## Opening Day at Panama-Pacific Exposition Broke All Exposition Attendance Records

All attendance records for exhibitions were broken at the opening of the Panama-Pacific International Exposition in San Francisco on Feb. 20. Vast crowds thronged the grounds when President Wilson pressed the button in Washington, and each day since the attendance has been enormous. The huge buildings and beautiful thoroughfares hummed with activity and have continued to do so. The Exposition has already demonstrated at this early date that it will be a great success in every way.

## BETTER BABIES

### Results of Contest at Coos & Curry Fair

The Coos & Curry County Fair Association announces the results of the Better Babies contest held at the Fair in Myrtle Point Sept. 9th and 10th as follows:

Champion Boy (i. e. the boy scoring the highest in all divisions) Gen. Slagle, Myrtle Point, Oregon. Score 99.5 per cent.

Champion Girl (i. e. the girl scoring the highest in all divisions) Vera Dean Harvey, Marshfield, Oregon. Score 99 per cent.

First Division, (babies from thirteen to twenty-four months) Highest boy: Geo. Slagle, Myrtle Point, 99.5 per cent. Highest girl: Gladys Hamilton, Myrtle Point, 97.5 per cent.

Second Division, (twenty-five to thirty-six months) Highest boy: Delos Strong, Myrtle Point, and Eldon Gilman, Coquille, tied, 98 per cent. Highest girl: Dorothy Chapman, Marshfield, and Mary Floyd, Myrtle Point, tied, 96 per cent.

Third Division, (babies from thirty-seven to forty-eight months) Highest boy: Hugh Hamilton, Myrtle Point, Oregon, 97 per cent. Highest girl: Vera Dean Harvey, Marshfield, 99 per cent.

Elwin Miller and Carlton Luttrell both received honorable mention, each having scored 99 per cent in the first division.

The Fair Association wishes to announce that the medals, diplomas and certificates of examination together with the duplicate score cards will be mailed within the next few days. In the case of the second division in which there is a tie the mothers of the children will bring them to the office of Dr. H. M. Shaw at Marshfield or Dr. L. C. Johnson, Myrtle Point, Saturday Sept. 12th, bringing with them if possible a small point will show the superiority of one over the other.

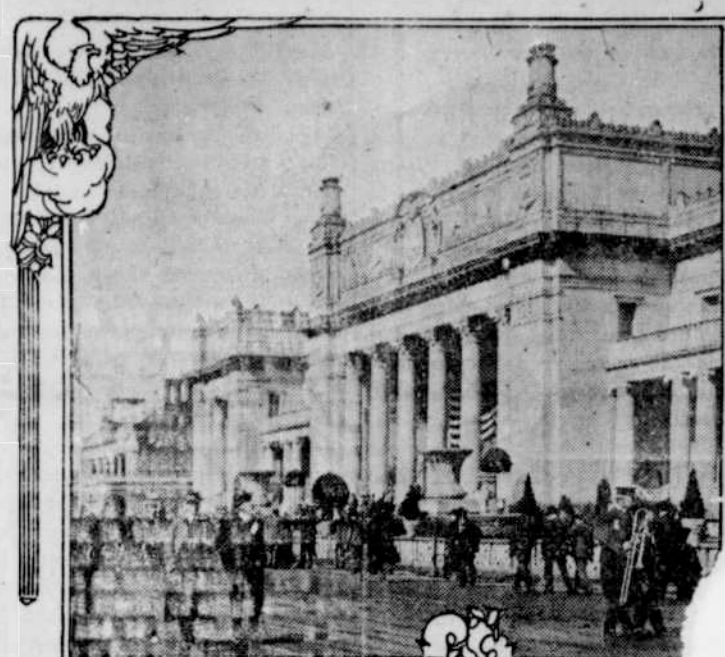

The Fair Association wishes to thank the physicians, nurses, and ladies who so kindly donated their time and also the merchants who loaned articles for the exhibit room.

## East Fork Items

A good name for Fred Baker's automobile is Old Queen. A week ago when he was asked if he was going to town he called back "I have got her going and can't stop." Fred does not know as much about buying old automobiles as he does about selling old mares.

The joys of life come my way sometimes. The last trip to Marshfield with a load I gathered the joys in bucketfuls. The gathering commenced on Hungry Mountain when Babe would not pull up along side of the truck, the wagon brake did not hold and wagon and team backed off the grade, not so steep but that a log blocked the wagon. Mr. Hyde got his truck into position and with a strong rope as a line and the help of the team he hauled the load into the road. At a hard pull near the summit where I met Walter Lawhorn I got stuck and camped for the night, and James Hatcher, jr., hauled my load to the top of the mountain with his team when he came to work on the road in the morning. Where the grading is being done a mile or more from Coquille Babe said no, but Mr. Ames and another man caused her to change her mind. Beyond Henryville there was more fun when the wagon load of apples, pears, tomatoes and eggs tipped over. Mr. and Mrs. Heintzman of Coaledo who were returning home with team and wagon did me great kindness. Fred Slagle and his load of passengers did good work in getting stuff piled up and putting the wagon right side up. Some of the load was the worse for wear. When the 36 dozen eggs were sold there were only two with shells cracked so the whites leaked and two with one dent each in the shell, not many of the tomatoes were usable. Of

