

# THE COQUILLE HERALD

## CREAMERY HAS GOOD SHOWING

**\$11,380 Paid to Dairymen Yesterday for Cream and Milk**

## TRANSPORTATION A PROBLEM Meeting Tomorrow to Endeavor to Solve This Problem for Summer

Eleven thousand three hundred and eighty dollars was the total amount of the checks signed for milk and cream at the creamery in this city yesterday. The resulting amount of manufactured product was 30,589 pounds of butter and 12,520 pounds of cheese. The butter production for the month was about the same as last year and in addition the dairymen of this section received their pay for the butter fat content of the whole milk which went to the production of the 12,520 pounds of cheese, which is an increase of their earning power of this total amount as a result of the establishment of the cheese factory at this place.

This sum represents only the first payment for the milk received during the past month. A second payment will be made to the same parties when complete returns are received from the cheese after it is marketed. The company, this month, paid 55 cents a pound for the butter fat content of the milk, two cents more than was paid at other creameries in the county and this sum will no doubt be further augmented when the complete returns are in.

Five thousand pounds of cheese was shipped to San Francisco Saturday morning in addition to the usual shipments of butter. The daily receipts of milk has swept up from the 9000-pound mark to over 10,500 and the management is assured that a still further increase will be made this week. Fresh cows are being added to the herd so that the company's figures of 25,000 pounds before the season is much further advanced bids fair to be realized before the end of the month.

The work of remodeling the interior of the building is also going ahead as rapidly as possible with the limited funds available. Three more carpenters were imported last week from the bay and as many of the local men can possibly be secured are at work on the construction of vats and other kind work about the plant.

The milk transportation problem is one which is now confronting the manager of the creamery. And this promises to be almost as serious as that of increasing the production in the territory. At the present time and for all past time the milk has arrived at the creamery at a late hour in the morning. With the cream this has worked no hardship, but with the cheese factory it is different. The milk must not stand in the cans during the hot weather and if it does so it will deteriorate rapidly. Therefore it is up to the management to put on a special boat which will make an earlier trip with the whole milk for the cheese factory. With this idea in view a meeting will be held at the creamery tomorrow morning at 11 o'clock to discuss this feature and if possible make plans that will do away with the difficulty.

A meeting along the same line will be held at McKinley school house Thursday. It will be the endeavor of this meeting to put on an auto truck to bring in milk and cream from Fairview and cream from McKinley and Dora and the upper section of the valley.

The prize name contest inaugurated by the company last month closed.

## BUY COOS TIMBER.

Eastern Man Has Options on Large Timber Tracts.

Geo. H. Chaney, of Duluth, Minn., is the owner of approximately 100,000,000 feet of standing timber in Coos county, arrived in Coos county last week from the east and will make his headquarters in Marshfield.

Mr. Chaney is here to buy up timber land and already holds options on several timber tracts in the county. He is buying in his own name, not as a representative of the company. He is accompanied by Mrs. Chaney, and they have taken apartments in the Myrtle Arms, where they will make their home during their residence here, at least through the summer. Mrs. Chaney is the daughter of Senator Alger, one of the wealthiest and most influential men in Michigan.

## Banking Laws Changed.

The following change in the banking law of the state of Oregon may be of interest to some of the readers of the Herald:

Any person who, with intent to defraud, shall make or draw, or utter or deliver, any check, draft or order, for the payment of money, upon any bank or other depository, knowing at the time of such making, drawing, uttering or delivering, that the maker, or drawer, has not sufficient funds in or credit with, such bank or other depository, for the payment of such check, draft, or order, in full, upon its presentation, shall be guilty of a misdemeanor, and punishable by imprisonment for not more than one year, or by a fine of not more than one thousand dollars, or by both fine and imprisonment.

As against the maker or drawer thereof, the making, drawing, uttering or delivering of a check, draft, or order, payment of which is refused by the drawee, shall be prima facie evidence of intent to defraud and of knowledge of insufficient funds in, or credit with, such bank or other depository, provided such maker or drawer shall not have paid the drawee thereof the amount due thereon, together with all costs and protest fees, within two days after receiving notice that such check, draft or order has not been paid by the drawee.

