Why do so many people wear glasses—especially young people? The principal reasons are that the eye is now more perfectly understood, and people are becoming more enlightened regarding their most delicate and complex organ. The equilibrium of the whole nervous system is disturbed when the eyes are strained, and it is positively known that the mental capacity is greatly increased when such strain is relieved by properly fitted glasses. W. H. Schroeder is prepared to take care of your wants in this line, and you will do well to consult him if you are in need of glasses.