## Breeds of Beef Cattle Best for Coos County

There are four leading breeds of beef cattle: Shorthorns, Herefords, Aberdeen Angus, and Galloway. The Aberdeen Angus and the Galloways are good cattle but are not numerous enough in Oregon to deserve much attention in this article. The chief rivalry is between the Shorthorn and the Hereford. "Durham" is another name for the Shorthorn. The word "Durham" is used very generally in Coos county, but it is practically never used by the leading breeders or at the big live stock shows, or in the agricultural papers. The Shorthorn cattle are red, white, or roan, and occasionally spotted, regardless of strain or breeding. Full brothers and sisters may be one red, another white and another roan. The Shorthorns are slightly larger than the Herefords, a little more full in the hind quarters and a little better milkers. The Herefords, on the other hand, are better rustlers, and fatten a little more readily on scanty feed. It is commonly said that the Shorthorn is the better for good feed and the Hereford for poor feed, and there is considerable truth in this statement. Where there is plenty of food to get the steers fat and to winter the cows in good shape the Shorthorn will probably be just as good in every way, but a little larger and so bring in a little more money. If the feed is not so good a larger percentage of the Shorthorn steers will not be fat and will have to be held over for another year and the cows will be too thin at the beginning of winter and will either not do well or will require extra feed.

The uniform and distinctive color of the Herefords is also an advantage. The small size of the calves at birth saves the cows much trouble in calving, while the calves soon grow to be as large as those of other breeds.

The differences outlined should enable the beef man to easily select the breed he wants. Both are so nearly alike and both so good and so much more profitable than the scrub, that the breeder of either is going to be more than pleased with the results. Nevertheless, when it comes to a fine distinction, we would recommend the Hereford for all year around on grass with no shelter, while we would recommend the Shorthorn where there was plenty of extra winter feed and shelter.

All those who enjoyed those miles of picnics with me there was not one growler in the lot, or anyone with a frown. "It was some picnic and with a guess at what Sam McAdams' bill is to be for repairs it looks as though it would take some rustling to get ten dollars worth of fun out of it."

## Dairy Herd Make

Oregon Agt Corvallis.—The complete a year under the supervision of F. W. K. with the U. S. the O. A. C. E. F. A. Baker, of Hermiston Here interesting figures these results, milk of each corded at each ple taken from evening's milk of each month fat. A record ke-

"Records for the full year are obtainable on nine cows and these proved to be very profitable and show what can be done by systematically weeding out the unprofitable cows. The average milk production per cow for the year was 6410 pounds, while the fat production for this period amounted to 306 pounds per cow. This is an excellent herd average and has been secured by keeping tab on each cow and disposing of the inferior ones."

"An average price of 30 cents per pound was received for the butterfat throughout the year, thus making the average receipts per cow amount to \$92 for the year. The average cost of the feed consumed by each cow for the year's period was estimated to be about \$35, figuring hay and grain at farm prices. This leaves an average net income of \$57 per cow from the sale of butterfat. It is generally figured that the skim-milk and manure will pay for the work of taking care of the cows, thus leaving the above amount as net profit per cow."

"The best cow in Mr. Baker's herd produced 8025 pounds of milk containing 419 pounds of butterfat worth \$126. Her feed was \$39 showing a net profit of \$87 for the year. This cow produced butterfat at a cost of 6 2 cents per pound."

## Want to Be Beautiful? Here's a Good Recipe

Want to be beautiful, girls? All right; list to the following hint from Vivian Rich, clever little American (Mutual) player, famous for her many appearances in Flying "A" productions, and noted as one of the most beautiful young actresses in screenland:

"Every morning of my life, regardless of weather, if I am where it is physically possible, I go for a half hour's walk on the dewy grass in my bare feet. It is the greatest tonic in the world, and it certainly is nature's own recipe. It furnishes one with complete relaxation—the kind that eliminates all the nervous fears and worries that go to make up the detested lines and wrinkles.

"play golf in your bare feet, if you can arrange to reach the course before the dew is gone. If you can't play golf, walk in the meadows, or on the grass of your lawn or back yard, or anywhere it is convenient, but always in your bare feet. Believe me, girls, you must give my hint a trial. You'll find it one of the greatest health and beauty recipes you ever tried. Seriously, girls, as one of you, throw away the bottled tonic you've been spending your hard-earned money on; then take off your shoes and stockings and take a walk through the grass while the dew is still on it.

"Let me know what you think of my recipe. I am confident it will benefit you, as it has me."

The Herald would also like to have information (in advance) as to when and where this recipe is to be tried.
