The story of her destruction is full of heroic acts by both the crew and the passengers, the lives of the women being the classic first consideration. The press dispatches report that Smith, Jr., was a strong swimmer and was among the few saved. He said: "During the panic I jumped overboard, swam about an hour and reached a rock. I tried to climb on it, but the waves were too strong. I afterward found a raft with a sail on it, and I held up the sail with one arm and floated on it. While on the raft I was washed right over the rock. Happily I had on a life belt and recovered the raft, which then struck another rock, to which I held fast for some time. Afterward I swam ashore, the land being only a short distance away from the rock to which I was clinging."

The dredging company has located and has control of 120 claims which covers all of the river supposed to be fit for operation.
