

KAY & TODD are the People for

CLOTHING, BOOTS AND SHOES, HATS AND CAPS, UNDERWEAR, TIES OF ALL DESCRIPTIONS, UMBRELLAS, OR ANYTHING ELSE IN THE GENTS FURNISHING LINE.

FOR THE NEXT 30 DAYS will sell you their \$12.00 Summer Suits for \$10.00. Straw Hats cheaper than the cheapest. They have just received a new supply of Clothing and are selling at this discount to get the cash. COME AND SEE US AND GET PRICES. Exclusive Agents for Brownsville Woolen Mills.

NEWBERG, Oregon.

NEWBERG GRAPHIC.

ISSUED EVERY FRIDAY MORNING.

E. H. WOODWARD, EDITOR & PUBLISHER.

FRIDAY, JUNE 8, 1894.

Entered as second class matter at the post office at Newberg, Oregon.

SALEM HAS A ROSE SHOW TOMORROW.

STOCK WILL GRAZE UNMOLESTED along the roadside in Yamhill as of old. The vote indicates that the people of Yamhill don't want a herd law.

THE MARION COUNTY Fruit Growers' Union has no doubt made a good selection in the person of James R. Shepard for manager. An office has been opened in Salem.

Down in southern California where the people are supposed to live mostly on climate, one of the papers published in that region said recently that some fields of sugar beets had been destroyed by winds.

IF OREGON has any one thing to be thankful for more than another just now it is the knowledge of the fact that Penroyer will not be the man who will succeed Dolph in the United States Senate. J. N. Dolph will succeed himself.

THE CALIFORNIA State Fruit Exchange reports the prospects favorable for the largest crop of peaches ever gathered in the state. Cherries are very uneven and the crop is not an excessive one. Bartlett pears promise a heavy crop. The prune crop will be light.

MAX PRACY of Ashland says peaches in southern Oregon will be a fair crop while he puts other fruits as follows: Apples 100 per cent, cherries 100, pears 50, prunes 100, plums 55, apricots 60, nectarines 80, almonds 100. Grapes and small fruit a full crop.

THE ISSUE of the Rural Northwest of July 1st will be devoted to the prune industry. Interesting facts with reference to the prune industry as carried on the leading prune producing countries of Europe will be given. In the main, however, the issue will be devoted to the prune industry of the Pacific Northwest.

MR AND MRS. C. S. CLARK who in former days presided over the destiny of the Sheridan Courier have recently launched the North Yamhill Record on the great sea of Yamhill journalism. Yamhill is a county wonderful in her resources and the possibility of acquiring a competency from the profits of a newspaper plant established on Yamhill soil, is being demonstrated as the years go by. Anyone who contemplates starting a newspaper in Oregon ought to look the field over in Yamhill before deciding on any outside point.

NOTWITHSTANDING the fact that an election was the order of things yesterday and everyone was talking politics, H. B. Holland, bookkeeper at the office of the Salem Flouring mills, received orders from Portland headquarters to chop the price of wheat down a notch and now the card at that office reads "Wheat—33 cents." On the first Monday in June last year wheat was quoted at 62 cents during the forenoon but by night time had dropped two cents thus making the price 60 cents. In June, 1892, the quotation was 60 cents.—Sittesman.

AN EXCHANGE says: "One of the whims of fashion is to wear a black moire ribbon an inch wide and a yard and a quarter long, around the neck, and fastened with a gold slide. To this is attached a tiny watch or a fancy little gold bottle filled with a favorite perfume."

THE ABOVE mentioned paraphernalia may be the stuff in some places but even at the risk of exposing incurable ignorance we assert that we have not noticed any such rigging in Newberg. Gold has been on the slide all right enough for some time and the fact that it has mostly "slid" out of the hands of the people may account for the absence of this "whim of fashion."

