There is no greater nuisance about a town than a worthless dog—and most of them are of this persuasion. Ad viciousness to worthlessness and they are worse than a nuisance. There are one or two families about town who own dogs with such a fondness for human flesh that neighboring women and children are afraid to visit them. The marshal should kill every dog of this character found unchained in the daytime.

The lecture on Thursday evening of last week was something of a disappointment to several who were in attendance owing to the fact that Mr. Baker was unable to speak on the life of Abraham Lincoln, as had been announced. His subject was Evolution. This was a new subject for a lecture in Newberg and he made it very interesting to many of his hearers, but of course those of the younger class who had never read any on the subject were disappointed.

Cooks usually want two opposites to make a good pie. For instance sour fruit and then an abundance of sugar. Just now, however, they can be accommodated in this particular in the two extremes in the cost of the ingredients that go to make up the crust; for while flour is only ninety cents per sack, lard has gone up to a high water mark—eighteen to twenty cents per pound.

For pains in the chest there is nothing better than a flannel cloth saturated with Chamberlain's Pain Balm and bound on over the seat of pain. It will produce a counter irritation without blistering, and is not so disagreeable as mustard; in fact is much superior to any plaster on account of its pain-relieving qualities. If used in time it will prevent pneumonia. 50 cent bottles for sale by C. F. Moore & Co.

The farmer who has pork or lard to sell this season is in clover knee high in the middle of winter. The price has gone higher than the chickens fly to roost. Hams 17c and lard 18c and 20c. It requires lots of "jaw" to masticate tough cow but we will be compelled to stand it if we do have to devote a little more time to that part of our business.

As evidence that all is not sunshine in the natural gas region in Indiana, note the following from the Carthage Record: The extreme severe weather of the past two weeks has not been equaled in this part of the state in years, and many of our citizens have suffered for want of fuel. Gas pipes were frozen solid and had to be dug up and thawed out before sufficient gas could be procured to keep from freezing; and then it was only a question of a little time when the pipes would be frozen again. Some of the farmers who had wood to sell brought it in and found ready buyers at exorbitant prices.
