As to Reliability of Quality

ALL the thought, time and care spent upon the prescribing and the dispensing of your prescription is wasted unless the very foundation, the ingredients used in it, are correct and dependable in quality.

There is no other drug house that we know of that goes to more trouble and pains in selecting the best goods and in trying to find fault with its own goods than does this drug store.

We prefer that no fault be left for our customers to find. Every practical, physical and chemical test is made to find that the goods in this store are in right condition. These are our claims for absolute reliability.
