NOT OREGON LAND.

Contention of Washington Boundary Commissioners—Old Ship Channel Is the Line.

F. L. Rice, of South Bend, and J. B. Nice, of Cathlamet, who compose the Washington state boundary commission appointed by Governor Rogers to investigate the disputed boundary line between Oregon and Washington, have completed their work from the mouth of the Columbia river to Tongue Point. They find that vast and valuable tracts of tide lands besides valuable fishing and seining grounds, which are now claimed and taxed by Oregon, are in Washington according to the law establishing the territory of Washington and defining the boundary line between it and Oregon to be the center of the main ship channel of the Columbia river. The initial point at the mouth of the Columbia is two miles from Fort Stevens and four miles from Fort Canby on a line across the river connecting these two points. Thence the line follows the center of the main ship channel, which has remained practically the same since the boundary was defined first, until the confines of Wahkiakum county are reached, where the commission lays claim to considerable territory now held by Oregon.

Off Wahkiakum county the main channel was formerly up Woody's channel through the Cordell channel and thence into Woody's channel. This was buoyed by the government as early as 1853 and ran close to the Oregon shore. These channels are not now in use, as the construction of the jetty, which was expected, according to the United States engineer's report, to scour them out, in reality filled them up and throw the main channel over on the Washington shore. This shifting of the channel has formed valuable tide lands, including the well-known Miller and Oliver sands, which the commission claims for Washington on the ground that the old channel and not the new one should be taken as the dividing line. This construction also throws into Washington territory the Desdemona and Middle sands which have never before been claimed by this state.

The commission has made a preliminary inspection of the boundary line up the river to a point above The Dalles and from all their information it would appear that Oregon claims and taxes everything in sight, including some lands which have as high as 100 families living on them.

If the contention of the commission proves to be correct, over 90 per cent of gillnetting ground and nearly all of the seining grounds on the Columbia belong to Washington, and Oregon has no foundation to its claim of jurisdiction over Sand island, which has been the cause even of bloodshed in years past.

Mr. Nice, the member of the commission from Cathlamet, has lived on the river for over 30 years and his personal knowledge of the location of the old channels and his wide acquaintance with the old-timers on the river are proving of great value.

Ship Oranges in Liquid Air.

The Fay Fruit Company, of Los Angeles, has made arrangemnts with Charles E. Tripler to use his processes and appliances for the manufacture and employment of liquid air. The object is to equip the refrigerator cars of the company so that liquid air can take the place of ice. Since the company sends East yearly over 2,000 carloads of citrus fruit, vegetables, dried fruits and nuts, and the great bulk of its shipments must be made in refrigerated cars, this matter is highly important. The plant which will be installed for liquifying air will also supply magic substance for use in every other conceivable way.

The New Steamer Line.

Captain W. J. Ellis, of the steamer Bay City, has a plan on foot which, if consummated, will insure to Bellingham bay for years to come a first-class steamboat service. Captain Ellis proposes to organize a steamboat stock company, composed of New Whatcom people, with stock subscribed to the amount of $65,000 or $75,000. He will take a large block of this stock, turning over in payment therefor the steamer Bay City, valued at $20,000. A new steamer to cost in the neighborhood of $40,000 would be built this winter and placed on the Whatcom-Seattle-Tacoma run.

Snake River Valley.

T. A. Harris, immigration agent for the Union Pacific and region Short Line, tells the Omaha Bee that the Snake river valley in Idaho is "the richest agricultural region in the West." It is being rapidly settled up, and the Short Line has just begun the extension of a line from Idaho Falls to St. Anthony, 40 miles distant, which will be completed in time to handle this fall's crops.

Ice Companies Amalgamated.

It will now become necessary for the people of Butte, Mont., to solve the question of whether ice is a luxury or a necessity. This decision is made necessary by the amalgamation of the different companies supplying ice, or rather the majority of these firms have been bought out by the Butte Ice Company.

Northwest News Notes.

Everett has a Sunday closing movement on hand.

Walla Walla's assessed valuation increased $500,000 in a year.

Lewiston, Idaho, has 3,000 more people now than three years ago.

Alaskan railways have forfeited their rights of way through inattention to requirements of the grants.

Governor Rogers proposes gun metal medals for Washington volunteers.

The Rickerall flouring mill, in Polk county, which has a capacity of 150 barrels, is now running night and day. They are now grinding 5,000 sacks of flour for export to China.

A great amount of speculation is being indulged in regarding a coast railroad, and it is the general impression that a road will be built along the coast in a very short time. It is said the proposition leading to its construction is a competing road, and that the Santa Fe Company is to be the builder.

OUR FINANCIAL POWER.

London Cannot Get From New York the Gold That It Needs.

R. G. Dunn & Co. in their weekly review of trade say:

July failures have been smaller than in any month of which there is record excepting May, and trading failures smaller than in any other month. Surprising contrasts are shown by comparisons of small with large failures in different years and in no class of business without some large failures not attributable to present influence, does the aggregate equal the average of the past six years. London again recognizes the financial power of this country. The Bank of England virtually admits that it cannot draw from New York the gold it needs; exchange moves to the importing point; over $1,000,000 starts from Sidney to San Francisco. London's net buying of stocks has been 40,000 shares and bills against produce to be shipped are very heavy.

This describes a repetition of finance not unlike that in industries. Europe is searching for wool here at 50 cents a pound, scoured, and for pig iron at $20 a ton. A vast demand for both materials has fallen upon the commercial world which this country alone appears able to meet for its own needs. Wool shipments from Australia have been surprisingly little below those of last year, but Europe talks of a wool famine, while this country has on hand a year's consumption or more, besides this year's clip, and prices are not yet as high as they were in February of last year, when stocks were many million pounds larger.

Failures for the week have been 182 n the United States, against 196 last year, and 23 in Canada against 21 last year.

When Company Comes in Country.

Begin to enjoy yourself when your guests begin to arrive—in fact, before they arrive. Do not try to serve such an elaborate dinner that the work of getting it ready will draw so upon your physical powers that they will be strained to their utmost endurance. When your visitors arrive, greet them with a hearty handshake, make them feel that you are ready for their coming; speak of the pleasure that you hope the day may bring; compliment them on their good appearance; notice the neckwear, the dainty handkerchief; be thoroughly interested in each and every one. When the time comes for you to prepare the dinner and place it upon the table, leave your guests as gracefully as possible. If the dinner be not too elaborate, and the mental atmosphere be clear and bright, your friends will come again. "Eat to live," and not "Live to eat," should be the motto of every household.—Mrs. John B. Sims, in Ladies' Home Journal.

Cucumber Boats.

Peel the cucumbers, cut them in two lengthwise, and scrape out the seeds. Put the pieces on ice till wanted, then fill with the following mixture: Chop tomatoes and celery, and add a few drops of onion juice, also mayonnnaise dressing. Arrange the boats on lettuce leaves, and garnish with thin slices of radishes with the red skin left on. Any good salad mixture will make a nice filling.—American Salad Book.

Mistaking the Operation.

A very short-sighted old gentleman going into one of our large towns for the first time, and coming from the heart of the country, seeing a man digging, went to him and said:
