EDUCATIONAL. The Coming Season at Chautauqua Will be the Greatest in Its History-Iowa State University.

About \$3,000,000 is appropriated each year to the New York city schools. The total school enrollment for the United States last year was 14,200,000. The teachers and School Superintend-

ents in this country receive \$80,000,000 annually, and the money is well earned. President Angell of Ann Arbor has written that graduates of the Leaven-worth High School will be admitted to the Michigan University without further examination, which is no mean compli-

ment. President Gilman conferred degree

upon seventy-four students of the grad-uating class at Johns Hopkins Univer-sity week before last. He appeared in a gown and hood, and graduates all wore caps and gowns.

There is every reason to believe that the coming season at Chautauqua will be the greatest in its history, not only in the number of visitors, but in the extent

James Richard Cocke, who was grad-uated at the Boston University school of medicine at the boston oniversity school of medicine at the head of his class last week, is the first person totally blind from infancy to receive the degree of M. D. He has been a diligent student and

reader of anatomy for eight years past, and obtained 98 per cent. on his examination

Helen A. Keller, who is a pupil in the school for the blind where Laura Bridgman was taught, is according to all ac-counts a most remarkable child. She lost sight and hearing when a mere babe, and was sent to the school to be taught finger speech. Although only 11 years old, she is an intellectual wonder. She learns with wonderful rapidity, has acquired oral speech and manifests a men-tal power and grasp that would be phe-nomenal in a child in full possession of her senses.

The news of the determination of Yale University to enlarge the educational opportunities for feminine students came chased the vessel for a cruise to the Ha-waiian Islands for his health. For two years past he has been considering the voyage, and cleared at Vancouver for San Diego to enable his physician, Dr.
 Winchester of Santa Barbara, to board without going North. A special dispatch from the latter place to the San Diego Union says Winchester's wife says he has gone East. Officials say they believe Winchester is interested with Capitain Van Bremer in smuggling operations.
 opportunities for feminine students came almost simultaneously with the news that the ancient University of St. An-drews in Scotland had decided to admit women to the departments of theology, the sciences and the arts. All of the four universities of Scotland have within a few years past adopted a very broad pol-ley in regard to the admission of women as students. In this respect they are in advance of like institutions in any other pountry of Europe.

Two of Mr. Barnum's Stories.

Mr. Barnum's breezy conversation was in terspersed at frequent intervals with witty anecdote and quaint sayings. He spoke of an old lady who was so deaf that, when some playful chaps fired a small cannon near the old lady's door, she merely said, "Come the old lady's door, she merely said, "Come in." "That was a pretty fair story when I heard it some time ago," said the veteran, "but I heard a good one a day or two since that beats it. Two gentlemen were walking along a highway near a railroad. One of the pedestrians was somewhat hard of hearing. Along came a train, and the engine emitted Along came a train, and the engine emitted a frightful shriek. 'H'm,' said the deaf one, 'that's the first robin I've heard this spring.' -Boston Harald.
