Mother's meeting will be held at the home of Mary Ann Hobson Saturday, June 25th at 3 o'clock. Subject to be discussed, "Mothers in the Home," to be presented by Jane Votaw. All mothers are invited to attend and take part in this much needed work. Lucy S. Haworth.

The popularity of the sugar pine door is shown at the Depot Lumber Yard where W. P. Heacock informs us he sells five of them to one cedar. They are certainly the best, strongest, least likely to get bruised up, and doors for the company he represents are warranted not to be affected by the weather more than cedar.

For twenty-five cents you can insure yourself and family against any bad results from attack of bowel complaint during the summer. One or two doses of Chamberlain's Colic, Cholera and Diarrhoea Remedy will cure any ordinary case. It never fails and is pleasant and safe to take. No family can afford to be without it. For sale at 25 and 50 cents per bottle by C. F. Moore & Co.

Saturday, June 25th will be the regular meeting of the Chehalis Valley Horticultural society. A full attendance is desired as it is the time for election of officers. We also want to make arrangements for a meeting in July, when Mr. Carson is expected to be with us. Members and others interested please turn out and let's revive the interest that has been somewhat lagging for a while.

E. C. ARMSTRONG.

Mr. C. H. Shawan, Wellsville, Kan., says: "It is with pleasure that I speak of the good Chamberlain's Colic, Cholera and Diarrhoea Remedy has done my family during the last fourteen years. In the most obstinate cases of summer complaint and diarrhea among my children, it acted as a charm, making it never necessary to call in a physician. I can truthfully say that in my judgment, based on years of experience, there is not a medicine in the market that is its equal. For sale by C. F. Moore & Co., druggists."

E. C. Armstrong president of the horticultural society, had a letter from A. H. Carson, the most prominent fruit grower of southern Oregon, who is located near Grants Pass, stating that he could arrange to speak here about the 10th of next month as he will be on his way to the horticultural meeting at Hood river about that time. Mr. Carson was invited to address the people here some time ago; but could not do so at that time. He is a practical fruit grower and will interest any one who is interested in practical horticulture. We hope arrangements may be made to have him stop off here.

Just at this time when there is a great deal of talk and speculation going on, regarding graveling our streets and roads, an article in this issue on "Making Gravel Roads" will be found specially interesting to our readers.

Mr. Ong had a serious runaway on Tuesday. While coming down the mountain from Mitchell & Clark's mill with a heavy load of lumber, the wagon struck a stump and one of the horses surged forward and slipped the neck yoke from the end of the tongue. The road was slippery from a shower of rain, and Mr. Ong soon seen it was useless to stay with the wagon so he jumped off and let the team go. The horses fairly flew down the mountain and strangle to say came out with only a few slight scratches. The wagon was not badly broken.

**The Pressed Brick Works a Certainty.**  
Mr. Wetherell, who went to Chicago two weeks ago with clay to have tested at the pressed brick machine factory, reports that the tests made, have been highly satisfactory. Jesse Edwards received a telegram from him Wednesday evening, calling him to Chicago immediately, and he left on the train yesterday for that city, to assist in buying the outfit for the works. Before leaving he hired several hands to put to work at once clearing the grounds for the reception of the machinery. The outfit will be shipped about the fourth of July and the intention of the company is to push the enterprise as fast as a large force of hands can hurry it along to completion. The foreman of the works at Chicago will come out and have the oversight of putting in the machinery and will give the necessary instructions for harvesting the clay. The Chicago company will also furnish an expert in the business, to take the place of foreman of the works, all of which goes to show that there is to be no money thrown away on experiments as is often the case in the beginning of such enterprises. Mr. Edwards hopes to be back in ten days or two weeks.

**Struck It Rich.**  
Monroe Ramsey made the best discovery of fossil remains a few days ago, that has ever been brought to light in this region of country. Eight or ten years ago he accidentally found an immense tooth weighing nearly fourteen pounds, along the banks of Chehalis creek, below the grist mill. Since the discovery of late concerning fossil remains along our streams, he concluded to prospect for the rest of the skeleton and his labors have not been in vain. By excavating he found a large tusk, several very large teeth and some bones, which, judging from the different sizes, must have belonged to two different animals of the same species. From the shape of the teeth and the way they are worn they must have belonged to the elephant or mammoth family. They are in a good state of preservation, one tooth still remaining in a portion of the jaw bone. Mr. Ramsey has placed them in the window at Myers barber shop, where they may be seen. It was rather amusing to hear a lad of eight or ten summers, remark while looking at the bones on Wednesday morning that, "They say uncle Dave Ramsey said that animal several years ago with a bow and arrow down there on the creek?" We knew uncle Dave was here a long time ago, but hardly think he ever claimed to have been on the ground so far back as that.

**The General Meeting.**  
The general meeting announced last week was held at the fair grounds as arranged for and was very successful and highly satisfactory in every way. The meetings opened on Thursday afternoon at 2 o'clock and two sessions were held each day and one at night until Sunday night when the closing session was held.

Rev. Thomas Armstrong, pastor of Friends church at Whittier, California, arrived on Friday and was one of the principal speakers during the meetings. The other speakers were Rev. J. H. Douglas, Dr. Jessup and Pres. Newlin. On Saturday afternoon a business session was held for the purpose of making preliminary arrangements for the opening of the Yearly Meeting next year. Jesse Edwards was elected chairman of the meeting and Pres. Newlin and Mrs. Minthorn secretaries. The time for opening the meeting next year was finally fixed as the date. The chairman and secretaries were directed to arrange the program for the work to be done during the meeting.

