The problem is how to secure the benefit of such combinations without sufiering the evils which they are also capable of developing.

The only answer that has been suggested, outside of government ownership and operation, is government control; and that control cught to be so devised as both to permit and to encourage combina-As a managing editor of a metortions and joint agreements between politan pewspaper Mr. Lawrence railways whenever these are in the public interest.

Covernment Control.

The two things that are necessary to make such regulation effective are: First of all, a recognition that the railway service to the country is really a part of the public service, although it is conducted through private agencies; and, secondly, that the object of governmental control of the private agencies doing this business is not to limit their activities, but to make sure thet all their activittes are conceived, first and last, in the public intnrest .- Daily Journal.
