

NEWBERG GRAPHIC.

ISSUED EVERY FRIDAY MORNING.

E. H. WOODWARD, EDITOR & PUBLISHER.

FRIDAY, APRIL 20, 1894.

Entered as second class matter at the post office at Newberg, Oregon.

A STUDY IN SYNONYMS.

I was asked by my sweetheart to mistle, to budge.
To cut sticks, to make tracks and to tramp.
To evaporate, paddle, skedaddle and trudge.
To vomooose, disappear and decamp.
I was fiercely requested the double to tip.
And the twig in a twinkling to hop.
And to gallop my rags, and my cable to slip.
To abscond, and to vanish kerflop.
I was ordered to slope and to seek a fresh lodge.
To avert, to pack off and to start.
To squeak, to squall, to perambulate, to dodge.
To diverge, to deliquesce and depart.
I was begged to make beef, and to peel, and to guy.
Amputate my mahogonies sleek.
And to leg it, and hoof it, and step it, and fly.
To pike, to sling and to trot double quick.
I was pressed to embark, to weigh anchor, to glide.
To withdraw, to move forward, to fit.
To ascend Walker's bus, Shanks' pony to ride.
To aroynt me, to quit and to git.
I was hidden to clear, and to sheer, and to steer.
"But do nothing so fearfully vulgar, my dear,
I will merely, and mortally, go!"
—From London Fan.

In the future the editorial management of the GRAPHIC will be in my hands.
E. H. WOODWARD.

The democrats of Tillamook county have put a lady, Mrs. Willey on their ticket for school superintendent.

With four tickets in the field this year the traditional scratcher ought to be able to get in his work to his satisfaction.

EVERY time you meet a neighbor jog him up on the necessity of having better roads. Agitate the question wherever you go.

UNDER the head of fashion notes it may be well to state that pants with Cleveland badges will be worn this season the same as last.

The republican ticket nominated at Portland last week is universally conceded to be the cleanest, strongest ticket ever put up by the republicans of Oregon.

HON. BINGER HERMAN will succeed himself in congress. All parties concede this to be a foregone conclusion. Oregon never had a better representative in congress.

WE acknowledge the receipt of a fine large, colored "birdseye" map of the midwinter fair grounds and buildings from Director General M. H. DeYoung.

With only two tickets in the field, campaign lies are usually well interspersed with lies made up from whole cloth duty free. What may we expect with four tickets in the field?

A recent census of Rhode Island shows a decrease of more than 43 per cent in the number of hands employed within two years. Is it any wonder that the party that favors protection won in the late election in Rhode Island?

BROTHERS HOFER of the Capital Journal and Patterson of the Long Creek Eagle are candidates for the legislature on the republican ticket in their respective counties. We hope the boys will get there with rousing majorities and this we confidently expect to see.

The republican state convention, acted wisely when Baker the present occupant of the office of state printer was dropped and Mr. Leeds of the Ashland Tidings was nominated in his stead. Mr. Leeds is a clean man of good habits and will fill the office with credit to himself and the state.

The newspaper men were decidedly in it at the republican state convention. Kincaid of the Journal of Eugene for Secretary of State, Leeds of the Ashland Tidings for State Printer and Guild of the Sheridan Sun for Joint Representative for Yamhill and Tillamook. Glad to see the boys getting in.

JUDGE GALLOWAY, of McMinnville, received the nomination for governor at the hands of the democratic convention held at Astoria this week. Judge Galloway is an honorable gentleman, a Yamhill man and we believe he would make a good executive. Oregonians might do much worse than to elect him governor.

PROF. SPILLMAN of Monmouth Normal school has been selected as professor of agriculture in the Agricultural College at Pullman, Washington, at a salary of \$1,800 a year. He will spend several months visiting the experiment stations in the Mississippi valley before taking his place in the college.

The furnace and mines of the Oswego iron works have been leased to Wm. Pigott for two years. Robert L. Pollock has secured the contract for cutting the wood and burning the charcoal. He will cut on an average 4,500 cords a month and will employ in the woods and at the kilns about 300 men. This means a big lift to Oswego this season.

