Senator S. C. Smith of Bakersfield has in preparation a bill which he is to present to the legislature at the next session, the object of which is to provide a simple and direct method of securing good roads throughout the state. It is a bill for the formation of good roads districts. It is prosposed that when the property-owners of any locality in a county desire to have constructed a modern road they may, by a two-thirds vote of the property-owners, form themselves into a good roads district. If the necessary two-thirds vote is secured it will then become the duty of the board of supervisors to declare the district formed. The supervisors will, by the terms of the bill, be empowered to set apart for that district certain portions of the general road fund and also a portion of the road fund of the district in which the good roads district is situated. The rest of the money necessary for the construction of the road may be raised by a direct tax on the property-owners of the district, or by bonds, as the property-owners may elect. The bill contemplates that before a good roads district may be formed the entire plan of work must be completed and the cost determined, that the voters can ballot intelligently. The plan is in successful operations in Indiana.

Henley, Cal., March 20, 1899.
We have used the Frue Vanner, Triumph and Wilfley concentrators. We are now using two of the Jacobs Concentrators in our mill at Henley. We consider the Jacobs Concentrator the best machine manufactured. It does the work cleaner and saves a much higher per centage of sulphurets than other machines, and we recommend it to all mining men to be the best concentrator on the market.