AN EXCHANGE says: The fabulous goose that laid the golden egg, and was slaughtered by its avaricious owner that he might possess himself of all the eggs at once, has had a modern prototype in the great auk, but this wonderful bird has also ceased to exist as a distinct species. The eggs of the great auk are now more valuable than the fruit of the fabled goose, for the few existing specimens readily sell for more than their weight in gold. Only sixty-eight eggs are known to scientists in the world, and but ten of these are in perfect condition. The first recorded sale of the great auk's eggs was in 1853, when they sold at \$150 each. The last sale of record was in London a few weeks ago, when a specimen brought \$1,500. The auk became extinct in 1844.

A VERY large number of people know how a newspaper ought to be run in a country town, as is well known by news-

paper men all over the country. Brother Jones of the Tillamook Headlight has learned that such a condition exists in Tillamook and here is his proposition.

There are some people who think they can run a paper better than we can. No doubt some of them can. We are going to give them a chance. In a few weeks we will let any man who wants a trial have the editorial page one week to experiment with it. You take the page for an issue and express your sentiments therein upon all topics as you wish, and place your name at the head as editor. It will cost you nothing, and first come, first served. There will be no strings on you. Several persons have spoken for the use of the page one week, and we shall keep a list and accommodate them in the order they come. Don't stop because you don't understand grammar; we'll correct the mistakes, and if you can't write, tell us what you want to say and we will write it out for you. Come on, and air your opinions, and demonstrate to the world how you think a newspaper ought to be run.

THE TRANSCRIPT says: Three years ago Dr. Morrow who is now associated with Dr. Woods of this place, dug up from an Indian burial ground on Long Island just below Umatilla, two Indian skeletons that are wonderful to behold. One has the appearance of having been a very old fellow while the other was a youth—both skeletons being preserved intact. The old man was buried in a sitting position while the boy was straightened out. These skeletons have been on exhibition at a Boston institution for some time past and have created much comment from the press. They are indeed novelties and to be appreciated must be seen. Dr. Morrow has flatly refused \$1,000 for these relics, so it must be seen that he values them highly.

THIS SUBJECT of mirages has been under discussion of late and Joel P. Geer of Butteville gives the following which is of much interest inasmuch as it had not been generally supposed that mirages were ever seen in the Willamette valley:

"I was very much interested in reading the article in Sunday's Statesman, about the mirage in Colorado. I have seen these delusive lakes in the harvest fields of California, but I think there are very few who know that such things are sometimes seen in the Willamette valley. I have seen it several times in going out from Albany, going east from the northern part of town. Also a week ago I saw one that was beautiful on Howell prairie, though on a limited scale. I was surprised, too, as the day was not hot, and I had supposed that such phenomena was only to be seen in the hottest weather. The one I saw then was very plain, and very deceptive, shadows of cows being seen plainly in it. Had I not known the place well, I should have had no doubt but it was water pure and simple, but as I drove right through the lake, and there was no sign of water I am sure of what I saw—or what I did not see."

THE FLOOD at Portland. The attention of the people for the past ten days has been about equally divided between the election and the big flood at Portland. River excursions from Salem, Dayton and Newberg, have been and are still being run to carry passengers down to see the "Venice of Oregon." The mountains of snow at the head waters of the various tributaries of the Columbia still continue to feed the mountain torrents and the water continues to rise at Portland. The high water mark of 1890 was 3.8 feet under water on Wednesday morning. The depth of water on Front street is sufficient for the navigation of large sized river craft. At Ash street it is 7 feet 4 inches and heavily loaded barges are towed down the street with perfect ease. One of these barges was towed up Davis street to Sixth. Small steamers and heavy transports may be seen in all parts of the flooded district, especially east of Third street. On Washington street the water reaches within a block of the Oregonian building. On many of the streets, crossings have been built of sufficient height to allow boats and wagons to pass under. At the office of the Cleveland Paint & Oil Co. on Front street a submarine diver was employed to rescue important books and papers from a safe that was submerged. Decks and wharves along the river front are being badly damaged and were it not for the fact that the flood is back water all ordinary buildings would be swept away. Northern Pacific trains are transported from Nelson on the Columbia directly to Portland a distance of some 40 miles or more. It is a novel sight to see a whole train of cars brought into Portland and depart from there daily on a transfer boat 350 feet in length. The water is thought to be as high as it will get and a fall is hoped for soon.

