The weather conditions for the past week have been very discouraging for farmers. The larger part of the fall sown wheat is in the shock, and with rains and continual cloudy weather, great anxiety is felt lest the crop shall be injured. A little thrashing was done last week for George Hash and about eleven hundred bushels for Mr. Wilkes up the valley, but since that, everything has been at a standstill. At this writing the indications seem favorable for a change of weather and should it clear up now little if any damage to the crops will result.

On the Wednesday evening train up from Portland, there was a passenger aboard decidedly juvenile to be traveling alone. A little halless wail of about four years, who runs about the Jefferson street depot, and who sometimes jumps on the local and rides out to Oswego and back, made a mistake in the signs on the evening train, and boarded the wrong train. He was not noticed until Tualatin was reached, when it was too late to send him back, so the genial brakeman Lou took him in charge, taking him on up to Sheridan for the night, and checking the little tad back into Portland on the next morning's train. The equanimity of the youthful traveler did not seem at all disturbed, and he seemed inclined to make the most of his trip by seeing all the sights.

The Oregonian says: Dr. Burns Merchant, formerly a Yamhill county dentist, has just returned from the Klondike, where he spent two years in the practice of his profession. After visiting a few weeks in his native town, North Yamhill, he will start for a trip around the world, taking in Honolulu and Manila on his outward course and swinging homeward on Dewey's trail, reaching the United States again on the Atlantic side. The Doctor did not dabble in mining stocks nor wade around in the muddy placers while in the Klondike, but perseveringly "stuck to his last," or rather to his forceps, and returned home well satisfied with the financial result; so much so that he can afford to visit all the important dots on this terrestrial ball and afterward settle down to a competency in "old Yamhill."

Fred obtained a second grade certificate while Miss Effie received a first grade, and also a life, state diploma for primary grade teaching, the first to be issued in this county we understand.

The professor must have been suffering from some slight mental aberration, only temporal of course when the other evening he absent mindedly asked a friend to come over and "set up" with him. But then the professor is easily excused, for the psychology of habit is answerable for so many such tell-tale breaks,—and then besides the young lady was off at the coast.

E. C. Ward and H. C. Barclay are home from their trip to southern Oregon and will start for California soon. They found a very fair crop of prunes in the country from Roseburg south as far as Ashland but the country was so over-run with buyers that growers have concluded the price will be high and consequently it is slow work making purchases.

Their Business Booming. Probably no one thing has caused such a general reviving of trade at C. E. Smith's drug store as his giving away to his many customers of so many free trial bottles of Dr. King's New Discovery for Consumption. Their trade is simply enormous in this very valuable remedy, from the fact that it always cures and never disappoints. Rules For Storing Wheat. Following are the rules for storing wheat at the Newberg Flouring Mills. Wheat is stored in bulk as we loan the grain sacks to our customers. Anyone selling their wheat between the present date and July 15, 1900, will get two cents more per bushel than the local market price as compared with value of wheat in bulk at Portland. Customers who carry their wheat over to another year will get no more for it than the real market price at time of selling. Should we sometimes pay more than two cents above the market price for stored wheat or wheat brought to mill, we reserve the privilege of only paying such a price for stored wheat until we have supplied our needs. On stored wheat taken out in small quantities for chicken feed no storage will be charged. Wheat exchanged for any kind of millstuf or grain. KINSON & FEVENS.
