

"I'll Bet You a Year's Salary"

KITTY GRAY, an American newspaper reporter, finds and purchases half an old coin that she discovered in the window of an old curiosity shop. She is so impressed by the inscription which promises romance and adventure that she gives up her position on the newspaper in order to devote herself to solving the mystery. The decision of her editor moves her to bet him a year's salary that she can do it. She starts for the strange country and throughout the story she is shadowed by those who strive to thwart her at every turn.

How she triumphs over the most astounding obstacles, her hair-breadth escapes and thrilling adventures are told in the Universal's new magnificent picture serial, **THE BROKEN COIN**, founded on the story by Emerson Hough, the famous author who wrote such masterpieces of fiction as "The Mississippi Bubble," "4-40 or Fight," and scores of other huge successes. He has outdone his previous efforts in this wonderful story of **THE BROKEN COIN**, which is played by the strongest and most brilliant combination of moving picture stars ever brought together.

WOODEN LEG SAVES HIM.

Farmer Escapes Serious Injuries in Fight With Bear.

Sunbury, Pa.—His wooden leg spared him severe injuries in a battle with a bear, according to John Davison, a Catawissa mountain farmer, who lives near the town of that name.

Davison, according to his story, was riding horseback along the Susquehanna river, which skirts dense mountain growths at this point, when he saw a black bear fishing in the Susquehanna. It would dive down and then come up with a fish in its mouth, he said.

Angry at his approach, Bruin dropped a fish and gave chase, but Davison drew his revolver and fired. He missed it, and the animal came on after him and bit and clawed at his wooden leg. He fired again, and then a freight train approached on a railroad near by. This, together with the tooting of the locomotive's whistle, cooled the brute's angry passions, and it dropped to its feet and ambled off, disappearing in the woods.

Trainmen declare they have frequently seen bears in this territory, and the farmer exhibited a torn pair of trousers and lacerated wooden leg to gaping inquisitors.

WHITE RUINS BABIES' EYES.

Professor Tells Opticians That Color Weakens Little's Ones' Sight.

Pittsburgh.—Babies' eyes are being ruined by white walls, white dresses and white carriages, said Professor F. A. Wolf of Columbia university, New York, recently before the nineteenth annual convention of the Pennsylvania Optical society in a local hotel.

"If you care for the health of the youngest the worst color you can have on the walls of his nursery or bedroom is white," he said. "Babies' eyes are spoiled by white dresses and white carriages. Neutral and dark tints should be used. The dress, carriage and walls of rooms in which baby spends most of the time should be of some tint or neutral tint, either a light brown or a green gray. This applies to the dress of the nurse and the mother as well."

BEAR SAVES KEEPER FROM HUNGRY MATE

Driven Away After Attacking Prospective 200 Pound Meal.

New York.—An unscheduled performance of Androcles and the lion was staged recently in the Central park polar bear tank. Jim Coyle, the keeper, was Androcles. His namesake, Jim, the patriarch of the bear colony, played the lion, while his consort, Molly, was the crowd of wild animals of the arena, whose role was to eat the martyr.

At 2:15 o'clock p. m. Androcles, equipped with hip boots and a monkey wrench, went into the tank to repair the drain at the bottom. Jim and Molly retired upstage on the rocks and looked at him. Androcles went ahead with his work, bending over into the water, with his back to the animals. Androcles' 200 pounds caught Molly's eye.

An instant later she jumped, and it would have been all up with Androcles if Jim had remained a spectator. He jumped after Molly and caught her by the throat, while Androcles clambered out of the arena, with only a scratch on the back of his hand to show where the bear's teeth had grazed him.

Bill Snyder, head keeper, and his three assistants heard Androcles using strong language and hurried up with pointed iron bars. After five minutes' persuasion they separated the couple, while the martyr went into the police station to register.

"That bear Jim," said Snyder, "has been here ten years and has never given us any trouble. Molly has been here six and keeps you guessing every minute. Yes, sir, bears are funny. You aren't turn your back on 'em—never."

LED A "DOG'S LIFE."

Saloon Keeper Tells Court He Slept in Room With Fifteen Canines.

St. Louis.—Sleeping in the room and the bed with as many as fifteen dogs is a dog's life, according to Edward Flader, a former saloon keeper, now living in Bellevue, who recently sued for divorce.

The dogs belonged to his wife, Ida, the petition stated. It is said that she also permitted chickens a free runway of the saloon, and when Flader attempted to drive out the dogs he says his wife threatened him with a club.

Old Gas Well Does Duty.

