Card of Thanks.

We desire through the columns of this paper, to express our appreciation of the kindness and assistance rendered us by the people of the vicinity, during the sickness of our beloved Hulda H. Derby. Also the courtesy and kindness of the people of Lafayette in the burial of the same, and to extend our sincere thanks therefor. RELATIVES OF DECEASED.

The Oyster Supper.

The wood chopping bee and oyster supper gotten up by Fred Churchman and Henry Morris last Saturday night was a great success. Thirteen cords of wood were cut in the afternoon by the energetic Oregon boys, and those who did not chop wood paid for their tickets. At seven o'clock the Winslow & Nicholson restaurant which had been secured for the evening, was well filled with nearly sixty jolly boys and girls, all determined to have a good time. The evening was spent in grand marches and various games until 10 o'clock when supper was announced. Full justice was done to the excellent oyster soup cooked by Henry Austin. After supper another hour was spent in social conversation, games, etc., then bidding each other good night, all went home, feeling that it was a most enjoyable occasion.

Academy Notes.

John Judd, who has been here attending school, returned to his home in Clackamas county last Wednesday.

Percy Clark, one of our old students, made us a brief call Monday morning.

The Chemistry class finished their allotted work this week and will now take up the study of Geology. Several students who did not study Chemistry will take up Geology. The history class also has finished its work and will now take up physiology.

Prof. Griffith delivered a course of lectures on phenology in the Gymnasium Hall the fore part of the week.

Tad Hoover is on the sick list this week.

Quite a number of students attended the oyster supper, last Saturday evening, given by Messrs. Churchman and Morris, in Winslow & Nicholson's new building.

Let all remember that the social after Literary on Friday evening is open only to the students and those having invitation cards.

There is a movement among the boys to make some improvements in the Gymnasium Hall in the way of apparatus. The want of apparatus has long been felt and a few attempts have been made to remedy it but without success. Each and every one of the boys should lend a helping hand and thus when we leave school we will leave behind us something that we can look back to with pride, and something for which future students will feel grateful toward us.

WESTFOOT IN CALIFORNIA.

Los Angeles, Cal., Jan. 4, '89.

Ed. GRAPHIC, Dear Sir: We arrived at this city on the 2nd and have been seeing what we could. The old Spanish town of ten years ago has disappeared, only a few of the old "dobe" houses remain to mark the place. The business part of the city is well and compactly built and many substantial business blocks are in course of construction. The city has spread out for miles and contains a population of 70,000 or 80,000 people and from the immense business being transacted and apparent solid prosperity there is no doubt but that Los Angeles is destined to retain her place as the metropolis of South California. The city has been badly governed, the two or three hundred saloons largely control the elections, and municipal officers are often accused of corruption, but the better element which is no doubt in the majority will not submit to saloon dictation much longer. The county jail contains on an average, about two hundred persons, at least eighty per cent of whom have been committed for drunkenness or some crime committed while under control of liquor. Saloon keepers and constables both make money out of the poor foolish drinker, the one sells him liquor, gets his money and makes him drunk, then the officer gets \$2.45 for arresting him and putting him into the jail. The saloon keeper pays the city a license and the county tax payers foot the bills. If the city would close up all the saloons and drinking places the tax payer could afford to pay double the sum received for saloon license and then make money, to say nothing about the drunken wrecks left for the county to support. Perhaps Los Angeles is not worse than other large cities in this respect, but I must close this and go to Pasadena.

PASADENA, JAN. 5th.

This is the most beautiful city—if it can be called a city—we have ever seen. The Raymond Hotel with its 400 rooms stands on Raymond Hill like a sentinel guarding the homes of more than ten thousand people. Pasadena is not a city of commerce or trade. Merchants have comparatively little trade out side of the colony, which is perhaps eight or ten miles square. It is a city of residences and the wealth and culture of the civilized world is here represented. Perhaps no city on the continent can show so great a proportion of tasteful residences or such beautiful grounds, ornamented with rare and beautiful plants and flowers such as grow from the tropics to the arctic, also almost every variety of fruits, a wonderland of beauty that intoxicates the vision and creates a desire for investments that few are able to withstand, no difference what may have been their past prejudices. But there is another side to this picture. Very often we meet men here who one year ago were prosperous and supposed to be wealthy, wore good clothes and rode in fine buggies that to-day are willing to work for an honest living, many of whom are involved past redemption. Not all of these can find employment and the question of subsistence is a very serious problem. They have invested and the shrinkage in values has left them with property on their hands that will not sell for enough to pay off their obligations. These unfortunate men were not wild speculators but many of them conservative, careful business men and farmers from the States. But with all these things to contend with many fine and costly buildings are now going up and wealthy people from the east are coming, and Pasadena will always be a favorite place for the wealthy and refined, and grow more attractive every year. Will go to Whittier to-morrow.

WHITTIER, CAL., JAN. 7, '89.

Perhaps no new town in California has suffered less by the depression in the prices in property than Whittier, known all over the country as the Quaker colony. The location is very beautiful, on the gentle slope of the Whittier Hills, twelve miles from Los Angeles and fourteen miles from Pasadena, both of which can be plainly seen, also the ocean, Catalina Island and the mountains. The great fertile San Gabriel and Los Nietos valleys surround the town on two sides, while the hills furnish good pastures and are no doubt full of oil. The Quakers have a good church and a large number of members here. A very perfect system of water mains carry an abundance of pure mountain water to every house. Over \$17,000 cash is in the treasury ready to build a public school house, and as much more with ample grounds for a Friend's College, shows an appreciation for education. The town is only one and a half years old but contains many excellent buildings, and the people are energetic and enterprising. So far as we have seen Whittier we prefer it to any place we have visited in the State. We may however change our opinion when we have been here longer.
