There is one unfavorable feature about the mild climate of the Willamette valley. It is too inviting for the hobo element to collect in here, where sufficient warmth can be kept up without the vigorous exercise that is required in a more frigid climate. Then there is not a sufficient breeze to blow the stink away from these fellows.

A visit to the silent city of the dead near town a few days ago brought vividly to the mind of the writer his first visit to that spot a little more than sixteen years ago, when he assisted in laying away the second or third body that found a resting place there. Something must be done to stop Hendershott from buying potatoes, for every time he gets a lot of spuds bought up Pague, the weather man, gets hoodooed and loses all control of the elements. After he got that other lot of soft potatoes distributed out among the town cows and used up we had mild springlike weather for a spell, and just about the time people were getting ready to warble "Springtime is coming gentle Annie," Hendershott piled up another lot of potatoes in sacks down at the river and here we are wringing our frosty noses again. Let a restricting injunction be served at once.

With age and experience road making in Oregon will undergo many changes for the better. One very marked improvement will be in the manner of bridging canyons. Instead of building long, expensive and short lived wooden bridges, fills will be made with earth, which, when once made and covered with gravel will last for all time to come.

Some work has been done on the college gymnasium lately and more is to follow with the hope of finishing it up soon. The students need the use of the building badly during the wintry weather, and beside this, it is hoped to have it in a more presentable appearance by the time for the meeting of the State Oratorical association which meets here this year.

Mrs. I. S. Schilling of Chico, Butte county, California, whose husband is a nephew of the old man Schilling on Chehalis mountain, arrived here the first of the week and will remain for some time, hoping that the change of climate may benefit her. Her physician advised her to try the climate in the mountain districts of Oregon and that is the object of her visit.

The long bridge at the east end of First street is the oldest bridge in the county, all the others that were built at the time this one was put up having been replaced by new ones. This indicates that the lumber used in this bridge was excellent and that the workmanship was first class. Noah Heater was at the head of the carpenter work on the bridge and this accounts for the stability of the structure. But there is an end to all things earthly and this bridge comes in the list of perishables. The posts that support the bridge are badly decayed toward the ground, which renders it somewhat unsafe, but just what to do in the matter is something of a puzzle to the council, as the city treasury is not running over with ready cash. Whether the old structure will be replaced by a new one or the old one patched up for the present has not been fully decided.

Burglars Again.

Burglars made a raid on Newberg again last Tuesday night and carried off a little pocket change. Joseph Wilson's grocery, L. M. Parker's clothing store and A. T. Hill's drug store were visited and their cash drawers and safes thoroughly overhauled. None of the safes were locked and consequently none of them were damaged in opening. Hill lost between seven and eight dollars in change and a revolver, Parker a little more than seven dollars and Wilson three or four coppers. The visitors gained entrance to the stores by the use of a skeleton key.

Two or three suspicious looking characters were about town on Tuesday and some think they are the chaps who did the work, while there are others who think the guilty parties live nearer home.