Napoleon, O.—A gas well sealed up in disgust twenty-seven years ago is now being used for lighting, heating and cooking purposes by former Sheriff D. W. Sangler on his farm near here. When his neighbors recently began using the gas from the Napoleon-Wauseon pipe line he recalled the abandoned well and had it cased and pipes laid to the house.

Cuts Third Set of Teeth.

Sandusky.—John Brooks, eighty-two, is getting his third set of teeth. Brooks is a civil war veteran and lives in Cottage M. Ohio Soldiers and Sailors' home. His grandmother, he says, cut her third set of teeth at ninety-four.

BANKERS URGED TO CO-OPERATE WITH FARMERS

SOUL MATERIAL HAS ENTERED THE BANK VAULTS OF THE NATION.

The Bank a Financial Power House to the Community.

By Peter Radford.

One of the greatest opportunities in the business life of the nation lies in practical co-operation of the country banks with the farmer in building agriculture and the adventure is laden with greater possibilities than any forward movement now before the American public.

A few bankers have loaned money to farmers at a low rate of interest, and oftentimes without compensation, to buy blooded livestock, build silos, fertilize the land, secure better seed, hold their products for a better market price, etc. The banker in contributing toward improving the grade of livestock; the quality of the seed and the fertility of the soil, plants in the agricultural life of the community a fountain of profit, that, like Tennyson's brook, runs on and on forever. Community Progress a Bank Asset. The time was when money loaned on such a basis would severely test the sanity of the banker; such transactions would pain the directors like a blow in the face. A cashier who would dare to cast bread upon waters that did not return buttered side up in time for annual dividends would have to give way to a more capable man. This does not necessarily mean that the bankers are getting any better or that the milk of human kindness is being imbibed more freely by our financiers. It indicates that the bankers are getting wiser, becoming more able financiers and the banking industry more competent. The vision of the builder is crowding out the spirit of the pawnbroker. A light has been turned on a new world of investment and no usurer ever received as large returns on the investment as these progressive bankers, who made loans to uplift industry. The bankers have always been liberal city builders, but they are now building agriculture.

A Dollar With a Soul.

It is refreshing in this strenuous commercial life to find so many dollars with souls. When a dollar is approached to perform a task that does not directly yield the highest rate of interest, we usually hear the rustle of the eagle's wings as it soars upward; when a dollar is requested to return at the option of the borrower, it usually appeals to the Goddess of Liberty for its contractual rights; when a dollar is asked to expand in volume to suit the requirements of industry, it usually talks solemnly of its redeemer, but soul material has entered into the vaults of our banks and rate, time and volume have a new basis of reckoning in so far as the ability of some of the bankers permit them to co-operate in promoting the business of farming.

God Almighty's Noblemen.

These bankers are God Almighty's noblemen. Heaven lent earth the spirit of these men and the angels will help them roll in place the cornerstones of empires. They are not philanthropists; they are wise bankers. The spirit of the builder has given them a new vision, and wisdom has visited upon them business foresight.

The cackle of the hen, the low of the kine and the rustle of growing crops echo in every bank vault in the nation and the shrewd banker knows that he can more effectively increase his deposits by putting blue blood in the veins of livestock; quality in the yield of the soil and value into agricultural products, than by business handshakes, overdrafts and gaudy calendars.

Taking the community into partnership with the bank, opening up a ledger account with progress, making thrift and enterprise stockholders and the prosperity of the country an asset to the bank, put behind it stability far more desirable than a letterhead bearing the names of all the distinguished citizens of the community. The bank is the financial power house of the community and blessed is the locality that has an up-to-date banker.

POLITICAL PRAYER MEETINGS

It is a sad day for Christianity when the church bells call the communicants together for a political prayer meeting. Such gatherings mark the high tide of religious political fanaticism, put bitterness into the lives of men; fan the flames of class hatred and destroy Christian influence in the community. The spirit actuating such meetings is anarchistic, un-Christlike and dangerous to both church and state.

The success of the nation is in the hands of the farmer.

Work for the best and the best will rise up and reward you.

Tenant farming is just one thing after another without a pay day.

SERVICE FIRST

Some very satisfactory tests were made during the past week by transmission experts of the Pacific Telephone and Telegraph Company, who were sent here at our request to arrange circuits for long distance conversation between Coos and Curry line points and San Francisco. While commercial conversations to San Francisco for the present are not assured, they can be secured now when conditions are favorable. After the installation of certain apparatus which has been ordered, excellent transmission can be assured under all conditions. It is interesting to note that in talking from here to San Francisco, a loop via Portland of 2100 miles of wire is used. The Pacific Company has installed on this line the amplifiers which made transcontinental telephony possible.
