pended for a Long Time.

VITALITY OF ANIMALS. Under Certain Conditions It Can Be Sus-Familiar instances of suspended vital ity, or rather latent vitality, are afforded by seeds, which may be kept for buried several times deep with dead years without showing action, but are men and women and children, has been yet capable of being recalled to the ex- refuted by figures. But great is error ercise of the functions of life. Other in | and will prevail, unless the truth be stances are afforded by the lower organ | well and steadily upheld. The populaisms, which will remain dry and sterile for indefinite periods, to be brought into | 000. Suppose the human race to have full activity at any time by supplying existed for 6,000 years, and to have been the due degree of moisture and warmth. always as great as now. In 6,000 years Coming up to higher forms of life, the same phenomena are usually manifested in insects, one of the normal conditions mankind, or one hundred and eighty of whose life-the nympha or chrysalis state-is characterized by the exhibition of the external appearance of death. During this stage the vital processes are a huge estimate to every man, women tempered down till only enough are in and child a grave five feet by two, or effect to maintain a merely vegetative ten square feet. You want for your existence; yet the insect is capable of graveyard, then, 15,000,000,000 square slight motions when subjected to a shock feet of ground. A square or pressure. The duration of this ap- contains something less than 28,000,000 parent death varies according to the species and to external conditions. yard not 55 miles long by 10 wide for There are species that require two years your whole generation. Now multiply of incubation before going through their metamorphosis. Others pass to the perfect state in a few days. Butterflies demand a certain degree of heat, below which they will not issue. The opening words, a cemetery containing 100,000 of the chrysalis takes place naturally when these atmospheric conditions are realized. If the season is late, the The estimate which I have given you of hatching is also late. Hence we can prolong the duration of the chrysalis state indefinitely by properly adjust- of each grave is very large. A strictly ing the temperature, delaying to that extent the metamorphosis of the imprisoned mummy into the free and half. But enormous as it is, you could winged insect. Reaumur, by putting lay out your burial-ground for all mer chrysalides in an ice-box, was able to keep them alive and retard their development several years. Going higher up | California, or you could lay it out i the animal series-eggs, which are Texas large enough to accommodate the analogous to the seeds of plants, present a remarkable example of retarded life. One of the most interesting features about them is the independence of their vitality, which persists even when the individual that has produced them, and within whose organism they are still contained, has ceased to live. This fact has been recognized in pisciculture, where artificial fecun lation has been fish. The persistence of life in frogs is very long. Spallanzani preserved some frogs in a mass of snow for two years. They became dry, stiff, and almost friable, but a gradual heat brought them back to life. Toads have been shut up in blocks of plaster, and then, having been deprived of all air except what may penetrate through the material, and of all sources of food, resuscitated several years afterward. This question presents one of the most curious probms that biological science has been called on to explain. The longevity and vital resistance of toads are surprising. Besides the experiments we have cited. nature sometimes presents some already made, and vastly more astonishing. rocks. Such cases are rare, but it the side wall. Put a book against the would be as unreasonable to doubt wall outside your other shoulder, close them as to believe in some of the to it. Let some one hold a stick across miraculous explanations that have been is marvelous, it is true, but it is sup- when standing up in a crowded assemported by evidence that we are not able to contest; and skepticism, which is incompatible with sel nee, will have to disappear if rigorous observation shall and children is not one square foot and confirm it. The toad was observed, in a half. More than 18,000,000 personone case, in the stor itself, and before recovering from its long lethargy it had Now see how small a crowd after not made any motion. One of these toads all would be an assembly of all men was presented to an academy, with the out of all ages and kindreds and peo stone which had served it as a coffin or habitation, and it was ascertained that | Carry your arithmetic still further. You the cavity seemed to correspond exactly | laid out a cemetery for the 1,500,000,000 with the dimensions and form of the animal. It is remarkable that these toad- for them to dwell in. Average families stones are very hard and not at all porous, and show no signs of fissure. The mind, completely baffled in the presence Your cemetery gave five persons 50 of the fact, is equally embarrassed to square feet for graves. Their city lot is explain how the toad could live in its forty times as large. Your city must singular prison and how it became shut therefore be forty times as large as your up there. M. Charles Richet had occasion to study this question some months ago, and came to the conclusion that the school-going child the trouble of "do fact was real, observing that even if, in the actual condition of science, certain phenomena were still inexplicable, we were not warranted in denying their existence, for new discoveries might at any city so small in comparison with time furnish an explanation of them. 'The true may sometimes not be probable." But science takes accounting of the truth, not of the probability .-Translated for Popular Science Monthly from La Monde de la Science et de l'

HOTEL EXPERIENCES.

Queer Cases of Nightmare Developed in a Washington Hostelry.

"Among the many queer experiences gained in a hotel," said the clerk of an uptown hostelry, "are those connected with guests who are subject to night- W. C. Prime, L.L.D., in N. Y. Journal of mare, which is more common than many | Commerce. people suppose. It is not uncommon for a night in a large hotel to develop several cases of this kind. In the still groans or a shriek may be heard soundwakes up, rubs his eyes and awaits to see what is coming, and if he is a new one at the business half expects that a

murder is being committed. the night, began pounding on his door, yelling at the same time: 'Let me out! Let me out! Help! Help! 'The hallboy rushed down to the desk, and, with the night clerk and the porter, hurried back to the room whence came the sounds of distress. All was quiet. They waited awhile, then knocked. The subject of the nightmare came to the door feeling very much crestfallen. He explained that he had eaten a too liberal supply of deviled crabs during the previous evening and that he had dreamed that he was locked in one of the immense money vaults of the Treasury, which he had seen during his visit to the city. His own cries for help had usually greater when the social season study alone, and make the night lively very often."-Washington Post.

