Mr. Franzenbach has been in Coos county now four years and has established an enviable reputation for first class work and square dealing with his customers. His work has always given satisfaction and he merits the patronage of all who are interested in his line of work.

### COL. JOHN JACOB ASTOR TO ATTEND CENTENNIAL

Astoria, Or., March 18.—Colonel John Jacob Astor has subscribed \$10,000 to the Astoria Centennial fund and promises to be present at some time during the celebration. This information was received this morning in a telegram from Senator Chamberlain at Washington, who has been interesting himself, at the request of the local committee, in getting the Centennial to the attention of Colonel Astor.

His presence will be appreciated more than his donation, as it is expected that he or some member of his family will unveil the monument that is to be erected in honor of his distinguished ancestor.

### THOUSANDS OF SHARKS PASS OREGON COAST

Presumably having been frightened away from their accustomed haunts by an earthquake or a volcanic eruption, thousands of Asiatic man-eating sharks darkened the sea over an area 30 miles long and eight miles wide, off the Oregon coast yesterday. From 7 until 10 o'clock the American-Hawaiian liner Falcon, Captain Schage, arriving from San Francisco last night, was steaming through the great school, and she was reeling off ten miles an hour.

Except an occasional stray now and then, the officers of the Falcon said this morning that they never saw a man-eating shark so far north before. They were crowded together, and each appeared to be about 30 feet in length. J. B. Heal, the chief engineer of the steamer, said that they adorned with fins as large as the centerboard of a sailboat. They seemed to be headed in no particular direction. Aside from scurrying away to keep from being struck by the prow of the Falcon, the monsters appeared to be in no hurry, leisurely working back and forth in the huge procession.

Just how far the mass extended out to sea could not be determined. Sharks still were visible for a distance of four miles on either side of the vessel. Nervous and fidgety, the man-eaters led the officers of the steamer to the belief that they had become panick-stricken over some upheaval in Oriental or Southern waters, and, like human beings they fled for their lives.

One theory advanced is that after being driven from the warmer seas in which they make their home, the sharks followed the Japanese current across the Pacific. In this manner, it is explained they would be in water of fairly high temperature. Others on the Falcon say they may have come from down about the Hawaiian Islands. However, all are agreed that the sharks must have been forced to take flight on account of a disaster of some sort.

Chief Engineer Heal, First Officer A. Sorenson and William Goodwin, the cook declare that in all their experience at sea, they never saw anything to compare with this monster pack of sharks in any part of the world. Even in the home of the man-eater, they never ran across anything to equal the sight they beheld. The steamer began to run into the sharks in the latitude of Yaquina Head.—Telegram.

### SPECIAL ANNOUNCEMENT

To the Patrons of the Coquille Laundry & Ice Company

We take this opportunity of thanking our many patrons at Coquille, Arago, Norway, Riverton, Randolph, Bandon and Beaver Hill, and also those customers on the river between the points mentioned above.

We wish to assure you that it has been our policy to have been able to conduct our business successfully and to grow to the extent that we have. We have re-invested every dollar in the business that we have made, in addition to what capital we brought here, and have shown our faith in Coquille and the Coquille valley by so doing.

We believe that this country will yet come into its own, and have all the advantages that other places have that are rich in natural resources, and people with honest, industrious and progressive citizens.

Capital will seek the wealth of our timber and coal, and dairymen and fruit growers will use every acre of our land that can be utilized in those industries. We will have railroads and trolley roads, and good wagon roads, etc. We have been waiting for these things for a long time and we are told that all things come to him who waits; however, we make a motion that everybody hustle while they wait. This is getting off the subject a little, but as we have always been a booster you will pardon the digression. We wish to announce that beginning with the third day of April next we will conduct our laundry business on a cash basis.

We think that the majority of our customers will welcome the change and be glad of the opportunity of paying cash on delivery. The driver of the wagon here in Coquille will collect for all packages on delivery.

To those of our regular customers to whom it will be more convenient to pay every thirty days, credit will be extended for that period, but under no circumstances will credit be for a longer period. The reason for this change is that it is the only way to conduct a laundry business. Very few laundries are conducted any other way. We pay our Girls twice a month, our men folks once a month. Labor is the large item in the production of laundry, amounting to as much as the dry-goods merchant or the groceryman pays for his stock of goods. The difference being that is cash on the spot and no discount, hence must be met promptly.

Our agents in Myrtle Point, Riverton, Randolph, and Beaver Hill will conduct their collections as best suits them, as the agents are responsible for them. But we ask our customers to assist them in making the laundry cash. We wish to further announce that we have secured the services of a practical laundryman of 16 years experience to assist us to serve our patrons in this line, and will endeavor to increase the efficiency of our service.

Thanking you one and all for past favors and hoping to merit your future patronage, we await your commands for anything in the Laundry or Ice line.

Very Truly,  
Coquille Laundry & Ice Co.
