The best medical writers claim that the successful remedy for nasal catarrh must be non-irritating, easy of application, and one that will reach all the remote sores and ulcerated surfaces. The history of the efforts to treat catarrh during the past obliges us to admit that only one remedy has met these conditions, and that is Ely's Cream Balm. This pleasant remedy has mastered Catarrh as nothing else has ever done, and both physicians and patients freely concede this fact. The more distressing symptoms yield to it.

Irrigated vs. Un-Irrigated Fruit. San Francisco Chroeicle. It has, in fact, been conclusively den onstrated that fruit properly irrigated will yield larger crops than that which is not irrigated, while it will be equally fully as well. It is a remarkable fect, and one perhaps that will go far toward explaining the reason for the periodical attacks upon irrigation, that they invariably emanate from sections where there is no water available for irrigation, but in which strenuous efforts are being made to induce settlement. On the other hand, it is a fact that in many portions of the state where irrigation has not been practiced heretofore, efforts are now under way to secure some of its Andrews (Geo. Parkinson's sister) in benefits. Even when it is possible in Linn county last week. Capt. W. Rawling, of Iowa, came out recently and is visiting Welborn Beeson's family at Wagner creek.
