Barrett on Advertising

John Barrett, the genial head of the Pan-American union in Washington, was being heckled for his propensity for self advertisement. He took it in good part, but retorted:

"The fellow who tries to attract business without advertising is like the fellow who throws his sweetheart a silent kiss in the dark. He knows what he is doing, but nobody else does."

When Fashions Lasted For Years. In times past a fashion lasted with slight modifications for years. Much the same fashion continued through the long reign of Louis XIV. and another through that of Louis XV. while the ladies of the middle ages never thought of varying their costumes. As for the Greeks and the Romans, generation succeeded generation with little change in female dress, and yet all these ladies of the past were more artistically dressed than those of today. Many no doubt spent more than they could afford, but when they had a costly dress they kept it and did not throw it away to replace it with another.—London Truth.

Pyramid of the Sun. The most colossal structure of prehistoric man in America, known as the pyramid of the sun, is at Teotihuacan, Mexico, not far from the capital. Close to the great pyramid stands the pyramid of the moon, which the builders regarded as the wife of the sun, and surrounding them are nearly 200 mounds of greater or lesser magnitude, which, tradition says, were crowned by temples and public buildings. Two hundred and sixty-eight steps lead to the summit of the pyramid of the sun, which is 216 feet high. It is 751 feet square at the base, and the summit is 50 by 105 feet.—National Geographic Magazine.

Random Rambles

ing of the humble spud. The Lairds, Alec Austin and Mr. Crowley are among those who raise a nice patch of potatoes. From a little over two acres Mr. Austin stated he would harvest fully 500 sacks, while the others mentioned had less in acreage, but as good a yield. Only a small amount of land is devoted to this crop, but a tremendous amount of the independent tubers could be grown if the markets would justify. At present there is a good demand at fair prices.

O. C. Harry, who, it will be remembered, went away on a trip some time ago, has returned and settled down to work on the farm again. E. N. Harry has rented his place and is busy building a residence on land joining the Fred Baker place which is owned by a son.

Fred Baker was entertaining an unwelcome visitor in the form of a bad cold, or a touch of grip. He is busy locking after the road business in that section and is doing good work.

Alec Austin was awarded a contract early in the season to build a piece of road in front of his place. The people of Brewster, about a dozen families, are contemplating a cooperative creamery. They are making the preliminary arrangements now. Mr. Albini is the man whom they contemplate as manager of the business, or butter-maker.

Returning by way of Dora we met our friends of former visits the Krantz, Minards, Gearharts, Mayse and others. Crossing the river at the last named place we came to the farm of John Neer. Mr. Neer has the distinction of having the tallest corn in the county, having sent a sample to the state fair that measured 15 feet 3 inches and which was the tallest sample grown west of the mountains.

The Crosbys and Tensons live on this side of the river and each have a good farm. Calling again Sure it is that for logic and argument you are up against it if you try to do him up.

If Brewster Valley has no other claim to superiority it can truly boast that it is the best potato-growing section of Coos. Not only in the field, but in eating quality, are the potatoes grown here superior to any we have seen. In fact Brewster Valley is the potato patch of Coos. Hemmed about by magnificent mountains and containing a soil rich in the debris and humus of centuries of downward sweeping of fertility from the hills, it is especially adapted to the growth at the home of the Leathermans on the main road we found them busy with their chores in the deepening twilight. The elder Mr. Leatherman and wife had just returned from a visit of some weeks to friends in the Willamette Valley. S. L. Leatherman has been busy with his ensilage cutter filling the silos of his neighbors.

A few more homes we passed, but space forbids a recital of each by name; suffice it to say that we met Frank Harnish for the first time and enjoyed a good dinner at their home, after which we turned our couriers toward home. In a near issue we will tell your readers more of the Gravel Ford and tributary country.
