gasoline as a matter of ordinary custom are often quite oblivious to its potential dangers. An English journal tells of a motorcyclist who removed the cover of his electric horn and flushed it out with petrol. Having replaced the cover, he started for a ride. At the first attempt to use the horn the result was startling, for there was a terrific explosion and the cover crashed into the rider's ribs. The horn was, of course, full of explosive mixture, which was ignited by an electric spark.

**October.**  
October is our tenth month, but the eighth in the old Roman calendar, as its name indicates. Our Saxon ancestors called it Wymemonth, or the wine month. In allusion to this name, an old writer remarks: "And albeit, they had not anciently wine made in their own country, yet in this season they had them from divers countries adjoining." In some of the ancient Saxon calendars this month is represented by a farmer carrying a sack on his shoulder and sowing grain, in allusion to the practice of sowing the winter grain.

**Couldn't Find the Colors.**  
John's mother was washing some of his garments. Holding up one of his new wash suits, she exclaimed: "Oh, dear, dear, John, the colors in your pretty new suit ran." John, who was having much trouble in controlling a fiery steed in the form of a broom handle, apparently paid little attention. A little while later he came to his mother and said, in a much puzzled manner: "Mother, I can't find 'em any place." "Find what, dear?" asked the mother. "Why, the colors," answered John. "You said they ran. Where did they go?"—Indianapolis News.

**Starn Uprising.**  
Count Montijo, father of the Empress Eugenie, was an old soldier, military governor of a fortified town in southern Spain and a regular martinet in his family. Not wishing to have namby-pamby daughters, he resorted to extreme measures. Every morning on the ramparts of the citadel he set Eugene and her sister Françoise astride a cannon and had it fired off! If the children cried or even whimpered they were subjected to the cannon's salute and a third time.

## DRUGS DETRIMENTAL TO COW

Experiments at Iowa State College Show That Alcohol, Alkali, Etc., Are Harmful.  
The use of drugs with the idea of increasing the fat production of test cows has been tried out by Iowa State Agricultural college dairy section. In most cases it was found that drugs decreased rather than increased the fat production.  
Such drugs as alcohol, castor oil, salicylic acid, magnesium sulphate, zinc sulphate and sodium chloride were tried and in all cases they were detrimental to the cows. All cows used were in good normal condition at the start of the tests and various doses of drugs were used.  
In some cases it was found that the flow of milk and butterfat was increased slightly, but this soon fell off and in the end a decrease was noted.  
Up to date no drug has been found that will increase the butterfat. Dairyman are strongly advised not to resort to this method as it injures the cows and is not a fair way to gain a reward.

## BEST TEMPERATURE OF MILK

Only Way to Insure Accuracy in Feeding Calves Is Thorough Use of Thermometer.  
Milk as it comes from the cow possesses a temperature near 100 degrees Fahrenheit. When feeding young calves it is well to be very particular in regard to this matter. The only way to insure accuracy in determining temperature is through the use of a thermometer. As calves grow older, eight to ten weeks of age, the temperature may be reduced to 90 degrees Fahrenheit. However, it is always desirable to warm the liquid ration slightly, even for calves six months of age.

## FEED COW QUITE LIBERALLY

Silage, Mangels, Rutabagas and Other Root Crops—Should Have Abundance of Food.  
The cow should be fed liberally on succulent feeds, as silage, mangels, rutabagas or other root crops. They induce the cow to consume large amounts of food, which is desirable. These feeds of this kind are very palatable and easily digested.

## CALVES DO WELL ON PASTURE

Most Economical Manner of Caring for Them, but They Must Have Additional Attention.  
Calves do very well on pasture and can be cared for in this manner more economically than in any other way. Care must be taken, however, to see that they receive what additional care is necessary. The calves of today are the herds of tomorrow.

## Best Lubricating Oils.

The superiority of fixed or fatty oils over mineral oils for lubrication has been attributed to the influence of free fatty or organic acids, and the addition to a mineral oil of 2 per cent of a common fatty acid is stated to have reduced friction 26 per cent. The quality of the mineral oil can be variously adapted by a suitable selection of acid. Advantages claimed by the patentees include the cheapness of the superior lubricating powers imparted to mineral oils, and the use of small quantities of low-grade fatty acids to replace the much greater quantities of fatty oils that can be released for margarine, and other food products.

