SUBSCRIPTION RATES.

The national democratic committee hav-ing met in the city of Washington on the Zind day of February, 1858, has appointed Tuesday, the 6th day of June

Next, at noon, as the time, and chosen the city of St. Louis as the pace for ho ding the national democratic convention. Fach State is entitled to representation therein equal to double the number of its senators and representatives in the congress of the United States, and each territory and the district of Columbia shall have two dele-

can unite with us in an effort for pure, economical and constitutional govern-ment, are cordially invited to join us in ing delegates to the convention.
WILLIAM H. BARNUM,

FREDERICK O. PRINCE, Secretary Na-

The Democracy of the State of Oregon, in convention assembled, declares its fealty to the great organization of which it is a part, and a ks the respectful attention of the people of the State to this, its statement of national and local politics:

Resolved, That we heartily endorse President Cleveland, who, by his capability and fearless honesty, and fidelity to the trust reposed in him, has illu trated the principle that this is a government of, by and for the people, and pledged to guarantee equal rights to a l and give special privileges to none.

unqualifiedly inderse the policy of tariff revision, and a reduction of the surplus out of the earth. The very valuable revision, and a reduction of the surplus revenue to the needs of the government, economically adminstered, as set forth in the president's last annual message to congress. We believe that such a revision is dictated by sound policy, and that unnecessary texation is unjue t taxation and oppression, and that the public revenue should, as far as possible, be derived from taxes levied on the luxuries rather than upon the necessaries of life.

Resolved, That we demand the forfeiture of unearned land grants, and that the public domain be held as a sacred trust for homes for our rapidly increasing population; and we commend and approve the president's message in regard to Oregon wagon-road grants lately sent to congress.

"The experiment of making solar salt

THE TRADE IN SALT.

Why the United States Have to Import Se

"Not many people know that in spite of the wonderful salt wells and salt denocratic conservative citizens of posits in this country we annually imthe other day. "Our importations are constantly increasing, too, although the output of our own salt factories keeps pace with the growth of the population, and there is a considerable duty on all kinds of salt. The reason is that certain fine grades and special kinds of Resolved, That we approve the present faithful an efficient democratic state adis mined in Louisiane, is made by evaporating, by artificial heat, brine pumped

president's message in regard to Oregon wagon-road grants lately sent to congress.

Resolved, That proper public policy looking to the future security of the country requires that the government keep all its pledges to the soldiers of the Union in its various wars, and that the pension roll of the republic be jealously guarded as a roll of honor, without imposing upon the people burdens equal to the maintenance of a standing army, and exhausting the resources of the tax-payers, which may be needed for future defense.

Resolved, That as a free people, enjoying the blessings of liberty in a government of the people, we denounce the policy of the English government in its administration of Irish affairs, and that we extend, one healf of the democracy of the said and land reforms for the people of Ireland.

Resolved, That we endough the country but without much success. The quality of the sea water varies a good deal. It will deposit one kind of salt on one island and another perceptibly different, even to the eye, on another island perhaps not more than forty miles away. We do an immense trade with the West ladies in salt. There are a dozen places that furnish altogether different kinds of salt, and each has its particular use. One very fine and easily soluble variety is used in the flavoring of chewing tobacco. Not many chewers know that, but they would find out very quickly that something was lacking if the salt should be omitted. very quickly that something was lackstand.

Solved, That we endorse the salutary ing if the salt should be omitted. Some physicians have thought that the presence of the salt makes the tobacco very

Resolved. That we are in favor of the opening and improvement of the Columbia river and various ports of entry on the scaboard. so that the commerce of the country may be carried without interruption to the markets of the world; and for about twelve cents a bushel Gentlemen who own salt wells are demand of the grant and lumber mills in Michigan are usually quantity will work almost indefinitely.

led to the following conclusions: First, of the locks, accommodate the commerce of the country.

R solved, That this convention respectfully calls the attention of congress to the fact that by reason of the present condition of the bar at the mouth of the Columbia river it can be safely entered only by vessels the draught of which does not exceed twenty-two feet; that as the supply of auch vessels is very limited, and in fact unequal to the demand, they can only be chartered for foreign exports from the Columbia river at a rate fifteen shilling, a ton greater than the freight rate of vessels of four feet greater draught, as is evidenced by comparison of our charter San Francisco bay: that as the supply of such vessels is unequal to the annual supply of freight to be exported from 250,000 square miles of terr tory drained by the Columbia river and its tributaries, every year a large surplus of our products have

Resolved, That we, therefore, earnestry request congress to increase the amount of the proposed appropriation for the bar at the mouth of the Columbia river to \$500,000, and for the speedy passage of pending river and harbor bill, as so allowed as a several times." There it bore to the left and passed through Granby and South Hadley to the Connecticut river at Rock Ferry a half mile necticut River railroad, instead of going through Amherst and Hadley. ton. The exact distance from Boston to Northampton by the Central is 1034 miles. The survey of 1828 contemplated the building of a railroad, the

cars on which were to be propelled by horses.—Springfield (Mass.) Union.

A farm on which hog cholera has prevailed is worth less than one free take it. Fossibly plowing up all places in which hogs have run would remedy the soil, but it is difficult to do this around buildings and fences. Hogs well managed are among the most profitable of farm stock. They consume much refuse that would otherwise be wasted. Few farmers appreciate pigs until obliged to stop growing them.—American Cultivator.

-Fogg having said his friend was seriously injured by sea-bathing, and being asked how, replied: Drowned.