ON Sunday, June 3, 1894, at the Newberg House in Newberg, Oregon, A. T. Hill and Miss Myrtle Price, Rev. James Price officiating. The wedding took place at 9:30 a. m. in the presence of a few of the friends and relatives of the bride and groom. It had been expected that Rev. Elwood Scott would perform the ceremony but on account of ill health he was unable to be present. Mr. and Mrs. Hill are well known in Newberg and a large circle of friends join in extending to them their kindest regards. They will accept the thanks of everybody about the Graphic office for a liberal supply of the good things that loaded the table at the wedding.

MARRIED.

ON Sunday, June 3, 1894, at the Newberg House in Newberg, Oregon, A. T. Hill and Miss Myrtle Price, Rev. James Price officiating. The wedding took place at 9:30 a. m. in the presence of a few of the friends and relatives of the bride and groom. It had been expected that Rev. Elwood Scott would perform the ceremony but on account of ill health he was unable to be present. Mr. and Mrs. Hill are well known in Newberg and a large circle of friends join in extending to them their kindest regards. They will accept the thanks of everybody about the Graphic office for a liberal supply of the good things that loaded the table at the wedding.

ELECTION RETURNS.

Another Landslide for the Republicans.

PENROYER'S SENATORIAL BOOM BUSTED.

The Republicans Make a Clean Sweep of the State Ticket—They Also Carry Everything in Yamhill County.

The election seems to have passed off quietly at all points in the state although there was more enthusiasm displayed than has ever been shown at any previous election in Oregon.

It was a three cornered fight between the Republicans, the Democrats and the Populists with the Prohibition party fourth on the ticket. The Republicans and Populists got in their work for all they were worth while the Democrats had but little hope of favorable results. Since the smoke of the battle has cleared away everything is shown to be republican. Lord is elected by some 15,000 majority while Pierce seems to have about double the votes that Galloway received. In the Senate so far as returns are in the Republicans will have 18, populists 3, Democrats 7, doubtful 2. The house will be Republicans 47, Democrats 1, populists 7, doubtful 5.

Linn and Umatilla counties, formerly Democratic strongholds and this year the strong populist nests are swept by the Republicans as if by a cyclone. In this county the Republicans elect everything from top to bottom on the ticket for the first time in the history of Yamhill politics. The majorities are high, running from 250 to 700.

Enriching the Soil.

If nothing could be reclaimed that was lost, a time would arrive when the soils of the universe would be impoverished. Millions of tons of plant food are carried to the sea every year, while the sewers of the great cities take more of the wealth of the people than is produced. Fortunately, however, the plant food taken from the soil becomes food for the fishes of the sea, which in turn are again deposited on the soil, and the carnivorous birds assist in forming great deposits of guano and other nitrogenous substances, which are applied directly to the soil to repair its waste. The greatest loss by the soil is that removed by the farmer himself, and unless he returns an equivalent for that which he takes the matter of exhaustion depends only on the time required. There is a constant loss of fertility, even under the most apparently favorable conditions, but the soil may be made to improve instead of deteriorating by intelligent and systematic management, and by cultivating for an increase of plant food.

In all soils there will be found certain plant foods, some sparingly and others in abundance, but such foods are in the shape of insoluble substances, and unavailable for use. If cultivation is given, and the warmth, air and moisture enter, there is induced a certain degree of chemical action, and when some substance, such as lime, is applied, the chemical action is hastened or promoted by the lime, because it desires to unite with some other substance existing in an inert condition in the soil. In reality, a struggle for position of the atoms occurs, the result being that there is a breaking down of molecules, the creation of new compounds and the formation of salts that are soluble and which can be utilized by the plants. This demolition of molecules and particles is constantly occurring, but may be hastened or increased according to the treatment of the soils by the farmer.