Two speakers representing different political parties addressed the citizens of Bettleville the other day. The first speaker used a blackboard to illustrate his points. The second speaker on opening said, in alluding to the blackboard work of his opponent, "figures will not lie, but liars will figure." This little figure of speech completely knocked the other fellow out.

AN EXTRA session of congress was called to give relief to the country. The demands were so urgent that the regular session could not be waited for. That was nearly a year ago. In the meantime several members of congress have died, the author of the Wilson bill has been compelled to travel for his health and even sockless Jerry is laid up for repairs. The discussion on the Wilson bill drags along in the senate and Cleveland occasionally takes to the woods for relief. Uncle Sam's ability to stand up for a year under such circumstances increases our faith in his staying qualities.

DEMOCRATIC NOMINATIONS.

For Governor—Wm. Galloway, of Yamhill county.
For Secretary of State—Charles Nickell, of Jackson county.
For State Treasurer—Thos. L. Davidson, of Marion county.
For Supreme Judge—A. S. Bennett, of Wasco county.
For Attorney-General—W. H. Holmes, of Salem.
For Superintendent of Public Instruction—D. V. S. Reid, of Eugene.
For State Printer—Capt. John O'Brien, of Portland.

MARRIED UNDER DIFFICULTIES.

A young couple of Elk City were married recently under difficulties that it truly demonstrated the old saying that "the course of true love never runs smooth." The would-be-groom first applied to the county clerk for a license but was refused owing to the girl being under 18 years of age and he did not have her parents consent. After ten long days of weary pleading he finally gained the mother's written consent, which he mailed to the clerk but failed to include the necessary affidavit. This caused a delay of two days more. He finally secured the license and went to Pioneer after Squire Morrison to tie the knot, but as the "Squire had been down to Elk City twice on false alarms in the same case he refused to go. The young man went back and got his promised bride in his boat and started for the Squire's. When about a mile above Elk City he broke an oar. Not being daunted he left his boat and bridled up and walked back home after another oar. Once more in the boat they started onward, but their evil star had not yet deserted them, for ere they had gone far the boat ran on a snag and stove a hole in it and it began to fill so rapidly that they had to take to the land and walk the balance of the way. They arrived at the "Squire's" without further mishap, but imagine the consternation of the groom when he discovered that he left his precious license at home. One more round trip on foot to Elk City by the weary groom and all the necessary arrangements were complete and the happy couple were made one.—State Rights Democrat.

CROP-WEATHER BULLETIN NO. 3.

WESTERN OREGON.
The temperature was much cooler than the normal. The daily deficiency was about seven degrees. The average precipitation occurred except in the northern coast districts where it was excessive. Some damaging frosts occurred. The sunshine was deficient. Showery threatening weather prevailed.

CROPS.

The weather conditions were unfavorable to the advancement of crops in the coast counties, also in the northern Willamette valley counties. A frost that injured fruit bloom occurred in Clackamas county on the 10th and another less destructive occurred on the morning of the 7th in Benton county. The rain which occurred was not desired except in the southern counties, where they were looked upon with favor. All fruit trees are blooming, except the apple and pear, on the higher elevations. Peach and cherry bloom was injured by the frost all other trees are reported unimpaired. Seeding spring grain continued, notwithstanding the rain. Fall wheat on high ground continues its vigorous growth and healthy color. Wheat on low lands, not having recovered from the effects of the excessive rains, made slow progress last week. The acreage of fall grain is about the average and with favorable conditions the average acreage of spring grain will be sown. The barley crop is growing nicely. Hops are making a vigorous growth; the acreage has been greatly increased. Garden work was delayed last week owing to too much rain. Cattle and sheep are in good condition; there is sufficient grass for their support. The prospects are still good for grain and fruit crops.

EASTERN OREGON.

