A good sized whale rib was presented to the cabinet by Alf. Moore this week.
Mrs. Mary Edwards spoke to a large audience Sunday evening in the Academy.

Benjamin and Elizabeth Miles were present at the opening exercises, Tuesday morning.
Miss Roxie Heater made a short visit Tuesday.
Mable Edwards and Minnie Larson made a pleasant call Tuesday afternoon.
One day this week some of the girls procured hammers and nails and then proceeded to nail down the sidewalk that leads from the Academy to the stores.
That's right girls, practice habits of industry and you will be sure to succeed in life. You deserve praise and credit for this good deed you have done for it may be that you have saved the life of some person who might have fell and done great injury to the sidewalk.
Lillie V. Smith is absent from school this week.
Walter F. Edwards is on the sick list at present.
Anise Brown and Gertie Brandt made the home of the latter a flying visit last Monday.
The members of the classes in the Academic course who are going to school next term have been classified so that the necessary books can be ordered and thus avoid a delay at the beginning of next term on account of the books not having arrived.
Miss Tonnie Minthorn, an old student who now resides in Salem, made us a visit Tuesday.
On Monday the classes were dismissed a few minutes before twelve and all the students gathered in the assembly room where a fine treat awaited them in the way of a goodly lot of apples which Uncle Wm. Hobson had brought and presented to the students.
James A. Kersey presented the school with some Quills from an antelope killed by him in Hanson Co. Dakota and also some beaver tusks. STEIN.

Look Out for Him.
There is headed this way, from California, one of the most bare-faced swindlers of the age. He has in his overcoat pocket a few bunches of lampwicks, colored a light bluish tint, which he claims possess a chemical property that when placed in the coal oil lamp will cause a brilliant light and keep the oil from consuming. He claims that with one of the wicks placed in the lamp the oil will not burn out for six months. He is a smooth oily tongued talker and succeeds in disposing of a large number of the wicks at twenty cents apiece. He "could" sell no more than six in one house," according to instructions from the company manufacturing the wick-end swindle. At night, after the lamps are lighted, the anxious housewife watches in vain for the oil not to disappear in the lamp as of yore, but it is no use, it burns out just as fast as ever and no better light is given.—Capital Journal.
Concerning Chinese Pheasants.
Speaking about the proposed law protecting these birds the East Portland Vindicator this speaks out in meeting, voicing the sentiment of farmers generally: "The farmers of the state are unwilling to raise grain to fatten and multiply game for the Alpine club or any other high toned sportsmen. It required over thirty years time and millions of bushels of wheat to destroy the native grey ground squirrel of the country. The country people have no thanks to bestow on O. N. Dany of Corea for sending the leprosy, smallpox, pheasants and other luxuries of his adopted home to Oregon. The pheasant law should be repealed!"
Pen-ler Moller and Kristine Nielson, Dances of Carlota, filed their declaration of intention to become citizens with County Clerk Hobbs on Wednesday.—Reporter.
This lovely weather is a standing advertisement of Oregon's salubrious climate. The sun shows his warm and genial face every day, the mercury bobs up serenely in the temperate neighborhood and the hills are covered with the verdure of spring.—Lebanon Express.
Never before did we see anywhere so much wedding and plowing going on in the month of February as during this month all over Polk county. The fall sown grain all looks very fine and the farmers are making a liberal use of the barrow, in nearly all cases three and in some four horses being used. If the coming months are anything like reasonable, this county will have grand crops.—Itemizer.
To sit down and keep quiet, one would naturally suppose that Astoria was standing still; but just take a peep into the various corners of the city and new residences are going up and other improvements going on. There's no boom, but a steady and lasting growth.—Transcript.
