THE LITTLE ONES.

The little own are pests, we sigh, And lots of trouble make us; Dre goiden morning opin her eye They from our slumbers wake us

Say oft ere half the night is o'er, They start us from our dreaming and we must rise and walk the 60 Until they come their acreaming

Perhaps our makness we deplore; Induige in wishing, maybe, W- had remained a bachelor While singing. "Sleep, my baby !

We wonder why we took a wife, While wrath within us nursed i And think of all the like of life A equalling babe the worst is.

But when grim death is bovering high (Far distant may that day bef) "Take all we own, O. Lord" we cry. "But spare to us the baby." —Boston Courier.

Thomas Benton and the Boy.

Many years ago a slim built youth was trudging through the streets of New York, bent under the weight of a dozen copies of Benton's "Thirty Years in Congress," bound together by a strap. Entering a small park he rested on a rustic seat. Presently a here man sountered along noticed large man sauntered along, noticed the boy and his load, sat down and

began to question him. "Why are you losing time?" he

"I can make it up on the home trip, when I shall have nothing to carry." "Why are you not provided with a handcart or barrow?"

bandcart or barrow?" "My employers provide none and I can't afford to buy one." "Do you read The Sun?" "At odd hours I do." "Look in the editorial column to-morrow and see what is said of your employers." The youth did so, and found a scathing article denouncing the firm for overloading its messengers and treating them like beasts of burden. But before the man had left the boy in the park he asked him to look at the portrait in the front part of the books portrait in the front part of the books and see if he recognized it. The boy complied, then hurriedly looked at his ohance acquaintance and said in aston ment:

"Why, it is you!" "You are right; I am Thomas H

The boy was James Eagan, now a wealthy liquor merchant of Chicago. —Chicago Times.

EXECUTIVE WORK.

What They Are Said to Signify Row It Is Divided Into Departments in the United States. leader of Charact

The great mass of work imposed The great justification of the double chin rests, of course, on its unrivaled value as an index of character—and upon the executive power of the covernment-embracing so many distinct value as an index of character—and such a character! It is really nature's patent of nobility. This was long ago discerned by the great master of phy-siognomy. It is not difficult to define what Lavater thought of a double chin. He carefully points out that man dif-fers from the animals chiefly by his chin laving it down as an axiom that subjects and requiring so many thousands of agents to perform-must be arranged and treated in an orderly and systematic manner. To expect the president to give it his close personal attention and directly superintend the doings of each agent would be absurd. chin, laying it down as an axiom that the chin is the distinctive character The magnitude and diversity of the work demand its separation into parts, istic of humanity; consequently, dou-ble chinned people are doubly dif-ferentiated, from the beasts that perish, which is greatly to their credit. He expressly takes for his model of "the and the general supervision or manage-ment of each part must be intrusted to

a separate officer. On this business basis and in accordance with the design of the constitu-tion congress has divided the work thinker, full of sagacity and penetra-tion," a man with a flash double chin. among seven executive departments, cach in charge of a general officer, or coupled with a nose rounded at the end. The portrait he gives is even better than the letter press, as the gen-tleman is limned with at least five chins, so that his lower jaw is a vista of magnificent distances, like Washhead of department, known respectively as the secretary of state, the secretary of the treasury, the secretary of war, the attorney general, the secretary of master general, the secretary of the navy and the secretary of the interior: and the work of each department is still further subdivided and distributed

