#### May Incorporate

A plan to incorporate the newly organized band and the Coosonians into a marching club and make it a permanent organization was outlined by President Norton at the meeting of the Commercial Club Tuesday night. This plan will be submitted to the various organizations which will be affected by its adoption and its acceptance or rejection rests with them. According to the plan, one member will be selected from the dancers. from each the Coosonians, the Commercial Club, the city council and the band to act as a board of directors, the fifth member being selected from one of the four organizations each year for a one year term; thus giving the selection of this officer to each of them every four years.

There has been a determination from the first to have the band and marching club organized on a business basis which would eliminate the difficulties which have arisen in previous organizations of this nature and it is only a cluding prints and etchings and is rated matter of finding a method that will be satisfactory to all concerned.

Because of the many activities which take place on Tuesday nights the Commercial Club have decided to change their meeting night and will hereafter | Ladd thirty years to bring the collecassemble on Wednesday night of each week.