The temperature was slightly below the normal. The precipitation was excessive in the Columbia and Walla Walla valleys and about the average in other sections. The first portion of the week was warm but terminated cool. The average sunshine occurred in many sections.

CROPS.

In the interior and southeastern counties bloom has not so far advanced as to suffer injury from frosts. Forward trees are commencing to bloom. Bloom in the Columbia river and Walla Walla valleys is slightly later than the average season. Cherries, peaches, plums and apricots and strawberries are in bloom. Frosts have injured peach bloom slightly in this section. Fruit and grain prospects continue excellent. Many new orchards are being planted in many sections. The greatest activity in this respect is noticeable in the vicinity of Hood river. In the setting out of new orchards the apple tree predominates. Peach tree planting throughout this section receives little encouragement. Plums and prunes are sufficiently hardy, consequently a popular fruit in the Columbia river valley.

Seeding spring grain is being forced to a close in many localities. The Umatilla county farmers appear to be leading other sections in seeding spring grain; there is much yet to be done in Wasco county. Growth of wheat and grass continues unchecked, its color dark green and its appearance vigorous. The acreage of grain has increased in the interior and eastern

counties, while in the Columbia river counties it has decreased upon the introduction of fruit. Volunteer wheat looks well and promises to make a good crop. Many depend upon it solely for their grain crop. Barley is coming up. Wild mustard and tarweed is appearing in many fields. Grass on the range is the best ever known owing to the moisture in the ground. Alfalfa is making a good start. All kinds of stock are doing well. Sheep shearing has commenced.

POULTRY NOTES.

Use air-slaked lime freely on the floor and walls of your poultry house for lice. The best food to make hens lay is clover, fresh bone, and meat. But little grain is now needed.

When a hawk sits on a pole and picks its teeth it is time to count your chickens—after they are hatched.

Don't feed your hens at all this warm weather, if they are on a range. You will thus save food and get more eggs.

Nine times out of ten the cause of the difficulties with hens is due to overfeeding. A fat hen is not a good hen.

Avoid white feathers on buff birds. The color should be a rich clear buff as close as can be attained. The tail should be a rich dark chestnut.

Look out for the big lice on the heads of chicks and turkeys. Rub a drop of sweet oil on the heads. Be careful, as too much grease of any kind is also injurious.

Mr. Geo. C. Mench, Home Station, Pa., sent us an egg which had a smaller egg within the larger one. It is a frequent occurrence, and is due to heavy feeding, food too stimulating, and the hen is in a fat condition.

A thousand dollars would not be seen in the grocery business, and it is but a small sum with which to engage in any enterprise. How, then, can one expect to go into the poultry business, even without experience, and make it pay with a less amount.

To preserve eggs keep them in a cool place and turn them three times a week. It is the best plan known. Simply place them on racks or shelves. No packing material is necessary. Eggs from hens not with males keep twice as long fertile eggs.—The Poultry Keeper.

JOHN DAY FOSSILS.

William Ireland, Jr., state geologist of California, will come to Oregon next month for the purpose of studying the geology of this section, and will spend four months among the fossil beds, studying, besides the different formations of the past ages of the earth, the evidences of animal life belonging to these periods. The excuse California has for researches in Oregon is that our state is allied geologically with California. Geology does not recognize state lines. Oregon discharged her geologist, Prof. Thomas Condon, several years ago, merely because the position cost \$500 per year, and now Oregon, the richest state in the Union for the paleontologist, is being neglected by herself and plundered by others.

The John Day fossil beds are something entirely new, and contain fossils not known to exist in any other part of the world. Yale college has over 100 different specimens of ancient animals which have never before been duplicated, and possibly never will again, even from the same fields. For seven years prior to 1882, Yale sent out expeditions, and employed Mr. L. S. Davis, of this city, as guide. Her museum has been filled with John Day fossils, containing not only new species of formerly discovered families, but the fossilized remains of entirely new genera.