This happy physiogonomy of the double chin, coupled with the round-ed nose, characterizes, he tells us, the among bureaus and divisions and mind which can rise to heights, and which follows its designs with reflect-ing firmness, unalloyed by obstinacy. Let, therefore, those with double chins minor offices, in charge of lesser heads or chiefs, designated as commissioners, superintendents, directors and by various other general or special titles. An executive department, then, properly means one of the grand divisions of government work boldly marked out or suggested by the express provisions of the constitution. These grand divisions readily ar-range themselves. The sovereign re-lations of the republic with foreign

takes an example of Raphael, with a beautifully rounded double chin, and ations of the republic with foreign powers, and its official intercourse with the governments of the states at home may be regarded as one distinct grand division; accordingly we have the department of state. The coinage, how is it it so strongly takes captive currency, revenue and general fiscal our sympathy? affairs suggest another great branch of Where lies the illusion? Merely in

work; hence we have the department of the treasury. The mention of armies suggests work that in time of trouble is likely to tax the energy of a separate division; thus we very ap propriately have a department of war. The prosecution of offenses against the United States, and other judicial matters wherein the interests of the matters wherein the interests of the republic are concerned constitute a general division, represented by the department of justice. The postal service, as one of the most intricate and important branches of government work, certainly forms another grand division; therefore we have the post-office department. Maritime protec-tion, like the military or land defense, forms a separate division; and thus we have the department of the navy. republic are concerned constitute a ces forever the science of physic

we have the department of the navy. and who is not. Portrait painters are The various matters of domestic concraven enough to dissimulate a double chin; they leave it to the caricaturist, cern not covered in these other departments but contemplated by the who seems to think it great fun for a popular statesman or poet to have to have two chins, whereas these ap-pendages are the secret of their sucnstitution, such as the census, public lands, patents and odds and ends, may be conveniently grouped into another general division; and thus we have cess. Some of our more observant the very miscellaneous, yet not mis-named, department of the interior. writers have got a glimpse of the truth, Mr. Wilkie Collins, for instance. To some of these executive depart He very properly credits Count Fosco,