The word "credit" as used herein, shall be construed to mean an arrangement or understanding with the bank or depository, for the payment of such check, draft or order.

These changes took effect on May 21 and it will be in order to carefully check your bank balance before drawing too close to your known balance.

## Injunction Papers Filed

The papers in the injunction case to stop the logging of lumber on the Boutin tract were filed in the County Clerk's office yesterday. The parties made defendants in the case were the Coos Bay Lumber & Coal Co. and Aasen Bros. District Attorney Hall requested that the papers be sent to him as soon as filed, so it is presumed here will be little delay in getting to trial. The granting of this injunction would tie up the Aasen Brothers' operations and interfere with the operations of the Johnson mill here.

last Thursday. Several hundred names were received and are on file, and the successful competitor will be announced later.

This delay in announcing the winner of the contest is necessitated by the fact that whatever name is selected by the company as most desirable must be submitted first to Washington, D. C., to learn if it is already registered, in which case it cannot be used. A list of names in the order of their desirability will be submitted to Washington, D. C., and the winner will be announced when returns from this have been received.

Names were submitted from every western state, Oregon, Idaho, Washington, California and from several states east of the Rockies.

## BOND MEASURE CARRIES

Just what will be the final fate of the measures on the ballot voted yesterday is still in doubt in the main, but is conceded by those in the know that the bond issue is assured of passing by a fair majority. Other measures on the ballot are without doubt defeated. Coos County promises to pile up a healthy majority for the bond issue and this with the help of other vitally interested counties and the Multnomah County vote should carry the measure.

Later advices from Portland state that the bond issue has carried over the state by a good majority in the districts heard from. Even adverse reports from outlying districts cannot change the result.

## REGISTRATIONS SMALL BUT ARE COMPLETE

The registration on the War Census is going ahead in fine shape in this city. At the various polling places judges and clerks are giving voluntary service to the work of registering the young men and, while the number registered does not seem large the clerks are moderately busy owing to the large number of details made necessary by the information wanted by Uncle Sam.

Several peculiar features of the matter developed today in some of the precincts of the county. At Coaledo it was found upon investigation that there was not a male resident between the required ages, while in precinct 38, which is Coquille Northwest, the only man of eligible age, J. A. Jaza, was named as registrar, hence his duties were onerous.

In the main the judges and clerks of the various boards are giving their services gratuitously and in this way doing their bit toward a conservation of the government funds.

## Liberty Loan Bonds are safe investments. It's Uncle Sam's promise to pay.

Liberty Loan Bonds are safe investments. It's Uncle Sam's promise to pay.

## New Game Laws

The following from the new game laws which went into effect Monday, May 21, are of interest to residents of this section:

No person or persons shall make use of a dog in hunting, pursuing or killing any of the game animals of the state of Oregon.

License is required for hunting over 14 years of age for hunting any of the wild animals or birds protected by the laws of the state of Oregon. Fee for such license: Residents, \$1.50; non-residents, \$10.

License is required of every person over 14 years of age for angling or taking any trout, salmon, bass or any other game fish by hook and line commonly called angling. The fee for such license is \$1.50, provided that no license for angling is required of any female.

Every person must have the license required of them in their personal possession at the time of hunting or angling, and such license is at all times subject to inspection by any officer charged with the enforcement of the game and fish laws of the state, or the owner or his agent or representative of the real property upon which the holder of such license may be hunting or angling.

Deer with horns from August 15 to October 15 of each year, both dates inclusive. Bag limit, two such deer during any one season.

Ducks, geese, rails, coots and shore birds, open season, October 1 to January 15 of the following year. Bag limit 30 such birds in any seven consecutive days.

Chinese pheasant, sooty or blue grouse, ruffed grouse or native pheasant, open season from October 1 to October 31 of each year except in Jackson county the open season is from October 1 to October 10 of each year. Bag limit, five of any or all such birds in one day, or ten during any seven consecutive days, provided that no female Chinese pheasant shall be killed. There is no open season on Chinese pheasants in Josephine, Coos and Curry counties.

There is no open season on mountain or plumed or California or valley quail except in Jackson, Josephine, Coos and Curry counties in game district No. 1. Open season in these counties from October 1 to October 31 of each year.