In 1882 the geological survey replenished the national museum with specimens wonderful and rare from the John Day fossil beds. In like manner the Princeton expedition of 1889 robbed the beds of whatever had been exposed by the rains of preceding years. The academy of science, of Philadelphia, also plundered Oregon an entire summer since that time, and the year before another party from the same place secured rich treasures of an age which can never be reproduced.

It is time Oregon took some precautions calculated to save herself these valuable relics of ages extinct from memory and otherwise from knowledge. Professor Condon, alone, has a few of these fossils, but a lamentable paucity compared to the inestimable treasures of Yale. Now, after an absence of vandals from other states of several years, California proposes to send her state geologist to make another clean-up. Of course there will be several years since these fields were picked over, and the rains, particularly of the late winter, which have been excessive, will have uncovered rich treasures.

If Oregon was alive to her own interests she would stop this wholesale despoiling of her fossil beds, and employ a geologist to gather those fossils for herself. If she will not, a few citizens of The Dalles, by acting promptly and sending out at once a man who knows these fields as well as Mr. Davis, could secure the cream of the exposure before Mr. Ireland's arrival, and establish a museum in this city, which would be sought for thousands of miles, and second to none in the world.—The Dalles Chronicle.

STARTING PLANTS INDOORS.

A few thrifty, stocky plants of tomatoes, egg plants, cabbage and lettuce will be of great assistance in starting a kitchen garden. These plants can be raised with little trouble without the aid either of hot-beds or forcing houses. For family use 100 plants of tomatoes and 200 cabbage plants will be all the plants needed for the first crop. A ten cent package of tomato seed and the same amount of flat Dutch cabbage will produce twice this quantity of plants.

Get two flat soap boxes or any box that is 6 inches in depth and 16 inches wide and twice this in length; bore two small holes in each end of the box, and lay a flat stone or oyster shell over each hole; fill these boxes with fine black soil from the garden, and set each box near the

window in the kitchen. The kitchen air is moist from the steam in cooking, and plants thrive much better in such air than in a room heated by a fireplace, stove or furnace. Let the boxes remain for a few days until the seed seeds in the earth sprout and come up; the earth is then in a fit condition to sow. Sow each kind of seed by itself in a separate box, for tomato seed requires a much higher temperature than either cabbage or lettuce, and not as great heat as egg-plant seed. If cabbage and tomato seeds were sown in the same box and kept in the same heat, the cabbage plants would grow up spindling and weak and of very little account.

The delicate plants must be kept where the heat is the greatest—that is now the window and in the sunlight—having the best benefit of sun and fire, and the cabbage plants somewhat removed from the window, but in the light, but where the heat is mild. Sow the seed quite thin, two seeds to an inch, and after the seed is sown just moisten the earth with tepid water. Then sift over the seed an eighth of an inch of earth and set the boxes in their right places.

When the seed starts into growth, keep the earth moist, but not wet. Give air every fair day from 10 to 3 p. m. The color of the plants will tell their condition. If it is dark green, they are doing well; if the color is a pale green, inclining to yellow, they need moisture and more air. Seed sown the 27th of March will make fine plants by April 17. The plants, after they get their fourth leaf, should be transplanted into larger boxes, or in a light, cold frame, and set 6 inches each way and under their leaves. By May 15th large stocky tomato plants may be had. These, when set in the open ground, will commence to fruit by July, and continue in bearing until midsummer. Soapsuds, not too strong, will be found most excellent for increasing growth of the plants.

All small flower seeds, such as German aster, balsam, lady slipper, phlox, petunia sweet mignonette, and all flowers of like nature, can be raised in the same manner. These flower seeds are so small that they must have much finer earth, and just covered over the depth of the seed and no more. Sow the seed quite thin, and keep the soil damp. The earth must not get dry, or it will cake, and the seed will not come up.

MULTUM IN PARVO.

Never reason from what you do not know.—(Ramsay).

Nothing is pleasant that is not spiced with variety.—(Bacon).

In this world truth can wait. She is used to it.—(Douglas Jerrold).

The end of a disolute life is commonly a desperate death.—(Blon).

