A Greek Professor.

According to Professor Sophocles, late of Harvard university, little things were kept small and great things large. What was the true reading in a passage of Aristophanes, what the usage of a certain word in Byzantine Greek—these were matters on which a man might well reflect and labor, but of what consequence was it if the breakfast was slight or the coat worn?

A single room, in which a light was seldom seen, sufficed him during his forty years of life in the college yard. It was totally bare of comforts. It contained no carpet, no stuffed furniture, no bookcase. The college library furnished the volumes he was at any time using, and these lay along the floor, beside his dictionary, his shoes, and the box that contained the Greek text.

A single bare table held the book he had just laid down, together with a Greek newspaper, a silver watch, a cravat, a paper package or two and some scraps of bread. His simple meals were prepared by himself over a small open stove, which served at once for heat and cookery.

The incongruity between his bitter speech and his kind heart endeared both to those who knew him. He was never weary in well doing. Like his venerable cloak, his grotesque language often hid a bounty underneath. His room was bare; but in his native town an aqueduct was built, his importunate and ungrateful relatives were pensioned; the monks of Mount Sinai were protected against want, and the children of those who had befriended his early years in America were watched over with a father's love.—Professor Palmer in Atlantic Monthly.

Religious Dogs.

The famous St. Bernard dogs are very carefully trained. A traveler who visited some of the monasteries of the monks of St. Bernard a few years ago found the monks teaching their dogs from the earliest stages of puppyhood. Not only is physical and mental training included in the teaching, but spiritual culture is by no means neglected. At meal time the dogs sit in a row, each with a tin dish before him containing his repast. Grace is said by one of the monks; the dogs sit motionless with bowed heads. Not one strays until the "Amen" is spoken. If a frisky puppy partakes of his meal before grace is over, the older dog growls and gently tugs his ear.—New York Ledger.

Jay Gould Interviewed.

Mr. Gould had been making an effort to attach his boats. He sent them somewhere out of the state. I went to ask him about it.

"Tell me all about it," said he.

"I did, like a little man."

"Well, well, well," said he. "Now, that's great news. What the Jesse Hoyt missing—and the little American? Why, I know those boats very well, sir, and I have ridden in them so often that I have grown very fond of them, especially the Jesse Hoyt. This is great news. If you hear any more about it come and tell me."—Julian Ralph in Chatter.

The Rainbow and the Bag of Money.

One day, while picking cotton, Ellen Powell, a negro woman at Toombsboro, Ga., lost a bag containing \$5 in silver. Several months later, after a thunder cloud had just passed, she was at work in the same field knocking down cotton stalks. Seeing a beautiful rainbow across the field, and thinking at the same time of the lost money, her employer told Ellen to go to the end of it and she would find her money. She took him at his word, and just in front of her, about 100 yards or more, where the end of the rainbow appeared to be, she looked on the ground and found her money.—Chicago Herald.

PACIFIC COAST.

Saint Teresa Urrea Exercising

Her Healing Power.

CALIFORNIA GRAIN CROP.

Cold Weather in Arizona—The

Adams Makes Seizures in

Behring Sea.

Arizona has a boom in building stone.

Grain is looking well all over California.

The weather last week in Arizona was the coldest for fifteen years.

An organized band of cattle thieves has been discovered in Southern Arizona.

See, the Tonto Basin (A. T.) wife murderer, has made his escape into Mexico.

Arizona's new gold diggings at Treasure Gulch are attracting large numbers of prospectors.

The bodies of two horse thieves have been found hanging to a tree near Calabasas, north of Nogales.

The papers are ready at Phoenix, A. T., for the transfer of the Big Bonanza mine to a Boston syndicate for \$900,000.

The streams in and about Elko and Battle Mountain, Nev., have been furnished with 50,000 Vermont brook trout.

A Chinese interpreter, Ah Tie, has been arrested at Sacramento and charged with forging City Attorney Hart's name.

There is no improvement in the salmon outlook. Packers are generally inclined to take a gloomy view of the situation.