Doves, open season from September 1 to October 31 of each year. Bag limit, ten in one day or 20 in seven consecutive days. Pigeons are protected by federal law until September 1, 1918.

Trout, over six inches in length, open season from April 1 to October 31. Bag limit, 50 fish or 35 pounds in one day.

Trout, over ten inches in length, open all year. Bag limit, fifty fish or fifty pounds in one day.

It is unlawful to have game birds or game animals in captivity without securing a permit from the state board of fish and game commissioners, for which a fee of two dollars will be charged.

A Liberty Bond buys an early peace.

## O & C GRANT LANDS TO BE THROWN OPEN

That the O. & C. grant lands in Jackson, Josephine, Klamath and southern Douglas counties will be ready for entry in ninety days was the statement made this morning by Gus Lovgren, chief cruiser for the land grant classifiers who have in charge the work of classifying all this land which has recently reverted to the government. Whether or not the commissioner will open them for entry is another matter, although it is believed by some that he will do so. It may be possible, however, that he will not decide to take this action until later.

At the present time there are a large number of cruisers working in this county. Six are stationed at West Fork, two at Glendale, four at Millwood, six at Peel, while in the northern part of the state, Columbia county, there are six or seven more, this number completing the field force now in service.

In this county the men are merely finishing up the small amount of work left last summer when they were forced to stop on account of the weather. There remained very little to do and the task should not take them longer than Wednesday of next week. As soon as they are completed the classification for all of Douglas county will have been completed and as soon as the office work is finished, the land will be ready to be thrown open to entry.

Indications seem to lead to the belief that the lands will be opened immediately after their classification, and that September may see a rush of homesteaders to this community. Whether or not this will be done, however, is not certain and it may be possible that the action will be delayed until after the international crisis has been settled.

The local land office is receiving many communications each day, in regard to the grant lands, and information is being sent to interested citizens. It is evident that as soon as the lands are thrown open to entry that there will be a great rush of people to southern Oregon. The grant contains some of the finest agricultural, timber and mineral land to be found anywhere and is being eagerly sought for by those who desire property of this nature.

Mr. Lovgren will return to Portland in about two days after having completed his work here.—Unquqa Valley News.

Buy Your Liberty Bond. We Shall Know You.

## CHANGE SUNDAY MAIL SERVICE.

Several changes were made in the mail service to this and other valley towns on Sunday. Among them was the putting on of a regular mail clerk on the morning and evening through trains. This will give all the postoffices on the line from Eugene to Powers a daily mail service, whereas, heretofore, but the principal towns have been getting a Sunday service. To counterbalance this benefit the local mail service has been taken off the morning train and there will be no way pouches for either this city or Myrtle Point.

The reason for the change may lie in the fact that there has been a continuous kick made by the towns north of Marshfield for a Sunday mail and it is thought the Sunday mail clerk is the result.

The next innovation expected by the wise ones will be a mail clerk on the Sunday boats leaving this city for Bandon. At the present time no way pouches are sent out on the Sunday boats and no town on the river except Bandon gets a Sunday service. Many kicks have already been registered because of this fact and now that the north of the bay towns have their Sunday service the others will no doubt get their wishes.

If You Can Buy a Liberty Bond and You don't, Don't Talk Patriotism.

County Agriculturist Smith joined the Ford brigade last week and is now experimenting with his new car. So far he has been fortunate and has not even marred a mud guard.

## HAS VALUABLE BOAT INVENTION

Among the men who have been sent out from this city to enlist in the regular army during the past month, J. D. Widgreen may prove to be the most valuable. Widgreen, who is of Swedish descent, applied to Postmaster Leneve for enlistment last week and received his transportation at the same time Keith Leslie got his ticket. In making his application, Widgreen told Mr. Leneve that he had an unsinkable boat which he wished to give to the government along with his personal services.

He did not give any of the particulars of the craft but stated that he had been working on it ever since the Spanish-American war and had but recently completed his model to his satisfaction. He said the boat could be shot through and through a dozen times and still float with a fair cargo. Widgreen did not state whether or not the craft can be built of a cargo size but it is thought that it will, if used, be better adapted to the submarine warfare than that of a cargo boat.

The ship Uncle Sam needs most is your partnership.