Science when well digested is nothing but good sense and reason.—(Stanslans).

In noble hearts the feeling of gratitude has all the ardor of a passion.—(Poincelot).

The earnestness of life is the only passport to the satisfaction of life.—(Theodore Parker).

Decision of character will often give to an inferior mind command over a superior.—(W. W.).

The less of government the better, if society be kept in peace and prosperity.—(Channing).

Every real thought on every real subject knocks the wind out of somebody or other.—(O. W. Holmes).

The talent of success is nothing more than doing what you can do well without a thought of fame.—(Longfellow).

The world may be divided into people that read, people that write, people that think, and fox-hunters.—(Shenstone).

Men fear death as unquestionably the greatest evil, and yet no man knows that it may not be the greatest good.—(W. Milford).

Virtue will catch as well as vice by contact; and the public stock of honest, manly principle will daily accumulate.—(Burke).

Politeness comes from within, from the heart; but if the forms of politeness are dispensed with, the spirit and the thing itself soon die away.—(John Hall).

Some people can neither stir hand nor foot without making it clear they are thinking of themselves and laying little traps for approbation.—(Sydney Smith).

Poverty is hard, but debt is horrible. A man might as well have a smoky house and a scolding wife, which are said to be the two worst evils of our life.—(Spurgeon).

Secrets are so seldom kept that it may be with some reason doubted, whether the quality of retention be generally better, and whether a secret has not some subtle volatility by which it escapes imperceptibly at the smallest vent, or some power of fermentation by which it expands itself so as to burst the heart that will not give it way.—(Johnson).

FROM OUR EXCHANGES.

Yamhill County Reporter.
John Rhodes brought home with him some samples of Missouri wheat and oats and is exhibiting them among his friends. They are well calculated to instill contentment in an Oregonian's breast. The wheat is way below par with us, and the oats would suffer by a comparison with our wild oats, were we to touch them. Especially if we threshed the "wild oats" we sow.

THE MONOGRAPH.

FOR ONE DOLLAR and your opinion on this subject.

What is the best monetary system for the United States? This is the greatest problem confronting the American people. It is the intention of the publishers that "THE MONOGRAPH" shall contain the best thought of the nation on this question. The recognized leaders in all political parties have been called upon to contribute plans for their ideal Monetary System. But not content with this, we are determined to employ in the same volume the opinions of thousands of the "Great Common People," and to that end we will allow readers to express their views on the subject of the book for their solution of this problem, expressed in not more than 500 words. The Monograph, the best modern work on Monetary Systems, will be sent to any address on receipt of \$1.00. It is a book that will interest and instruct, and is destined to become a giant factor in shaping the future monetary system of the nation.

The Monograph Publishing Co., Room 14, German American Bldg., St. Paul, Minn.

Midwinter Fair Rates.

The Southern Pacific railroad company has issued the following circular:
"The undersigned beg to announce that 30 days' time will be given on Special Tickets sold at any point on this Company's Pacific System, for San Francisco and return, account the Midwinter Fair; these tickets to be good for continuous trips both going and returning. Also, that to the purchasers of Midwinter Fair tickets from our Pacific System points, we will sell Excursion Tickets from San Francisco to points in California, usable within the 30 days' time herein named, at One and One-half Fare for points over 150 miles from San Francisco, and One and One-third Fare for 150 miles or less from San Francisco. The minimum rates for such tickets will be one dollar. Rates from Portland to San Francisco and return will be \$25.00 plus \$2.50 for five admissions to the Fair. Rates from other stations in Oregon will be made in like manner. Tickets will not be on sale until the Midwinter Fair opens."

NOTICE OF SHERIFF'S SALE.

C. F. JEWETT, Sheriff.
NOTICE is hereby given that the undersigned as Sheriff of Yamhill County, State of Oregon, by virtue of a Writ of Execution and order of sale issued out of the Circuit Court of the State of Oregon for the County of Yamhill on the 12th day of April A.