On Saturday a large number arrived from Salem and several from Marion, Dayton, Dundee, Middleton and Portland. Two ladies came from eastern Washington a distance of three hundred miles. On Sunday the large pavilion was filled to overflowing, there being eight or nine hundred people in attendance. Rev. Armstrong preached at the morning services, Pres. Newlin in the afternoon and Dr. Jessup and Rev. Douglas at night. A full and free salvation was preached on all these occasions and every sermon was well received by the large audiences present. The meetings were a great blessing to the large membership of Friends church and they were apparently enjoyed by all who attended.

**Teacher's Institute.**  
McMINNVILLE, June 20.—Teacher's Institute opened today at 1:30 p. m. in the school building, with sixteen teachers present. Superintendent L. H. Baker made some interesting remarks, showing the progress of institute work since about 1878. Prof. Dawes, instructor in Physiology and Hygiene, and Mental Arithmetic, assigned a lesson for Tuesday morning. Prof. Gitz arriving at 3 o'clock, showed work on form and color for primary grades, which he will give instruction in during institute. Have just organized today and are ready for good work tomorrow.

On Tuesday morning Institute was called to order by superintendent Baker at 9 o'clock a. m. After singing "Showers of Blessing," Prof. Dawes conducted a recitation in mental arithmetic. Prof. Dawes' method of teaching mental, we believe an excellent one, thus very beneficial. We find program for institute is as follows:

8:45 a. m. to 9 a. m.—Opening Exercises.  
9:00 to 9:45—Mental Arithmetic.  
9:45 to 10:30—Language.  
10:30 to 10:45—Recall.  
10:45 to 11:25—History.  
11:25 to 12:00—Written Arithmetic.  
1:00 p. m. to 1:45 p. m.—Geography.  
1:45 to 2:30—Form and Color.  
2:30 to 2:45—Recall.  
2:45 to 3:25—Physiology and Hygiene.  
3:25 to 4:00—General Discussion.

Prof. Gitz takes charge of language lessons in primary grades. Prof. Gitz is a teacher of long experience and knows just how to present the subject of language to the primary class. His work this morning was very interesting as well as instructive. Prof. Dawes conducts a recitation in history. Subject "Early Discoveries." Many important points were noticed, such as, discoveries, by whom, places founded, etc. Subject of written arithmetic by superintendent Baker. He does not believe in omitting small things. We were drilled in addition, but none could add well; we expect to improve. Geography by Prof. Gitz was very interesting. He handles the subject of primary work up to the study of geography proper, very well. He continues with the subject of form and color, in which all were interested. Prof. Gitz is a good instructor. Physiology by Prof. Dawes, one of the best instructors in this branch, gave many interesting points of value.

Number of teachers now enrolled 28 and we are going to have a successful institute.

ANON.

**CORDOLIVER ITEMS.**  
Mr. Wm. Hunter has purchased the farm formerly owned by Mr. Phelps. If changes occur the citizens will always rejoice in having as substantial new owners as Mr. and Mrs. Hunter. Mrs. Melain and son have also come to the neighborhood and are looking about for a location.

There is a new supply of vehicles and no longer is the grass growing in the wagon tracks.

The school so successfully taught by Fred Rogers, held the closing exercises in French's grove adjoining the school building, on last Friday. The grounds were cleared from all debris, a platform built with a canopy of fir boughs. This was decorated with mosses and flowers. On the evergreen that banked the platform was the word welcome in white roses, and roses everywhere made a pretty contrast to the dark green of the firs that over shadowed.

There were seats for all, and tables spread where the friends and patrons spread a bountiful lunch at 12 o'clock and all partook with a hearty relish. We cannot give you the minute detail of the program as it occupied the greater portion of the day.

There was music by the pupils, recitations and dialogues by all. Those who especially deserve mention for correct rendition of their selection are Carrie Bryan, Ray Carter, Nellie Burrows, Anna Carter, Frank Duncan, Alden Chamberlain, Richard Rhodes, Helen Chamberlain, Arthur Kirk, Lizzie Kirk, Minnie Wheeler, Millie Wills, Cora Coles, Mary Johnson, Clara Johnson, Claude and Ruby Stater and Bertha Rogers. Many of the others did themselves credit. El. Kogler amused the audience by rendering several character pieces. Mr. Rogers the teacher recited "The Ensign Bearer," very effectively. A Matrimonial Advertisement by teacher and pupils was very laughable.

Last but not least was the presenting of diplomas to twelve pupils whose average was above 90 per cent.

At the close of the program the directors, Messrs. Stater, Wheeler, and Paul

sen were called upon and made interesting remarks. Mr. Kirk was called out and gave the school a fine compliment in his speech. Mrs. Harford was also invited to address them and did so.

The photograph was then taken of the grounds and people, and the day ended.

Secretary Sargent has the arrangements for the July meeting of the Oregon State Horticultural Society pretty well completed. The Union Pacific has made the liberal offer of one fare for the round trip between Portland and Hood River, with the privilege of returning by boat from the Cascades to Portland. There is every reason to expect a very large attendance at this meeting.

One of the most novel and instructive exhibits at the Columbian Exposition will be made by Agricultural Colleges and Experiment Stations of the United States. This exhibit will occupy a floor space of 8,000 square feet. It will represent the work of a model agricultural experiment station, covering the field of experiment and research in crops, botany, horticulture, entomology, feeding stuffs, animal nutrition, dairy solids, milk testing and veterinary science, and will include an elaborate and complete botanical, biological and chemical laboratory.

The progress of civilization tends to produce specialists in almost every avocation. It is evident that the development of the fruit industry of this section requires the services of a class of specialists who will make it their business, know the best methods of dealing with fruit pests and cleansing orchards. Even now there is a demand for work of this kind and Secretary Sargent, of the State Horticultural Society, finds constant call for his services in doing work of this kind in the immediate vicinity of Portland.—*Natural Naturalist.*