The air also abounds in plant food, such as ammonia, nitric acid, free nitrogen and carbonic acid. The leaves of plants take carbonic acid from the air and deposit it within the plants as sugar, starch and fat. The amount of food thus derived from the air alone is greater than from all other sources. Nearly the whole of the starch, sugar, oils, tallow, butter and other carbonaceous substances, incredible as it may appear, come from the air around us, being converted into substances found in all plants and from the plants to the animals. A pound of butter takes little or no material from the soil. The air is also composed of about 80 per cent of pure nitrogen, in a free or uncombined condition. Such plants as clover, peas, beans and others have the power to appropriate portions of this free nitrogen, while all plants derive ammonia and nitric acid from the soil where the rains have brought down and deposited those substances. When the farmer applies mineral matter in the shape of potash and phosphates to his soil and grows those crops that increase the supply of nitrogen, his farm will never deteriorate in fertility, but increase every year.—Philadelphia Record.

Graduating Exercises.

That Newberg is sadly in need of a well seated hall was well demonstrated at the graduating exercises of the public school held at the Baptist church on Thursday evening of last week. When a public school exhibition falls to bring out the parents and friends of the children no other attempt need be made to get a crowd. On this occasion the church was crowded to suffocation at an early hour and many hung around the windows and doors to catch a sentence occasionally while many others went home who they found they could not get inside. We had intended to give a full report of the exercises but find it rather difficult to take notes while tip-toeing to see over a crowd of twenty or thirty at the door.

Judging from the little we could hear and what we got second hand the class did nicely both in the preparation and the delivery of their orations. They are a bright set of students and with the continued course they ought to receive, and which most of them will no doubt take advantage of in college they will be heard from in the future. The exercises were without question the best that have ever taken place in connection with the public school in Newberg.

Mrs. Harford has been appointed a national organizer by the National Women's Suffrage Association and will take the field in the interests of that work.

Sifted Wheat From Ham's Horn.

The man who never has any new music in his heart is a being whom angels pity. Your conduct cannot be right while your convictions are wrong.

Many a man will neglect his work to talk about what a happy place heaven is, who is not doing anything to make his home resemble it.

Get people to think right and they will try to do right.

When you don't know exactly what to do in your dealings with men, do as you would have them do.

The only real kings are those who rule themselves.

If you can't get along well with your neighbors, don't get a dog and file his teeth. Get more religion.

The preacher makes a mistake who tries to put more gospel in his preaching than he does in his practice.

It don't take much talk from a theater-going professor to take the life out of a prayer meeting.

The only way to keep from blackballing is to keep stepping forward.

You can't stop a wife man's tongue, but you can stop your own ears.

No man can work with all his might for anything he does not believe in his soul to be true.

The devil must feel proud of his work whenever he looks at the man who never has a kind word to say to his wife.

No man can get thoroughly interested in the welfare of the heathen without having a revival under his own roof.

There are people who would do wonderful things for the Lord, if they could only do them without costing much.

It will be found that many of the sweetest songs sung in heaven were written on earth.

No religion is worth a row of pins that does not make its possessor better.

If mothers could die for their children, no man's life would be in danger while his mother lives.

You had better let a thief come into your house and carry off what he will than to let a wicked thought come into your heart and stay.

A revival never breaks out in a church while it is up to its eyes in popular amusements.

A lazy man is always complaining that he is overworked.

The devil leads the man who is not living for some good object.

Broiling Beefsteak.

I have a good many ways of broiling beefsteak, but the method which I give to the readers of the Pacific Farmer is in my opinion superior to any that have been tried.

It is always best to purchase a good thick cut of beef. Trim the edges and lay the steak on a wire broiler directly over a hot coal fire. When the meat is slightly browned turn and brown on the other side. If the steak is preferred rare a couple of turns will be sufficient, but if liked well done, turn at least four times. It is a bad plan to warm the meat in the oven, as the grease from the meat soaks into the dish and in a very little while imparts a strong, rancid flavor to the meats that are placed upon it. The way to heat a plate is to pour hot water over it and wipe dry; after placing the meat upon the platter spread butter over the top and sprinkle with pepper and salt.

Housekeepers make a great mistake when they put steak into the oven to keep warm. The heat of the oven destroys the sweet, juicy flavor of the meat and renders it dry and unpalatable.—Mrs. I. M. Cook, Wisconsin.

Oregon State Weather Service.

SPRINGBROOK, Ore., May, 1894.