## Familiar Incident.

"I understand the platform on which a candidate was speaking broke down under him." "Nothing unusual," commented Senator Sorghum. "I have very seldom known a candidate who did not fall off his platform at one time or another."

Vulcanizing and battery service at Graham's Garage.

## High School Notes

The beginning of the year has made the following records for the boys and girls. The girls' records that follow are those as reported by the end of the semester:  
Words a minute  
Gertie Bogard ..... 21  
Lena Pointer ..... 20  
Conella Lorenz ..... 21  
Mary Morry ..... 21  
Eugenia Schroeder ..... 21  
Lella Miller ..... 15  
Lowell Simpson ..... 16  
Wayne Woodward was injured in an accident Wednesday night.  
The game with Jefferson high school was both a success and a failure for Coquille. The score was 72 to 19. The Coquille boys showed lots of fight even if they were playing a losing game. Coquille made five substitutions and Jefferson two, one center and a guard. The North Bend score was 32 to 15 and Marshfield was 45 to 10. The receipts from the sale of tickets were about \$85.  
At a meeting of the associated student body, Myrtle Mast was elected vice president to fill the position vacated by Helen Sherwood, Miss Sherwood succeeding Odie Beckham as president.  
Many of the students were absent Monday, doubtless because of the Christmas vacation.

## Poultry Demonstration Farm

From Farm Bureau News  
The Oregon Agricultural College has agreed co-operative arrangements with Messrs. Heard and Holland and the Parkersburg Community committee of the Farm Bureau to use the Sunnyside Poultry Farm as a practical demonstration of the poultry industry under Coos county conditions. Complete records are being kept of daily receipts and expenses and Prof. Cneby, poultry specialist of the College, will hold a series of four meetings at the farm during the year, the first of which will occur on January 18th. Everyone interested in poultry can get in touch with the best poultry methods by attending these meetings.

## Will Manage Humboldt Dairy

Warren Bullard is taking over the management of the Humboldt dairy farm at Bullard's, having purchased a part and leased the balance from the estate. The place had been rented by C. D. Jarman, who operated it in conjunction with his own farm. The two places adjoin.—Bandon World.

## Smith Mills to Open Jan. 17

Carroll Smith is quoted as authority for the statement that the C. A. Smith mills will not resume operations until January 5 or January 17th, probably the latter date. The lumber market is bad and Receivers Boles and Denman indicated that January 17th would probably be the date of resumption of operations.

Turn over a new leaf.  
Buy your Groceries from US.  
A running stream is fresh and pure, because the water keeps ON THE MOVE. A stagnant pond becomes impure, because it does not move.  
We keep fresh, pure groceries, because we keep them MOVING—moving IN every day from the best wholesalers, and moving OUT into the homes of KNOWING housewives. Why?  
Because we sell good stuff at the low price and are always "on the move" to please our customers.

## 22 Per Cent Rent in Coos

(From Farm Bureau News)  
Coos County rents 22 farms out of each hundred. According to the last census, 15.1% of all farms in Oregon were rented. In some states as high as 33% of all farms are rented. Several farms for rent now in Coos county are:  
O. H. Robinson, Powers.  
E. M. Beckham, Coquille.  
L. E. Woodward, Arago.  
C. G. Butler, Arago.  
Frank Snow, McKinley.

## Butter Wrappers and Trays No-Joss for sale at this office.

Why man—  
we made this cigarette for you!

CAMELS fit your cigarette desires so completely you'll agree they were made to meet your taste!

Unique flavor, fragrance and mellow-mild-body due to Camel's quality and expert blend of choice Turkish and choice Domestic tobaccos are a revelation! You will prefer the Camel blend to either kind of tobacco smoked straight!

With Camels you can go the limit without tiring your taste. They leave no unpleasant cigarette after-taste; no unpleasant cigarette odor!

To get a line on why Camels win you so completely compare them puff-for-puff with any cigarette in the world at any price. You'll prefer quality to coupons or premiums!
