Prof. L. O. Edmunds and family passed through town the middle of last week for the bay where they took passage on a Portland bound steamer, being on their way to The Dalles, Oregon, where they will reside for a time at least. Mr. and Mrs. Edmunds have a daughter living there she being a trained nurse of that city, also and a son who is a bookkeeper in one of the banks at that place. If satisfied with the country they intend to locate, but if not, they will make but a temporary sojourn for a change of climate. Mr. Edmunds assures us that they do not dislike Coos county, and dare not venture the assertion that they will not return to its genial climate in the near future. They have lived here thirteen years, all of which time Mr. Edmunds has been one of our leading educators, it being our opinion that he has lost less time in those years from the school room than any teacher in the county, and he holds papers as high as it is in the power of our state to give, a life diploma. While we wish them the best of success in their new home, we will be glad to welcome them on their return.

The Mullins Boat and the Ferro Marine Engines

The W. H. Mullins Company of Salem, Ohio—widely known as the largest builders of small boats in the country—install Ferro Engines and no others. Before placing their order for the year they made very exhaustive tests of highest grade two-cycle engines made; the result was an initial order for 500 Ferro Engines—the largest single order ever placed. If such large engine buyery as the Mullins Co. stake their whole year's business on the Ferro after looking so carefully into all the engines made, certainly you ought to feel that this goes very far to prove that the Ferro Engine has in fact the superiority we claim for it.