Elevation above sea level, 400 feet; mean temperature, 56; departure from normal, plus 10; maximum temperature, 82; date, 25th; minimum temperature, 22; date, 9th; mean of maximum temperature, 65; mean of minimum temperature, 47; number of times minimum temperature 32 or below, 1; number of times minimum temperature 49 or below, 9; total precipitation, 1.2; departure from normal, minus 1.0; number of times maximum temperature 90 or above, 2; greatest precipitation in consecutive hours, and date, 4.1; prevailing direction of wind, N; number of clear days, 16; number of partly cloudy days, 11; number of cloudy days, 10; number of days on which 91 or more of precipitation fell, 2; number of days on which 91 or more of precipitation fell, 2; dates of thunder storms, 25th; dates of light frost, 2nd; dates of killing or injurious frosts, 1st.

The month has been remarkable for the unusually low temperature on the 9th, which the weather bureau states is the lowest record since 1873 during May. The temperature on May 25th was also exceptionally high for this month though it is not unusual to have one day 90° in May.

Commencement at Pacific College. Friday, June 15—Field Day. Sabbath, June 17—11 a. m. Baccalaureate Address, 8:00 p. m. Address before the College Christian Associations.

Monday, June 18—2:00 p. m. Address before the Crescent Literary Society, Prof. J. J. Wilson of Portland.

Tuesday, June 19—10:00 a. m. Graduating Exercises Preparatory Department Section I, 2:00 p. m. Graduating Exercises Preparatory Department—Section II, 8:00 p. m. Reception by the Christian Associations.

There will be a two days meeting at Dundee and Maple Grove commencing this Friday night. On Saturday there will be meeting at 2 and 8 p. m. and three services will be held on Sunday. Bring your baskets well filled and let us put in the day to the glory of God.

Remaining unclaimed in the Newberg Post Office, for the month ending May 31, 1894.

Persons calling for any of the above letters will please say "advertised."

Anyone wanting to buy a good riding pony will find it to their interest to call at this office.

Forty acres of land for sale. For price and other information call at this office.

Mid winter Fair Excursion Tickets, Portland to San Francisco and return, via Southern Pacific Co's Shasta Route, will be placed on sale January 23. Rate \$27.50, including five admissions to the Fair. Tickets good for thirty days from date of sale.

Tin lamps, tin files and incubator supplies, at Storey's.

The Weekly Oregonian and the Graphic one year for \$2.50.

Look out for a big potato crop this season.

House-Cleaning Hints.

Cleaning wall paper is often a very hopeless task. I have had a good deal of experience in this form of house cleaning, and I find that rubbing with bread-crumbs has sometimes a good effect. I have removed grease spots by dusting on as much magnesia as will adhere. It should be left on for a few hours, then brushed off gently. Repeat the process if necessary. The preliminary treatment for these methods is to go over the whole surface carefully with a soft, clean duster first over a broom. Clean patches will often do the best that can be done for serious disfigurements. If the paper is soiled and torn past repair, and the painted wood-work, originally white, has become a dingy clay color, which no soap and water can whiten, we have every reason to believe that our room needs new paper and a coat of paint. If the old paper was distasteful we can have the wall covered with a pattern that is pleasing to the eye, and thus make the room what it should be—a tasteful, comfortable resting place.—Mrs. J. M. Freeman, in Pacific Farmer.

Right Arm Paralyzed!

Saved from St. Vitus Dance.

"Our daughter, Blanche, now fifteen years of age, had been terribly afflicted with nervousness, and had lost the entire use of her right arm. We feared St. Vitus dance, and tried the best physicians, with no benefit. She has taken three bottles of Dr. Miles' Nervine and has gained 31 pounds. Her nervousness and symptoms of St. Vitus dance are entirely gone, she attends school regularly, and has recovered complete use of her arm. Her appetite is splendid."

Dr. Miles' Nervine Cures.

Dr. Miles' Nervine is sold on a positive guarantee that the first bottle will benefit. All druggists sell. Write for book or it will be sent, prepaid, on receipt of price by the Dr. Miles Medical Co., Elkhart, Ind.