Of Course He Saw Him.

Two acquaintances meet on the sidewalk. "Why, helloa, Anderson." says Jackson, appearing to be much surprised, "we haven't seen each other for

"We have not seen each other." Anderson answers, "but you have doubtless seen me. "Why (again surprised), what do you

mean? "Nothing, only that five I let you have

some time ago." They haven't met again. NOT A VAST CEMETERY.

Than a Burial Ground. Again and again this old poetic fancy

of the earth as one great cemetery tion of the earth is now about 1,500,000,you have 60 centuries. In each century you may count three generations generations in all, each being a generation of 1,500,000,000. Now lay out : cemetery for one generation. It will b square feet. You want, then, a grave this by 180 and you have your burial ground for 6,000 years of mankind. Tha is, a strip of land 1,800 miles long by 5 miles wide will be ample. In other square miles would be sufficient for the entire human race to lie side by side continuous population is obviously enormously large. The estimate of the sixe correct estimate would reduce the size o the required cemetery more than one who have lived on earth, so that they could lie side by side, in Arizona or in

race of 6,000 years past, and also the race for 6,000 years yet to come, all sleeping in the soil of that one State of this Union. But some one says the race of man has been on carti-100,000 years. This is a pure imagination, and there is not, so far as I know E fact on which to rest it. But suppose it is true, and suppose the population always what it now is. You have provided successful with eggs taken from dead for 6,000 years of it. You want nearly 17 times as large a cemetery for the generations of a thousand centuries. That is, you want 1,700,000 square miles in it. Lay it out whenever you please 1,700 miles long by 1,000 wide. It is but a part of the United States. And so enormously large have been the rough estimates thus far used, it is safe to say that if the human race has been in existence 100,000 years, a separate grave could be provided for every individual of the race within a part of the United States east of the Mississippi river The fact is, my friend, need but a very small piece of the earth's surface to lie down in. And you occupy but a very small space while you Toads are said to have been found in to the wall, and your shoulder against live. Stand in a corner, with your back

in front of your body. So you will made of the matter. The phenomenon measure how much room you occupy ment of a generation of men, women can stand on a square mile of surface. ples, were they gathered together. of mankind now living. Build a city cemetery. Add 20 per cent. for good streets. I will not save you or your ing the figures." Impress the truth of your mind by three minutes' work with pencil and paper, that the whole living human race could be gathered in a what you have imagined. And now remember that all the estimates on which we have gone are too large. This city lot might as well be 20 by 50. live in flats without back yards, and in stories one above another. IN TRIPOLI'S STREETS.

The Variegated Human Panorama Visible in Every Thoroughfare. In the variegated crowd filling the tickets. streets scores of types may be distinguished: Arabs of the town, draped in their blankets like Romans in their togas, and in fact, the "jaram" is the direct descendant of the toga, and, judging from its looks, seems to have retained all the dirt of those intervening centuries; others, whose costume consists simply of a flowing robe, generally white, or, to be precise, which was once white! Sometimes this robe is of silk of vivid hue, and the effect of that gay note in a bit of street is like a poppy in a wheat field. Bedouins, whose limbs, wiry and strongly muscled, shine a superb bronze color through their seanty coverings, elbow Jews in ridiculous costumes, half native and half European. In a few moments one has met with an infinite variety of negroes, from the direct descendant of the toga, and, judginfinite variety of negroes, from the pure type, almost without nose and been seriously injured by heavy frosts. with enormous jaw bones and huge lips, to those whose lineaments are absolutely Caucasian. Porters, is simple tunies corded about the waist, carry heavy swinging bales on long poles resting on their shoulders, cheering their progress the while with an invocation to Allah and his innumerable prophets, chanted by an old man and repeated by the chorus; a true song of savages, bursting forth like a fanfare of trumpets. Veiled women, voluminously wrapped, pass by like ambling bundles of clothes, pass by like ambling bundles of clothes. Officers by scores, those of the new school, stiff but neat, trying to resemble their German confreres, since the fashion in Turkish circles is to imitate the lions of the day; the older officers kindly looking enough, but in what miserable costumes! MR. JOHN W. FURBUSH, An Army Veteran, OF WAKEFIELD,

of Wakefield,
who has probably suffered more than any
man or woman in America to-day. Taken
sick while in the Army, he has endured
untold agonies since. Describing his first
symptoms he said: "My head ached and
my appetite was poor. I felt a faintness at
the pit of the stomach, and bad taste in my
mouth, while my skin was sometimes hot
and sometimes cold. I next felt pains in
my back and around the lower portion of
my body, and noticed a peculiar odor and
color in the water I passed, which was
scanty at one time and free at others. Sometimes it pained me to void it, and again it
was atmost impossible to do so at all. Finally I began to pass clear blood accompanied with the greatest strain and agony."
No less than 20 eminent physicians attended Mr. Furbush at various times, but
not one of them could help him. He was
near death's door. And yet he says: "I am
alive and well to-day, wholly through the
wooderful power of Hunt's Remedy which
took me from the verge of the grave."
This Great Remedy absolutely cures all
Kidney, Liver and Urinary Diseases.
