COUNTY NORMAL INSTITUTE.

The annual county institute for Yamhill county, 1893 will be held in McMinnville, commencing June 20th, at 1 o'clock p. m., and continue until the 30th, Saturday 24th excepted. Every effort will be put forth to make it interesting, instructive and profitable to the teachers and others who may wish to attend. A fee of $1.00 will be charged which with the amount already in the treasury will enable us to provide sufficient and competent assistance to make it a grand success.

I have noticed this fact during the past year, that those teachers who attended the normal last summer are the ones who have given the best satisfaction. District boards are beginning to observe this also and doubtless in many cases will ask applicants for schools, "did you attend the normal institute last summer?" A man may be a good debater but he must learn law before he can turn his talents to account at the bar; so also one may be a good expounder yet he must learn educational psychology and know something of physiology before he can turn his gifts or scholarly attainments to good use in the school room. Any one can hear lessons, but it requires a genius or trained teacher to teach. Lesson hearing schools and school keepers we are glad to note are rapidly becoming things of the past, and are no longer classed even among the average schools, but the work of the teachers has become a great "adaptive art" and aims to meet the growing needs of the pupil in a natural and tactful way.

We see doctors meeting in association for the exchange of thought and the furtherance of scientific discovery that they may be more successful in administering to the needs of the body. How much more essential that we who have to deal with the much more mysterious and important part of man should carefully investigate the workings of the mind and study the best methods of imparting the needed instruction. Our patrons are beginning to discover the fact that our teacher's meetings are not devoted to devising ways and means of increasing the wages of the teacher, but are places where we meet to study methods and principles of education and gather fresher and better material for our school work.

Let us then fellow teachers have a general turn out to this meeting. Come with note books and pencils and be prepared to grasp and absorb everything that will make your work more efficient during the coming year. J. B. STILLWELL, Supt.