## SERVICE FOR FARM BOYS.

Members of Pig Clubs Are Junior "Soldiers of the Commissary."

The farm herd of swine offers a splendid opportunity for farm boys to help their country. Too young to enlist in the Army or Navy, too small to stand up under the hard work of a farm hand, they can help to win the war by taking over responsibility for lighter work, and so relieve men for the harder work. By taking charge of the hogs on the farms boys will be helping to solve the farm-labor problem. They will be helping to produce a very important food for the men in the Army and Navy.

Boys taking charge of the farm herd should join a pig club. Pig-club members have already proved their ability as hog raisers. They can extend their work. A member of the pig club receives valuable instructions from trained and experienced leaders. A pig-club member publicly enlists as a junior "soldier of the commissary." Fathers will have more faith in their boys if they are pig-club members, and will be readier to make them partners and put them in charge of the farm herd. A pig-club boy means business. He keeps records and shows just what it costs to produce a pound of pork. Records help to correct mistakes. They make raising hogs a business proposition.

A boy can do much with the farm herd. Very little work will be needed that he can not do. With such careful attention as a boy gives, the pigs thrive better. Sanitation is improved and the diseases lessened. The instructions to a pig-club member are valuable and practical and help to produce more profits. Boys wishing to join a pig club and take charge of the farm herd should see the county agent, or write to their State Colleges of Agriculture, or the United States Department of Agriculture.

## Preparedness Campaign

The Agricultural Preparedness Campaign, which is being waged all over the United States, was taken up by the Commercial Club last week and a partial organization effected. It was the result of the visits of J. Percy Wells, of O. A. C., who has the same line of organization in the towns that J. L. Smith has in the country districts, to perfect.

With so much more vacant land planted this year than ever before the next problem is the proper harvesting and caring for the crops that there may be no waste. Canning clubs, dryers for apples and other fruits and various other methods of preserving the crops to be raised were discussed by the committees which gathered in response to the Commercial Club invitation. From the J. G. W. club the committee consists of Mrs. J. S. Lawrence, Mrs. F. W. Jones and Mrs. M. O. Hawkins. From the Honorable Guard there is Misses Inez Bunch and Katherine Mulvihill and Mrs. G. E. Low. The Boy Scouts had present Gordon Hanscom, Fred Harlocker and Welman Bell; while the Commercial Club committee consists of J. L. Smith, F. B. Phillips, W. H. Lyons, C. A. Howard, J. E. Norton and H. A. Young.

Pending the selection of a chairman for this combination of committees, who will be expected to take charge of the Agricultural Defense program in Coquille, nothing further has been done by the committees.

Newman Moon, of the contracting firm of Moon & Gidley, was in town last week attending to the matter of getting their big steam cooker in shape for removal to Marshfield. This will take several days and in the meantime he is looking after other equipment here.

## TO ESTABLISH HOSPITAL HERE

Property Purchased and Alterations Will Be Begun This Week

## TO BE MODERN INSTITUTION

Competent Corps of Trained Nurses and all Modern Conveniences

Last week a deal was consummated whereby Dr. Hamilton and Nels Osmundson became joint owners of the Little building located on the corner of First and Hall streets. This is the first move toward the establishment by Dr. Hamilton of a complete and modern hospital in this city.

Speaking of the contemplated project yesterday Dr. Hamilton said: "Before leaving Coquille I realized the great need of a strictly modern hospital in this city and it was with this in view that I returned here. Steps were immediately taken to that end upon my arrival but it was not until last week that we were able to get together with the owners of the property and complete the deal. "Workmen will begin on alterations on the building probably tomorrow and it will be pushed ahead as rapidly as possible. As to the equipment of the establishment you may say that it will be strictly modern and up-to-date in every respect and that a competent corps of trained nurses will be always available."

The building will be completely overhauled and the entire interior remodeled to suit the needs of the hospital work and the doctor contemplates a fine lawn and flower garden as one of the adjuncts of the establishment. The establishment of the hospital here will mean that many hundreds of dollars will remain in this city that has formerly been sent to the bay cities. Dr. Hamilton stated that there would of course be no restrictions on the use of the hospital by other physicians of this city or of the county and that all who come will be served with the same regard for the profession.

