American Children.

Alfred Mosely, the distinguished British educator and economist, finds that the race of children is extinct in America, says the New York World.

We have "brushed the bloom off natural childishness," and instead of children there are only little men and little women, 4-year-old despots who are walking editors of the declaration of Independence, who have no respect, no reverence, for anything human or divine. The "normal" American boy is "a cute, smart, nervous business manikin."

Even savages, Mr. Mosely asserts, command greater respect from their offspring than do American fathers and mothers. He attributes these conditions of juvenile precocity to a deficiency of nurseries and children's play rooms in American homes and to a too early association of the interests of parent and child.

From appearances this "distinguished British educator and economist" has met with the "smart American boy of four" and has formed an unfavorable opinion of him. Possibly he has bumped up against the Katzenjammer twins. If he has, his remarks are to be pardoned.

Proper Treatment for Dysentery and Diarrhoea.

The greatest mortality from dysentery and diarrhoea is due to a lack of proper treatment at the first stages of the disease. Chamberlain's Colic, Cholera and Diarrhoea Remedy is a reliable and effectual medicine, and when given in reasonable time will prevent any dangerous consequences. It has been in use for many years and has always met with unvarying success. For sale by R. S. Knowlton.

## Do You Intend to Build?

If So Did you stop to consider that a building made out of cement blocks is almost indestructible and fireproof?  
Did you stop to consider that the first cost is almost the last cost?  
Did you stop to consider that sand and gravel, washed and cleaned by the ocean, together with proper proportion of Portland cement, makes the finest blocks and bricks in the world.