Racing Dogs. Greyhounds are an investment so extremely speculative, especially when bought for public performances, that it would be rash to affirm that these does of great union without the necessary funds to carry them through. Then they put the bought for public performances is that these to carry them through the set of the month without the necessary funds to carry them through the set of the part is paid there are s are intrusted matters which, on the man of daru their face at least, do not strictly be-long to the grand flivision to which which Fosco's pet cockatoo calls pubthey have been assigned by law. For lic attention by rubbing his head instance, the weather bureau is a bu- against it in the most appreciative dogs of great price will in all cases acquit themselves in such a manner reau of the war department; the work manner possible. But your ordinary being intimately connected with the novelist would never have thought of being intimately connected with the peaceful interests of agriculture and commerce, it is very generally de-manded that it should be taken from military control and placed elsewhere. --St. Nicholas. **Raitroad Vandalism.** I read with some amusement re-cently a letter in The Pall Mall as to justify their new owners in paying for them prices quite high enough to purchase race horses of consider-able repute, and hunters rather better than most men of wisdom care to bethan most men of wisdom care to be-stride. For ordinary hare hunting purposes a very fair greyhound may be had for a £5 note, or even a good deal less. The prices lately realized, although high, are not unprecedented. Some years ago Mr. Clark gave nearly 800 guineas for four additions to his breeding kennel, and at different times cently a letter in The Pall Mall Gazette, headed "What We May Ex-pect," which took for its text a para-graph which announced that a rail-Thus he leaves it open to all parties, single chinned or double, to quote him as an instance of anything they like which, after all, is the great use which breeding kennel, and at different times the same dealer paid 200 guineas for Cataclysm, and 250, 200 and 120 guineas for Cymbal, Cripple and Charm respect-ively, while a sapling by Magnana out of Chameleon was sold for 105 guineas, and four of the same litter at way is to be run through the pass of Glencoe. The writer of the letter sar-castically declared that "Melrose Shakespeare has always been put to.-London Standard. Chinese Flogging. This punishment is as peculiar as most Chinese punishments are. The man is seized by four or five stalwart abbey, having being roofed over with slates and rendered somewhat presentable with a new coat of stucco, has guineas, and four of the same litter at an average of 40 guineas apiece. Peasant Boy, when he was looked upon as sure of the Waterloo cup brought 500 guineas, and again and again the owner of Master McGrath was offered 1,000 guineas for that most illustrious of all greyhounds.—Lon-don Standard. recently been converted into a young attendants, thrown on his face, his loose pyjamas rolled up so as to ex-pose the fleshy part of the back of his thighs. He is firmly held outstretched in this position by men at his head men's reading room and mechanics institute. The abbey is lighted by an installation of six Swan and Edison burners, so that there is no longer any in this position by men at his head and feet. Two operators then squat down opposite one another on each side of the victim. One takes a strip of seasoned bamboo about three feet long and one inch wide, and begins lightly spanking the backs of the thighs. He gives twenty of these ap-parently harmless spanks, and then hands the bamboo to his vis-a-vis, who f gives his twenty, and then hands it back; and so on, turn about, until the two hundred blows are administered. At first the punishment looks ridicu-lously light; but by the time the first fifty blows are reached the skin of the parts beaten begins to assume the appearance of thick wash leather; and before the hundredth blow the skin begins to fly off in loose white necessity to visit it by the pale moonlight." Still further, the writer announced that "Burns' cottage had been pulled down to make room for a beer house to be erected on the site." The old proyerb says that many a true word is spoken in jest, and I am sorry to see in the Scotch papers a paragraph referring to Burns' cottage at Ayr which goes far to confirm the pro-verb. The whole of the contents of the house and of "Alloway's auld haunted kirk" are advertised for sale at an upset price of $\pounds 1,200$; so that in the event of none of the innumerable admirers of the poet coming to the rescue, the various relics accumulated at Ayr will be scattered. The trencher from which he ate his kail, the chair in which he sat, the bowl from which skin begins to fly off in loose white out a secret that would ultimately flakes; by the time two hundred blows cause a revolution in the iron busihe "supped his parritch," the table at which he wrote-all are to be sold. ness, and that it was that silica would become a powerful helper in the manufacture of steel. I have taken some interest in the effort to establish have been struck, the whole of the back of both thighs looks like a We cold Southrons are sometimes acback of both thighs looks like a mass of swollen raw liver, though not a drop of blood flows from the parts. It is said that a man would expire under the excruciating torture of two hundred and fifty of these blows. I have never seen anything like the exquisite agony depicted in that man's livid, quivering features, when he was carried into the prison to recover.-Boston Commercial Bullecused of want of enthusiasm and poetic appreciation; but, on the whole, I venture to think we should not per-mit such a holocaust as this in the case of relics of our leading poets, simply and solely because their exhition did not pay expenses. I suppose in these hard times it is as well to be canny and careful; but surely there

TELL TALE DOUBLE CHINS. **Crue!** Separation.

come contaminated.

When a Chinese girl is married she

must wait four months before etiquette allows her to pay her first visit to her of a sailor who came to be married, but when asked if he would take the mother, but after this initiatory call, she may go to the home of her parents at any time. The Popular Science Monthly relates a pathetic instance connected with this marriage custom. A Chinese woman had one daugh ter, an only child, of whom she was passionately fond, and this girl was married at the age of 16. When the first four months were nearly past, her mother's neighbor died, and as death is said to bring uncleanliness to

those associated with it, the bride's visit to her old home had to be delayed for a hundred days, lest she should be Before this period had passed, the bride's mother-in-law died, and she

was obliged to go into mourning for three years. Just before she put off mourning, a son was born to her, and that made it necessary that the visit should be again delayed.

Meanwhile her mother, whose heart grew more and more hungry for her presence, beceme nervously ill, and subject to hallucinations, under which she imagined she saw her child entering her door. She declared that she could distinctly perceive her face, dis-cern every detail in her dress, and hear the jingle of her bangles. "O my child, you have come!" she would exclaim, but when she clasped

the vision, she found only empty air within her arms.

