Arrangements are being made for Dr. Jessup to start to England next week by authority of the board of trustees of Pacific College. The board has had the matter under consideration for the past two or three years and it has been the intention to send a representative across the Atlantic whenever the right person could be found to send, and an opportune time selected. The whole matter has been weighed carefully in the past few weeks and the board is unanimous in the conclusion that the above conditions have been reached, with the consent of Dr. Jessup to go at the present time and spend as many months in the work as may be profitable to the college.

The Doctor has all his life, been an enthusiast along the line of such practical education as is calculated to bring out the many and womanly characteristics of the young, and after having been so prominently connected with the founding of Pacific College as well as demonstrating his ability to succeed as a financial agent for the school, no better man could be found to send abroad. The probabilities are that he will start on his journey the first of the week but he will stop a day or two in Iowa and make two or three other short stops before he reaches New York. But few men ever travel who see more that they treasure up to be used later on in public speaking to the best of advantage than the Doctor, and we shall expect to hear a course of lectures on his travels when he returns, that will be worth the
