The general store of R. P. Bird, at La Fayette, was robbed last Monday night of over \$200. Owing to the Australian ballot law which was passed at our last legislature which says that no voting precinct shall contain more than 250 votes, it devolves on the county court to divide our precinct in order to conform to the law. It has been suggested that the Portland road be made the dividing line and it is likely that this will be done, naming the precincts North and South Newberg respectively. There never has been enough business in our Justice court to pay a man to take the office and when the business is divided between two the picking will be closer still.

A petition numerously signed was sent to the county court this week asking for the appointment of Paul Macy, for road supervisor for this district. The county court is acting very wisely in urging the use of gravel wherever it can be had, and we hope the man who may be appointed supervisor in this district will make a thorough investigation and determine whether or not there is gravel within reach of Newberg at any other point except on the island. To make our roads good, gravel is a necessity, and the nearer town it can be found the more will it be used.

The Saloon Goes.

Many of our home readers are aware that the saloon men, Bentley and Franklin have departed from our coasts, but for the benefit of others and for the credit of the Newberg, we publish their departure, they having gone two or three weeks ago. We understand they say they lost about \$300 during the time they were here, and by the time they pay another hundred for attorneys' fees in the case that will come up against them at the next term of court, they will be still more confirmed in the opinion that they set up business in the wrong town. Whenever men undertake to over ride public opinion by setting up a grog shop on the outside of a town where a license is refused them, they may be able to run for a short season, but in the majority of cases, although the judge may be inclined to rule in their favor regardless of law and some of the baser element in the surrounding country may be found who will go on their bonds, it makes a very hard road, even for unprincipled men to travel, and as has been proven in this case, their departure will only be a little question of time. We predicted at the start that these men would find that they had gotten into a very tropical climate for their business, but nothing short of the experience at a cost of three to five hundred dollars would satisfy them. Be it said to the credit of Newberg that but a very small part of the meager patronage they received while slinging gin on our borders came from the town, and had it not been for some encouragement they received from the surrounding country, they would have departed much earlier in the fight. We hope the experience of Bentley and Franklin will prove to be a sufficient warning to others of their kind, but we desire to discourage the thought that the time has now come when we may with safety fold our hands and conclude that we are safe from the intruder. Those who are base enough to engage in the whiskey business are always on the alert and it never pays to be caught napping. It is when the people think they are safe that the enemy appears. Let us be on our guard in the future and be ready to meet the intruder on his first appearance.