At length the daughter, who had all these years been but two miles away. really came to visit her mother. The two embraced each other and wept aloud, and thereafter the mother's hallucination ceased.

Pet Eels.

Not long ago there was a curious case at Rockport of the singular at-tachment sometimes instituted between

man and the lower animals. Mr. H— had been for some time accustomed to throw bits of food to some eels in a small brook that ran along the back of his lot of land.

One day he observed that the cels seemed to be waiting for his visit, and with a little coaxing after that they were induced to cat food directly from his hand. Then they learned to play and fondle about his fingers, held in the water, and seemed to enjoy his

More recently, the largest one of the four, a huge old fellow over two feet long, allowed Mr. H— to take him from the water and slide him about from hand to hand, apparently liking

the novel experience. When Mr. H— goes to the brook he calls these odd pets with a peculiar whistle, and they soon come rushing briskly from down stream. At one time he brought them the usual lunch. when only the large one came. The eel waited a few moments, then turned down stream, and soon came back, bringing his tardy family with him. —Youth's Companion.

Facts About Immigration

One-fifth of the immigration. One-fifth of the immigration to this port from Europe last year was from two countries which have only re-cently begun to contribute to our pop-ulation—Italy and Russia. The re-port from Castle Garden shows that out of \$83,030 immigrants for the year 43,683 were Italians and 32,937 were Russians. The immigration from these two countries was as high as that from Germany, and the immigration from two countries was as high as that from Germany, and the immigration from Italy alone was just about equal to that from Ireland. We are informed that very nearly the whole body of immigrants classified as "Russians" belonged to the Hebrew race, and that they find life here so much more de-sirable than they found it under the czar of Russia that they are encour-aging their brethren whom they left behind them to follow their example in coming to America.—New York Sun.

Material in a Steamer.

The amount of material necessary in the construction of a 1,200 ton steamer the construction of a 1,200 ton steamer is simply astonishing. It takes 40,000 lineal feet of timber, 25 tons for hog chains, and in all 50 tons of iron, 120 bales of oakum to calk the seams, and fully \$5,000 worth of paint. The cost of such a boat at the yards runs about \$60,000, to which an additional \$25,000 may be added for furnishing. It takes generally about five months to put up may be added for furnishing. It takes generally about five months to put up a 1,600 ton boat, and it should last ten years with ordinary care. When the hull of a boat is finished every nook and corner is filled with salt, about 100 barrels being used for a 1,200 ton boat. This is done to prevent the rotting of the timber, and, strangely enough, the cabins and upper works usually decay much sconer than the hull. -Globe-Democrat. Democrat.

Nitro-Glycerine for Disease. Nitro-glycerine bids fair, say the doctors, to become an important rem edy for diseases of the kidneys; and experiments are now making in cases of Bright's disease. Nitro-glycerine of a pure quality, possessing all the explo-sive powers of the substance, is pre-pared in alcohol (which removes the explosive quality) in the proportion of one part of the nitro-glycerine to ninety-nine of alcohol, and is then prepared with sugar or milk in tablets. Thus prepared, it is called "Trinitrin." —Philadelphia Times.

A New Ganpowder. At the Royal Powder factory of Wetteren, in Belgium, a new gunpow der is being made. They call it poudre-papier, or paper powder, and it is claimed that a charge of 24 grams (39 grains) gives, in a rifle of small cali-ber, an initial velocity of 660 yards to the ball. This is equal to, if it does not beat, the Lebel powder. The ad-ditional advantages are attributed to it of not smearing the barrel, or pro-ducing no smoke, and of causing little recoil. —Frank Leslio's Newspaper.

Shall We Dance? Dr. Alva H. Doby says that a typ-ically healthy woman can dance with impunity, just as she can ride a horse or play tennis, but, he adda, compara-tively few American women are typ-ically healthy. Moreover, a woman in a ball dress is almost invariably laced too tightly, and he never knew a woman who danced who did not dance too much - Annals of Hygiene.
