James Madison, who was in town Wednesday, said grass for stock was the best he had ever seen it at this time in the season. This condition is quite a fortunate one, for dry feed commands a good price and it is not any too plentiful for the amount of stock in the country.

Walter Terrell received a letter a short time ago from a party in Southern California asking for information about raising such big strawberries as grow in Oregon. It must have been very humiliating for a Californian to ask for information of an Oregonian respecting the growing of berries or fruits, but we have plenty of men who can give them pointers along these lines.

I write this to let you know what I would not do: I would not do without Chamberlain's Pain Balm in my house, if it cost \$5 per bottle. It does all you recommend it to do and more.—J. R. Miss Lulu Hopkins, daughter of Mr. and Mrs. Henry Hopkins, was married to Benjamin Yergen of Champeog on Thursday last week.

Farmers who have fat stock to sell will find Stanley & Cooper in the market ready to buy, and families who like juicy steaks and tempting roasts will always find the best market affords at their meat market.

Letters going out on the noon mail will leave Portland for points east just as soon—in fact on the same train that those mailed in the morning go out on, so there is nothing gained by rushing around early in the morning to post letters for the east.

O. J. Hobson has secured a position with the Tribune, the new Portland morning daily as proof reader. The Graphic extends congratulations and hopes to be able to record the fact later that O. J. has reached the top round of the ladder in the Tribune office.

John Gubser arrived home last Saturday from a trip over in the Nestucca country where he spent some three weeks visiting an old friend. He came out as far as Sheridan on foot, climbing a mountain trail and had some experiences that he says he don't care to repeat. When he arrived in Newberg he looked like he needed another vacation to recover from the one he had just finished.

A Tennessee lady, Mrs. J. W. Towle, of Philadelphia, Tenn, has been using Chamberlain's Cough Remedy for her baby, who is subject to croup, and says of it: "I find it just as good as you claim it to be. Since I've had your Cough Remedy, baby has been threatened with croup ever so many times, but I would give him a dose of the Remedy and it prevented his having it every time." Hundreds of mothers say the same. Sold by C. F. Moore & Co. druggists.

The lovers of foot ball were again disappointed on Thursday last week as the State University team of Eugene wiped the boys in the morning that they would not come, putting up the plea that their team had disbanded. This story sounds very fishy to say the least for it was only on the day before that they phoned to the boys that they would be here. A big game was expected and the largest crowd ever seen on the grounds would have been present if the University team had only been on hand as advertised.

Rev. N. A. Baker, of Mt. Tabor, will preach morning and evening at the Friends church next Sunday. Both discourses will be on the subject of Gospel Temperance.

New York City has a Tree Planting Association and Newberg ought to have one. There are many homes about town that a few nice shade trees would add much to the appearance of. This is a good time to set them.

Charley Clemenson's family now numbers four, the latest arrival being a youngster who appeared on the scene of action some three weeks ago. This of course ought to have received mention earlier, but Charley is inclined to be rather slow to speak about his domestic affairs, hence the delay.

Henry Livengood has been having a great deal of trouble with his eyes for a long time, he being almost blind a part of the time, and consequently it has been impossible for him to maintain his family without aid from others. Application has now been made to the county court for assistance for them and it will no doubt be granted.

Charley Mackey and family were down from above Dayton to pick chicken bones with relatives on Thanksgiving. Charley dropped in and deposited the price of a year's subscription before leaving town and went on his way with a lighter heart. Others would give cause for thankfulness if they would follow his example.

Allen Cook, who was at Sherwood on last Saturday night reports the burning of the Smock warehouse near the depot at that place during the night. It contained about forty tons of hay and several sacks of onions, all of which was a total loss. The fire was supposed to have been of incendiary origin.

There is no medicine in the world equal to Chamberlain's Cough Remedy for the cure of throat and lung diseases. This is a fact that has been proven in numberless cases. Here is a sample of thousands of letters received: "I have tried Chamberlain's Cough Remedy while suffering from a severe throat trouble, and found immediate and effective relief. I can unhesitatingly recommend it."—EDWARD W. WHITMORE, Editor Grand River (Ky.) Herald. For sale at C. F. Moore & Co.'s drug store.

Austin Gollaber, the old boyhood friend of Abraham Lincoln, said recently: "Abe always remained at the head of his class, and I never knew him to be turned down. His studious habits made him a favorite with the teacher, which caused a great deal of jealousy among his classmates toward him, and, not being generally liked anyhow, it made him very unpopular."

Mrs. Stark, Pleasant Ridge, O., says, "After two doctors gave up my boy to die, I saved him from croup by using One Minute Cough Cure." It is the quickest and most certain remedy for coughs, colds and all throat and lung troubles. C. F. Moore & Co.

One of the pupils from which John Wesley preached stands in front of a Wesleyan chapel at Wednesbury, England. It consists of a horse block, from which the founder of Methodism preached no less than forty-five sermons. In his time it stood by the side of a building in one of the open spaces of that town.

Mrs. M. B. Ford, Russell's, Ill., suffered for eight years from dyspepsia and chronic constipation and was finally cured by using De Witt's Little Early Risers, the famous little pill for stomach and liver troubles. C. F. Moore & Co.

The report that there is only one surviving schoolmate of Abraham Lincoln has been disproved. Mrs. Susie Yeager, of Rhineyville, Ky., now in her ninetieth year, was a schoolmate of the great emancipator at the first school session he attended.

Many of us fashion our own crosses, and then blame providence for the burdens we have to bear.—Philadelphia Times.

Rheumatism in Horses.
Rheumatism in horses is generally known through the country as staggers, as it derived the name from the stiff and staggering gait of the animal. Some have diagnosed the disease as spinal meningitis, inflammation of the Kidneys, Paralysis, while others ascribe the cause to bots and want of exercise, dry feed, not sufficient green feed, eating fern and etc. The disease in question is rheumatism caused by the retention of waste and poisonous material in the system. It is a winter disease and more prevalent in cold, damp, changeable weather. Poor and indigestible food is one source of the evil, affecting the liver and kidneys. The food not being digested, the strengthening elements it contains cannot be absorbed into the system and the body suffers from the lack of the nutritive elements which it should obtain from the food and the whole system suffers from the absorption of the effete poisonous matter created by the decomposition of the undigested food. The kidneys and bladder are irritated from the acids formed in the stomach and carried out of the system through water, the urine being loaded with impurities. The liver receiving the impure blood becomes congested, torpid and inactive and fails to secrete the fluid which it should furnish to assist in carrying the excrement from the system. Owing to the lack of this secretion in the intestines there will be constipation, the fluid portions being again absorbed into the blood to further poison it. The disease is neither contagious nor infectious and there are preventable measures and curative remedies in the majority of cases but it is not by turning the animal out to get exercise as some do in the cold rains and wind or starving it to drink dish water or sour swill. The animal would be more apt to recover in a good dry shelter with warm clothing and nourishing food, with remedies which act by neutralizing the acids and substances and causing them to be carried out of the system.