It has been discovered that more than half the prisoners in the Idaho penitentiary are insane to a greater or less extent.

The planting of lobster eggs in Monterey Bay has proved to be successful.

The young lobsters are making their appearance.

An application for a receiver for the Phoenix (A. T.) Electric Light Company has been denied by Chief Justice Gooding of Arizona.

Kid, the Apache, has incurred the enmity of his race, and there is a chance that the United States government will capture the outlaw.

Last winter's blow has proven a blessing to the orange groves in Southern California. They are much cleaner and brighter than before.

The Adams has seized the steamer Jennie and the schooner Lottie and Kodak for killing otter in Behring Sea.

The vessels were sent to Sitka.

Feeble and diseased Mexicans are calling on Saint Teresa Urrea at Nogales, and asking to have been greatly relieved.

Twelve Washoe and Pinte Indians left Carson the other night for San Francisco to take part in Carver's border drama.

They were gorgeously painted before their departure.

The Governor of California wants more facts in regard to the complaints of business being clogged for the want of extra deputies, and has asked the Boards of Supervisors for them.

The wife of Mr. Hanley, formerly a member of the Nevada legislature and well known all over the coast, killed herself at Salt Lake by taking poison.

Insanity was the cause.

The Supreme Court of Oregon in a case involving the Southern Pacific has decided that the State Board of Equalization cannot change individual assessments of classifications of property.

John Thomas, once a wealthy farmer of Ada county, Idaho, has informed the Assessor that he should heretofore refuse to pay taxes on his ranch. Every winter for the past four or five years Boise river has played great pranks with Mr. Thomas' land, and now he has but twenty acres left from a whole half section.

Evidence has been discovered at Sacramento in a Chinese highlander case of the way in which the Chinese are bled at the hands of go-betweens employed in criminal cases. Letters demanding sums of money were found, and one of them purported to come from City Attorney Hart, but was not written by him.

Surveyor-General Byars has been notified that the Commissioner of the general land office has made an appropriation of \$4,700 out of the reserve fund for surveying the land in Oregon.

The original \$20,000 has all been expended, and contracts are being entered into for using up the extra appropriation.

Tempe, A. T., is much exercised over the mysterious murder of Ed Radcliffe, whose body was found on the floor of a dancing hall. The coroner's jury said that Radcliffe's death was from natural causes, and the body was buried, but the citizens were suspicious. They had the body exhumed and an examination showed Radcliffe had received wounds in the head, which had produced death.

At Portland the suit of James Fisk vs. D. V. B. Henarie of San Francisco, to recover \$60,000 as commission on the alleged sale of The Dalles military wagon grant of 60,000 acres, was dismissed in the State Court the other day.

Fisk receiving \$5,000 and the parties paying their own costs. The case has been in the courts for several years, and has gone through the State, Circuit and Supreme Courts, the Federal Circuit and United States Supreme Court, which reversed the Federal Courts and sent the case back to the State Court. The settlement is virtually an abandonment of the case, as the amount received by Fisk does not cover his expenses.

Giovanni Abbesti and Paolo Visconti have been arrested at San Francisco on a charge of counterfeiting, and warrants are out for the arrest of two Americans and three more Italians on the same charge. Secret Service Agent Harris claims that the land has been at work for the past twelve months and has manufactured a great amount of counterfeit money, nearly all of which has been distributed by means of various Italian colonies throughout California, Oregon, Washington and British Columbia and as far south as New Orleans.

San Francisco alone over \$15,000 in counterfeit \$1 and \$5 bills and lottery tickets are known to have been issued, besides a large amount of coin, and it is estimated that the operations of the band reached nearly \$100,000.

EDUCATIONAL.

Wonderful Progress Made of Late Years in This Country in Teaching the Dumb to Speak.

Dickinson College last week graduated a class of twenty students.

Switzerland depends on education a sum one-third larger than it spends upon its army.

Edinburgh University is one of the chief medical centers in the world. It was founded in 1582.

