The Pacific College base ball team did up the Pacific University nine in a game played upon the campus Saturday to the tune of 2 to 1. The P. U. boys played a game but little to their credit, and some of the observations upon their work and the prospects for a big score against them made principally by a row of boys perched upon the fence, were more amusing than patriotic. The Newberg boys put up a fine game and played with a good humor that was quite fetching.—Forest Grove Times.

It is a noticeable fact which we have often observed, that at Dayton and Lafayette, only eight miles away, trees bloom and the leaves appear at least ten days in advance of those in this community. A ride through the valley just now is indeed a pleasure. Cherry trees are loaded down with bloom as we have never before seen and all other kinds of fruit trees are loaded to the tips of the branches. The continued damp weather has greatly retarded spring work and although farmers have been improving the time during the fine weather of the past two weeks there yet remains much plowing and sowing to be done. Fall sown grain is looking splendidly and everything so far as productiveness goes is very promising for the producer.

W. J. Stater was, and is not. That is to say he was one of us for a few days but is no more. It was thus. Billy sold his stock and rented his farm for a year to Nels Hanson who arrived here with his family a couple of weeks ago. He moved to town and Mr. Hanson took possession of the farm, and about the same time an uncontrollable homesickness seized the whole Hanson family completely taking them off their feet. In fact, like Rachel of old they refused to be comforted, and nothing would bring relief but a journey homeward. Billy took the farm and stock back after being paid a sufficient "relief fund" to reimburse him for his trouble and says he will sit in the shade this summer and let his wife fan him.

In Blandford's weather and crop report for the past week he says favorable weather conditions having prevailed there is a cheerful vein running through the reports received from the different parts of the state. Frosts are less frequent. Seeding is far advanced in some sections while in others plowing is hardly commenced. In this respect Marion county seems to be the most backward. In some parts of the Willamette valley farmers have finished seeding. The average crop of oats and potatoes will be seeded. There is great activity in the hop yards where poling has commenced. Hops have made a vigorous start. Owing to the success of this crop in previous years, especially in 1893, the acreages has been increased. Strawberries are blooming in all sections and a large crop seems assured. Grass continues its vigorous growth. Should the season continue with as favorable conditions as have existed during the past week, the cheerful hopes of all will be realized.
