But seize this great opportunity. Just think of it! Over \$5000 worth of shoes must be sold at any price; in fact you make your own price. These shoes are as good as gold. For every dollar you spend you get at least \$3 worth of value. Think of it! That's going some isn't it?

Shoes are a Necessity

Not a luxury; we all have to wear shoes, even the baby. Do You know that the average family spends at least \$60 a year for shoes and most families spend above the average. Now just do a little figuring. Just figure on spending \$20 at this sale and you will be getting shoes enough for a year or more. That's pretty fine interest on the money isn't it?

You'd have to do a lot of scouting around this country before you could find an investment that would triple your money in a year without any possible chance of loss.

Shoes! Shoes! Shoes!

Over 3500 pair of fine up-to-date shoes. If we would bring these shoes to you and let you see what we have there wouldn't be any possible chance of your not buying for its just the same as offering you \$3 for \$1, and you couldn't refuse such a bargain as that.

We Can't Wait

To hire a number of salesmen, so we have put hundreds of pairs of high quality shoes in bins and a price is marked on each bin so you can take your pick, and save us the trouble of showing them.

Don't Delay

But come while we have all the latest styles and sizes. We don't intend this sale to last any longer than is necessary and have made prices accordingly. Come while picking is good.

Everybody Welcome

Bring the family; it will save you the second trip as you will surely buy a pair for every member of your family and you can fit them on and save the trouble of exchanging them.
