John Vestal writes to his home paper, the Whittier, (Cal.) Register, that he has found no place for which he would exchange his home at that place. That is the most natural thing in the world for him to write. A man away from home writing to his home paper was never known to finish up a letter in any other way. If he said anything else the editor would fire it into the waste basket.

**Into the Cave.**

The Examiner cave party has been heard from through an illustrated letter in that journal. The explorers had penetrated in the great Josephine county cave to a depth of three and a half miles with the aid of lanterns and picks, the latter being used to knock the limestone projections out of the way to admit of access to new apartments. The way is very difficult and a good part of it is gone over on hands and knees. The caverns are dripping with the steeps from melting snows at this time of year. Flashlight pictures reveal weird and ghastly chambers, statuary almost human in its carving and contour. It will take money to render these great caverns accessible to the average tourist, who prefers walking erect in search of the curious and rare in nature. More letters are yet to be published in the paper regarding these great caves.—Ashland Tidings.
