PACIFIC STATES NEW SYSTEM

Telephone Company at Work on New
\$80,000 Plant for
Ashland.

[By Eugene A. Sherwin, local agent.]
The Pacific Telephone and Tele-
graph Company is installing a com-
plete underground conduit plant in
the business district of Ashland.

This plant when completed will
represent the highest type of subway
construction known as "Class A"
construction, and will provide facil-
ities for supplying the city of Ash-
land with first-class telephone ser-
vice for many years to come. A
rapid, steady growth and a wide de-
velopment of the natural beauties
and resources of this city are con-
fidently predicted by telephone offi-
cials, and the present improvements
in the systems are being provided in
anticipation of an ever-increasing
demand for telephone service.

The conduit now being laid, con-
sisting of 5000 feet of fibre duct and
and 2000 feet of iron duct, will have
an ultimate capacity of 2400 pairs
of wires along Main street, and an
ultimate capacity of 3600 pairs
along Oak street.

A large appropriation has also
been made to cover the rebuilding
of and extensions to the present
aerial plant, which is in connection
with the new switching board and
other central office equipment, short-
ly to be installed in the new office
building, will provide Ashland with
a telephone plant second to none in
this part of the country.

A superintendent from Portland
and an engineer from San Francisco
are in charge of the work.

Ashland Commercial College Notes.

Ellsworth Davis a graduate of last
year has accepted a position in the
White House grocery.

William Ritner is manager of the
Freser, Ritner Fuel Co., in which he
has an interest.

Prof. Lloyd Bridge, of Rochester,
N. Y., has been secured for principal
of the Commercial department.

Mr. Bridge is most highly endorsed
by E. E. Gaylord, ex-president of the
National Business Educators' associ-
ation, Prof. Zaner, Pres. of the Zane-
rian Pen Art School, S. L. Williams,
Pres. of the Rochester Business In-
stitute and others. Mr. Bridge has
taken two post graduate courses and
being an experienced business col-
lege teacher and an expert penman,
he will be a decided acquisition to
the commercial school fraternity on
the coast.

Mr. Bridge is an accomplished in-
structor in calisthenics, gymnastics
and athletics and the students of the
A. C. C. will have the opportunity to
secure training in these lines.

The management of the Ashland
Commercial College believes nothing
in the line of training for business
is so good for this "God's Country,"
and that his successful efforts to se-
cure the best will be appreciated.

Prof. Gaylord, of Beverly, Mass.,
who is a national leader in business
educational work, writes that he is
so enthused with representations
from the west in a lines of indus-
try that he is becoming dissatisfied
with condition on the eastern coast
and is thinking of migrating westward
and taking a hand here along with
the rest of us.

There will be quarterly meeting at
the Free Methodist church next Fri-
day, Saturday and Sunday. Rev.
John W. Sharpe, district elder, in
charge. Everybody invited.

Industrial Items.

An orchard in bearing order is
generally considered more profitable
than any other line of farming, but
when the income of those engaged in
raising garden truck, the question
arises which is the more profitable.
The prosperous appearance of the
truck farms of North Talent speaks
well for that business.

On the farm of J. E. Roberts, in
1907 from 15 acres in all kinds of
sold 500 sacks at one cent per pound,
brought in the same year \$1000. Mr
Roberts raised also a variety of vege-
tables, corn, beans, cabbage, mel-
ons, potatoes, onions and tomatoes.
In 1907 from 15 acres in all kinds of
vegetables were sold \$2500 worth of
truck, an average of \$166.67, per
acre. The average yield on the same
land for several years has been \$2,
000, or \$133 per acre. It should be
remembered that the garden yields
the same year it is planted, hence
one need not wait several years for
the first crop.

The experience of Sylvester Stev-
ens will show what a young man can
do in the garden business. Some
years ago Mr. Stevens bought ten
acres of land for \$200 per acre. It
was all purchased on time, not one
cent being paid at date of purchase.
In three years Mr. Stevens had en-
tirely paid for the ten acres, deriv-
ing his revenue from the truck raised
on the land. Since then he has
cleared \$2000 per year from his ten
acres.

An Important Irrigation Proposition.

Grant and Staples have purchased
the old E. K. Anderson ditch and
water right. This ditch was built in
the early '60's making the water right
and ditch one of the oldest in this
vicinity. It has been used contin-
uously for placer mining and irrigation
as well as domestic purposes and has
been of great service to the owner
as well as the people along the ditch
who have been blessed by the flow
of water therefrom.

The purchasers of this ditch will
proceed at once to improve it by
installing the best possible head-gate
flumes, etc., with a view towards con-
tinuing and increasing the services
for the gardeners and fruit growers
living along and under the line of
the ditch. It will probably be used
for mining some little part of the
year, but the principal service will
be that of irrigating the lands tribu-
tary, and it is believed that with
economical use and the proper appli-
cation of the water a considerable
area of heretofore non-producing land
near the city limits will be trans-
formed into productive gardens and
orchards. The ditch is a little over
nine miles long and several miles of
it skirts the westerly portion of the
city.

TO BRING KLAMATH RIVER WATER BY EMIGRANT CREEK

Well-Known Promoters Plan Esti-
mates for Enormous Irrigation
Enterprise

A new irrigation system for the
Rogue River Valley is being promot-
ed by Julius W. Perkins, former
owner of the Hillcrest orchard and
more recently the successful pro-
moter of Sutherland, a fruitful valley
near Roseburg. He has recently
disposed of his interests in Douglas
county and is turning his attention
to irrigating the Rogue valley. As-
sociated with him in the project is
Colonel J. F. Mundy of Medford.

It is proposed to bring the waters
of the Klamath River through Emi-
grant Gap above Ashland at an ele-
vation that will cover all sections of
the valley. The cost of the project
is estimated at from \$1,250,000 to
\$1,000,000.

"The project is not beyond the
formative stage," said Colonel
Mundy when approached on the sub-
ject. "No survey has been made and
I do not know whether the project is
feasible. The government contour
maps show that two long tunnels are
necessary, but until a survey has
been made nothing definite can be
stated. The money for such a pro-
ject can be secured, however, and if
a survey should demonstrate the
practicability of the proposition, an
announcement will follow of the
plans."—Medford Tribune.