The prescribed course of medical instruction in the Mexican National University is seven years.

As now constituted, the Chicago Board of Education contains two ladies—Mrs. Flower and Miss Burt.

The elementary school statistics of Hungary are thus reported: In 1892 1,015,612 children attended school, while in 1889 only 1,152,115.

The oldest and largest medical school in America is that of the University of Pennsylvania. It was founded in 1765, and has graduated 10,458 men.

Wonderful progress has been made in this country of late years in teaching the dumb to speak. Last year articulation was taught to 4,235 pupils.

More than 1,400 girls applied for admission to the New York Normal College this year. The results of the examinations will be announced in a few days.

Seventy-seven of the 106 counties of Kansas are represented at the Agricultural College this year. There are also students from fourteen other States besides Kansas.

Yale University is about to add a course in psychology to its curriculum, and will fix up a laboratory for the purpose of experimenting upon and measuring mental processes.

Chicago is to have a new medical college. It will be called the Clinical College of Medicine and Special Hospital. Ground has been secured, and it is expected that by next year the institution will be opened to receive students.

Thirty years ago there was not a school in all the Southern States for colored people, and of the 4,000,000 slaves set at liberty only seven all one-half in each thousand could read. Today not less than 2,250,000 colored people in the Southern States can read.

President Eliot of Harvard University has been severely criticized for some comments he made on the public schools of this country before an educational meeting in Hartford, Conn. He said: "We are all wrong in supposing that we have the best school system in the world. There is not a country in the North of Europe which has not a better system. The immigrants who come to our shores from abroad will be found to have a far better school training in what are denominated the common branches than the average of the rural population of this country. In democratic schools we close the gate to the scholar in all the interesting studies after the age of 13."

Dolph Receives Telegrams Concerning the Report of the Engineers for Plans for Bridges.

By direction of the President Adjutant-General Kelton is retired from active service. Major L. C. Overman, who was recently tried at Cleveland for irregularity in his accounts, has resigned. The resignation is accepted, and goes into effect September 20.

Senator Allen of the State of Washington has received from the Secretary of the Treasury for transmission to the woman in State a magnificent gold medal, engraved around the face with the words: "In testimony of heroic deeds in saving life from the perils of the sea," and on the face of the shield with the words: "To Mrs. Martha White, for heroic deeds in rescuing three men from drowning." Mrs. White saved the lives of three sailors of the wrecked ship Ferndale at Long Beach last winter.

Senator Dolph is receiving a large number of telegrams concerning the report of the engineers for the plans for bridges across the Willamette. It will require several days to obtain a copy of the report and proceedings from the War Department and have it printed, and on account of its voluminousness it cannot be conveyed to the Senate until that is done. He believes the chief of engineers and Secretary of War will sign the report. Action, however, will be postponed until the people and city authorities of Portland can be made to understand the matter thoroughly examined and all presented to the Secretary. All communications received so far favor the location of a bridge at Burnside street.

Senator Dolph has secured the passage of his bill to increase the limit of cost for the site and public building at Portland to \$1,000,000. His amendment to the sundry civil bill provided a little increase, which has been reported favorably by the Senate Committee on Public Buildings and Grounds, and is now before the Committee on Appropriations.

In view of the certain opposition to the amendment in the House the committee hesitates about incorporating the amendment in the bill. Senator Dolph has been assured that a similar amendment introduced by Senator Manderson for a public building at Omaha received favorable report, his bill will also. The Senator says the circumstances will be more favorable at the passage of the public-building bill.

The census office has issued a bulletin on the population of the United States by color, sex and nativity. During the decade from 1880 to 1890 males increased from 25,518,820 to 32,067,880 or 25.67 per cent; females from 24,639,963 to 30,554,370 or 24.02 per cent. Of the total population 53,372,703 are native born or 22.76 per cent, as against the increase for the decade ended 1880 of 21.78 per cent. The increase of foreign born was 2,569,604 or 35.47 per cent, as against 49.99 per cent in the
