THE EUROPEAN WAR

For many years we have had it dinned into our ears that the way to avoid war was to be prepared for it. This bit of alleged wisdom may as well be now consigned to the scrap heap, where a lot of other popular fallacies ought to be quietly reposing. The people of the European countries have been groaning for a generation under almost insufferable and constantly increasing burdens, on the theory that each country must be "prepared" by having a military establishment able to cope with those of any other two countries. The mathematical idiocy of this proposition never seems to have occurred to the "statesmen" who have been guiding the destinies of the great powers. Now the fundamental theory on which they have been attempting the impossible has received a body blow. All Europe is ablaze with the fires of a war that would never have started but for the fact that the nations involved were "prepared." The little quarrel between Austria and Serbia would have been adjusted without a general war if the other powers had not been in a state of perfect "preparedness." Serbia would not have been so uncompromisingly insolent to Austria if she had not felt the "prepared" power of the Russian bear behind her. It being understood that Russia would support Serbia, Austria would not have so hastily commenced a war on Serbia if she had not been assured of the armed support of the most thoroughly "prepared" war lord on the continent. Had the Kaiser not been "prepared" with the greatest war machine of all time, he would not have given Austria such an assurance. And there you have it. Does any one suppose that the greatest war of all history, the war which the world has been dreading for a generation, would have started and been in full swing on a week's warning if the powers had not felt that they were "prepared?"

not already done so. To an unprejudiced observer it looks as though William were fixing up an awful drubbing for himself.

There seems to be a conflict of opinion among the wise ones as to the effect we will feel in this country, some asserting that the war means prosperity for us. It may be that it will cause activity and profits for a while in certain lines, but the idea that the destruction of millions in property and the lives of thousands of able-bodied men, with the impoverishment of millions of people to whom we want to sell goods in the future, can result in benefit to us is founded on as great unreason as that other theory that "the way to avoid war is to be prepared for it."

City Council

At the council meeting last evening the bill of the Oregon Power Co. for the motor-driven pump installed at the water works was ordered paid, amounting to \$700; also some smaller bills of the same company for lamp renewals, extra work and street lighting for July, the last item amounting to \$155.40.

Frands Nordberg, who is mining on the Harris beach about a mile north of Brookings, is making excellent wages and has enough pay dirt in sight to last him all summer. The heavy surf of last winter washed out an old drift pile and left this deposit exposed.

A large 7 passenger automobile, with five passengers, ran onto the ferry at Gold Beach last Friday and the driver in attempting to put on the brake threw the clutch into low gear instead with the result that the heavy car kept on going and plunged into the river in some three or four feet of water. The car stayed right side up and no one was injured. A team pulled the machine out of the river, and it required a day of drying things before the engine would run again. This is the second auto that has gone off the ferry scow into the river this summer, but in each instance it was the drivers and not the ferryman's fault.