## Police for Shirkers

Mayor Johnson has received the following from Adjutant George A. White at Portland:

You are advised that paragraph 16 of the Registration Regulations prescribed by the President, reads as follows:

"Police officers of any grade or class, of town, township, county or state, and all officers or agents of the Federal Government are required to render every assistance in the execution of this law. It is especially made the duty of such police officers to see that all male persons within the designated ages have registered and to report those who have not registered to the proper registration board for such action as may be necessary. Police officers may require any person subject to registration to exhibit his registration certificate."

I am directed by Governor Withycombe to request that you notify all concerned of their duties therein. Particular attention is invited to the duty of police officers to see that all male persons within the designated ages have registered, and to report those who have not registered to the proper registration board for such action as may be necessary.

Inasmuch as the registration in this state does not occur until June 5, 1917, the active duties of all police officers in this connection will not become effective until that date.

## United States Battleship New Jersey

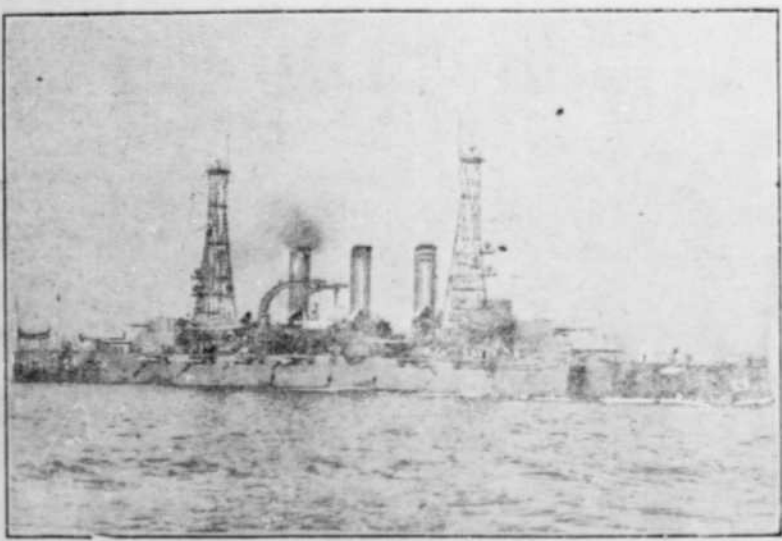

Photo by American Press Association. The New Jersey is of the "B" type of battleship and displaces 14,948 tons, being 441 feet long. In her main battery she carries four twelve-inch and eight eight-inch guns. Her complement is 812 officers and men.

## United States Battleship Rhode Island

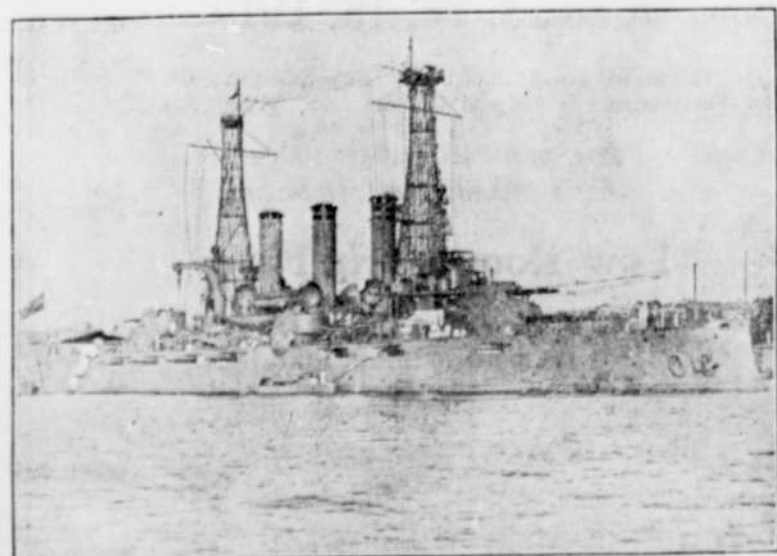

Photo by American Press Association. The Rhode Island is 441 feet long, with a displacement of 14,984 tons. She has four twelve-inch and eight eight-inch guns. Her keel was laid in 1902, and she has a crew of 812.
