PACIFIC COAST.

Light Catch of Salmon in the Columbia.

MARIN GETS THE COLLEGE

The Umatilla Indians Want the Pay for the Improvements on Their Lands Without Delay.

There are now 673 patients in the Oregon insane asylum.

Crop reports from Oregon and Washington are very favorable.

A rate war on the Sound between rival steamboat companies is about to be inaugurated.

It is rumored at Butte, Mont., that the Ansonia mines have been sold to the Rothschilds of Europe.

Fishermen in the Columbia river complain that instruments are placed in the water to destroy their nets.

R. S. Gardner, United States Inspector of Indian Agencies, has arrived at Colton, Cal., from the East, and will give the Mission Indians a thorough investigation.

The Tucson Citizen says: Parties are contemplating the erection of a first-class restaurant at the top of Santa Catalina, one of the loveliest spots in all Arizona.

Sacramento is endeavoring to get the northern Pacific Company to fill up a slough, and Mr. Huntington has been promised favorably to consider the proposition.

The salmon catch in the Columbia continues light, the average per boat being five.

The dealers in Portland cannot obtain enough to supply the market, and are paying 8 cents per pound.

The pomological division of the Agricultural Department is distributing exhibits throughout Southern California.

Charred citron trees, which proved citron is being imported to Florida, are being imported to Florida.

The Spokane City Council has decided to submit a bonding proposition. It is proposed to issue \$120,000 of bonds according to the pressing needs of the city. Of this sum half a million will be for the extension and improvement of the water system.

A steamboat mail service has been ordered established from Tacoma by Medford, Long Branch, Vaughn and Detroit to Allyn, Wash., six times a week by a schedule satisfactory to the Postoffice Department, not to exceed five hours running time each day.

The Umatilla Indians want the pay for the improvements on their lands without delay. They are very much agitated over the matter and some of their chiefs insist that unless they get their money before giving up their lands they will never hear of their money.

The Madera Flume and Trading Company offered the government \$4,475.00 settlement of claims against it for the legal cutting of timber. The government declined the offer, and a jury at Los Angeles awarded the plaintiff \$1,230.00, which is practically a defeat of the proposition.

Reports to the Spokane Chamber of Commerce from all parts of the grain belt of Washington indicate the greatest rain crop in the history of the country.

In some places all seedling wheat has been washed, and everywhere it is well along. Reports agree that the condition of wheat is more favorable than a month ago. Nothing but the most unusual conditions can prevent a great crop this season.

Severe storms are reported to have occurred recently in northern ports, especially at Metlakatla, Fort Simpson and Chatham. The storms have done considerable damage to the beach, carried inland for some distance and broken up. At Metlakatla five houses were totally destroyed by the force of the wind. Several houses were demolished on Queen Charlotte Islands, and the Lundberg fishing station was totally wrecked.

At the California Board of Agriculture meeting at Sacramento W. H. Murray elected superintendent of range culture and directed to fill at once all applications for range routes to the extent of \$1,000, the amount allowed to be expended in this manner in any one year.

The board favored the idea of establishing the proposed range culture experimental station in Capital park, provided the work shall be done by the State Gardner's workmen.

An archipelago was selected the site in Ma in county for the erection of the new college for the education of young men who desire to take the vows of priesthood. It is on a high bluff that overlooks a wide and deep creek, known as Corte Madera creek. The bluff commands a beautiful view of Larkspur, nestled at the foot of Mount Tamalpais to the west, and the northern part of San Francisco Bay with Oakland and Berkeley on its farther shore to the east.

The most complete collection of desert-inhabiting mammals ever secured has been obtained by the members of the Death Valley expedition, covering over 2,000 specimens, among which are many new species. In the collection of birds the range has been extended so far as some of them are concerned. In the botanical work a most complete collection of desert flora has been obtained, and the limits of vegetation have been determined. The entomologist reports that the Death Valley fauna is very rich in the mountains and canyons.

The most remarkable case in the annals of San Quentin history is the case of one Slocum. John Slocum was on February 2, 1887, convicted of burglary in the first degree and sentenced to San Quentin for fifteen years, and on July 16, 1888, he made his escape from prison. In February of this year he was arrested and returned to the prison. When landed in San Quentin he denied that he was Slocum, claiming that his name is William Allen, despite the fact that he has been identified by many of the prison officials as Slocum. The other day, when he was brought before the justice, he said that he was not Slocum, but William Allen, and that at the time of the escape of Slocum he was doing time in the State prison in Kansas.

General Schofield Well Pleased With the Progress Made in Enlisting Indians.

The Secretary of Agriculture is sending out quantities of German and French beet-sugar seed to various portions in Oregon as requested by Representative Hermann to supply persons having solicited seeds for experimental purposes in Oregon.

Assistant-Secretary Chandler directed the Commissioner of the general land office to make a thorough examination of the lists of land withdrawn for irrigation reservoirs in California, Colorado, Idaho, Nevada, Utah and New Mexico, with a view of making these withdrawals absolute.

The Department of the Interior declines in the case of the Agricultural College of Oregon that, while music and calisthenics form a proper part of the curriculum of an agricultural college, the expenditure for them cannot be obtained from the appropriation provided by the act of Congress approved August 30, 1890.

There is good authority for saying the United States has not had any negotiations with France respecting the Mole St. Nicholas. The squadron of evolution was not sent to Port-au-Prince with the intention of creating a naval demonstration for an effort to obtain the Mole St. Nicholas by purchase or otherwise, but these efforts, it is learned, resulted unsuccessfully.

It is said that the Secretary of the Navy contemplates seriously making a trip to the Coast this summer, and that he will do so about the time he directs his attention to applying civil service to the Mole St. Nicholas.

An effort was made by representatives of the government to secure Mole St. Nicholas by purchase or otherwise, but these efforts, it is learned, resulted unsuccessfully.

The Secretary of the Navy has an extensive mail from the Pacific Coast from those who desire to be entered for examination for work in the Mare Island navy yards. All such letters are sent to Commandant Benham at Mare Island. He is instructed by the Secretary to keep a list of all applications in the various departments, and when the civil service is organized for the Mare Island yards all applicants will be given due notice.

General Schofield is well pleased with the progress made in enlisting Indians in the army. He says: "If we can get two well drilled and contented troops of Indians, we shall be doing all expected at this time. These will be the cause of many more Indians enlisting, and I think I can see the day when there will be no more difficulty in getting good soldiers from the Indian reservations than there is to-day in enlisting white men."

The superintendent of the Porter census bureau has issued a bulletin on the subject of floriculture in the United States. There is a total of 4,469 establishments and 312 commercial floriculture establishments are established and managed by women. The 4,469 establishments had in the census year 38,823,247 square feet of glass, covering a space of more than 80 acres of ground. The establishments, including fixtures and heating apparatus, are valued at \$38,356,000; tools and implements, \$1,588,000; and gave employment to 16,847 men and 1,068 women who earned in the year \$8,484,000. The products for the year reached a total value of \$12,036,000 for plants. Cut flowers brought an additional income of \$14,175,000.

The Acting Secretary of the Interior has issued a bulletin on the subject of floriculture in the United States.
